WIDENER UNIVERSITY

Widener University, One University Place, Chester, PA 19013-5792

Member, Association for Continuing Higher Education

Member, University Professional & Continuing Education Association

Accredited by the Middle States Association of Colleges and Schools

TITLE IX

Title IX of the Education Amendments of 1972 ("Title IX") prohibits discrimination based on sex and gender in educational programs and activities that receive federal financial assistance. Such programs include recruitment, admissions, financial aid and scholarships, athletics, course offerings and access, hiring and retention, and benefits and leave. Title IX also protects students and employees from unlawful sexual harassment (including sexual violence) in university programs and activities. In compliance with Title IX, the university prohibits discrimination and harassment based on sex in employment as well as in all programs and activities.

The university's Title IX coordinator monitors compliance with Title IX and its accompanying regulations. Individuals with questions or concerns about Title IX and/or those who wish to file a complaint of noncompliance may contact the Title IX coordinator or deputy coordinators: The university's Title IX coordinator is Director of Employee Relations Alison Kiss Dougherty, One University Place, Chester, PA 19013; tel. 610-499-1301; e-mail akdougherty@widener.edu. The university has also appointed several deputy Title IX coordinators: For students on the Chester, PA, campus and Extended Learning students: Assistant Dean for Student Development and Engagement Catherine Feminella, One University Place, Chester, PA 19013; tel. 610-499-4392; e-mail cafeminella@widener.edu; or Chief of Campus Safety Kevin Raport, tel. 302-477-2202; e-mail kjraport@widener.edu. For students and employees on the Wilmington, DE, campus: Dean of Students Susan Goldberg, Widener University Delaware Law School, 4601 Concord Pike, Wilmington, DE 19803; tel. 302-477-2173; e-mail slgoldberg@widener.edu. For students and employees on the Harrisburg, PA, campus: Supervising Attorney and Director, of Student Organizations Mary Catherine Scott, Widener University Commonwealth Law School, 3800 Vartan Way, Harrisburg, PA 17106; tel. 717-541-0320; e-mail mccscott9055@widener.edu.

The U.S. Department of Education's Office for Civil Rights (OCR) is the division of the federal government charged with enforcing compliance with Title IX. Information regarding OCR can be found at: www.ed.gov/about/offices/list/ocr/index.html. Questions about Title IX may be directed to OCR as well as to the university's Title IX coordinator or deputy coordinators.

UNIVERSITY POLICY

It is the policy of Widener University not to discriminate on the basis of sex, gender, pregnancy status, age, race, national origin or ethnicity, religion, disability, status as a veteran of the Vietnam era or other covered veteran, sexual orientation, gender identity, marital status, or genetic information in its educational programs, admissions policies, employment practices, financial aid, or other school-administered programs or activities. This policy is enforced under various federal and state laws, including Title VII of the Civil Rights Act of 1964 as amended by the Civil Rights Act of 1991, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination in Employment Act, and the Americans with Disabilities Act. Further, in compliance with state and federal laws, Widener University will provide the following information upon request: (a) copies of documents pertinent to the university's accreditations, approvals, or licensing by external agencies or governmental bodies; (b) reports on crime statistics and information on safety policies and procedures; and (c) information regarding gender equity relative to intercollegiate athletic programs—Contact: Senior Vice President for Administration and Finance, Widener University, One University Place, Chester, PA 19013; tel. 610-499-4151. Comments or requests for information regarding services and resources for disabled students should be directed to: Director of Disability Services, Widener University, One University Place, Chester, PA 19013; tel. 610-499-1266; or Dean of Students, Widener University Delaware Law School, P.O. Box 7474, Wilmington, DE 19803; tel. 302-477-2173.

This publication contains information, policies, procedures, regulations, and requirements that were correct at the time of publication. In keeping with the educational mission of the university, the information, policies, procedures, regulations, and requirements contained herein are continually being reviewed, changed, and updated. Consequently, this document cannot be considered binding and must be used solely as an informational guide. Students are responsible for keeping informed of official policies and meeting all relevant requirements.

The university reserves the right and authority at any time to alter any or all of the statements contained herein, to modify the requirements for admission and graduation, to change or discontinue programs of study, to amend any regulation or policy affecting the student body, to increase tuition and fees, to deny admission, to revoke an offer of admission, and to dismiss from the university any student at any time, if it is deemed by the university to be in the best interest of the university, the university community, or the student to do so. The provisions of this publication are subject to change without notice, and nothing in this publication may be considered as setting forth terms of a contract between a student or a prospective student and Widener University.

CENTER FOR EXTENDED LEARNING MISSION AND GOALS

MISSION

Extended Learning provides quality student-centric undergraduate educational programs and noncredit programming to adults and nontraditional students that will enhance their intellectual, professional, and personal development. Educational programs are theory-based with practical applications that encourage students to respond to the evolving global world. Student-centric services are designed to assist students to become self-directed lifelong learners. Program quality and student learning are continually assessed to ensure that the educational experiences meet or exceed goals.

- WE VALUE:**
- Lifelong learning
 - Our stakeholders: students, faculty, alumni, staff, and community partners
 - Academic freedom
 - Freedom to learn
 - Civic engagement
 - Diversity
 - Assessment of programs, student learning, and faculty and staff

GOALS

- **Outreach:** Extended Learning conducts outreach to adult learners by overcoming barriers of time, place, and tradition in order to create lifelong access to educational opportunities.
- **Life and Career Planning:** Extended Learning addresses adult learners' life and career goals before or at the onset of enrollment in order to assess and align its capacities to help learners reach their goals.
- **Assessment:** Extended Learning stakeholders (of which the faculty is the leading body) define and assess the knowledge, skills, and competencies acquired by adult learners both from the curriculum and from life/work experience in order to assure the learning experience is rigorous and relevant.
- **Financial:** Extended Learning promotes choice, using an array of payment options for adult learning in order to expand equity and financial flexibility.
- **Teaching/Learning:** Extended Learning has credit and noncredit programming that prepares students for the global world and is taught by faculty who use multiple methods of instruction.
- **Student Support Services:** Extended Learning assists adult learners using comprehensive academic and student support systems in order to enhance students' capacities to become self-directed lifelong learners.
- **Technology:** Extended Learning uses information technology to provide relevant and timely information and to enhance the learning experience.
- **Strategic Partnerships:** Extended Learning engages in strategic relationships, partnerships, and collaborations with employers and other organizations to develop and improve educational opportunities for adult learners.

GENERAL INFORMATION

Extended Learning offers courses in evening, Saturday, and online formats. Classes are offered on the Main Campus in Chester, Pennsylvania.

UNDERGRADUATE DEGREE PROGRAMS

- Bachelor of arts (majors in liberal studies, psychology, criminal justice, and organizational development and leadership)
- Bachelor of science in allied health
- Bachelor of science in legal studies [joint program]
- Bachelor of science in professional and applied studies
- Associate in arts (major in liberal arts)
- Associate in science (majors in allied health, general studies, legal studies, radiologic technology, and professional and applied studies)
- Minors (applied supervision, applied technology supervision, criminal justice, psychology, sociology, and gender and women's studies).

ADJUSTMENT OF CHARGES

In case of total semester withdrawal, tuition will be adjusted on a pro rata basis. The specific schedule for adjustment of charges for each academic term is developed in accordance with regulations of the U.S. Department of Education. The adjustment chart can be found online by clicking on "Office of the Bursar" then "Guide to Fees and Payments" on the Enrollment Services web site at www.widener.edu/onestop.

NOTICE OF WITHDRAWAL

The effective date used for all adjustment of charges will be the date that a written notice of withdrawal is received by the appropriate program office of Widener University.

FINANCIAL AID ADJUSTMENT

In the case of adjustment due a student who has been awarded financial aid, the adjustment becomes the amount available for distribution to the federal, state, and institutional fund accounts. The amount returned to the funding agencies is determined in accordance with federal and state regulations. Any balance remaining after required repayments to sources of financial aid is refunded to the student. The detailed worksheet of the distribution formula can be obtained from the Student Financial Services Office.

UNDERGRADUATE EXTENDED LEARNING SCHOLARSHIPS

Extended Learning offers a number of scholarships to eligible adult and nontraditional students. Students can apply for all applicable scholarships offered through Extended Learning by submitting the Extended Learning General Scholarship Application at any time. Any resulting financial awards are generally made for the semester immediately following the date of submission.

Prospective Extended Learning students may be eligible for the Osher Reentry Scholarship, which provides tuition assistance for returning students who have been out of attendance for five years or more at the time of reentry. Students need not have been a student at Widener previously. For more information, visit our website at widener.edu/extended/scholarships.

CAMPUS SECURITY AND FIRE SAFETY REPORTS

Widener is committed to the safety and security of all members of the Widener University community. The university's annual Campus Safety and Fire Safety Reports are on the Widener website and contain information on campus security and personal safety, including crime prevention, university law enforcement authority, crime reporting policies, disciplinary procedures, and other campus security matters. The Campus Safety Reports contain statistics for the three previous calendar years on reported crimes that occurred on campus, in certain off-campus buildings and property owned and controlled by the university, and on public property within or immediately adjacent to and accessible from campus.

The Fire Safety Report contains information on fire safety systems in on-campus student housing facilities, the number of fire drills held during the previous year, the university's policies on portable electrical appliances, smoking, and open flames in student housing facilities, the university's procedures for student housing evacuation in the case of a fire, policies regarding fire safety education and training programs provided to students and employees, a listing of persons or organizations to which fires should be reported, and plans for future improvements in fire safety. It also contains statistics for the three most recent calendar years concerning the number of fires and cause of each fire in each on-campus student housing facility, the number of persons who received fire-related injuries that resulted in treatment at a medical facility, the number of deaths related to a fire, and the value of property damage caused by a fire.

The annual Campus Security and Fire Safety Reports are available online:

Main Campus: www.widener.edu/campussafety

Delaware Campus: delawarelaw.widener.edu and click on Current Students then Campus Safety.

Harrisburg Campus: commonwealthlaw.widener.edu and click on Current Students then Campus Safety.

If you would like a printed copy of these reports, contact the Campus Safety Office at 610-499-4203 to have a copy mailed to you. The information in these reports is required by law and is provided by the Campus Safety Office.

VETERANS

Widener University is approved for the training of veterans for all degree and internship programs. Veterans enrolling for the first time should contact their local Department of Veterans Affairs to verify benefits. The DVA will authorize an application and provide the veteran with a Certificate of Eligibility. The certificate should be taken to the coordinator of Veterans Affairs to establish receipt of benefits while attending Widener University. Veterans should apply at least six weeks prior to their expected date of enrollment.

Veterans transferring from another institution to Widener University are required to submit VA Form 22-1995 (Request for Change of Program or Place of Training) at least four to six weeks prior to the expected date of change.

Currently enrolled veterans are required to contact the campus coordinator of Veterans Affairs during each semester. This enrollment status requirement is designed to assist in avoiding delays in receipt of monthly benefits.

For more information, visit online at www.widener.edu/vets or contact the coordinator of Veterans Affairs in Enrollment Services at 610-499-4414. The coordinator's office is open Monday–Friday, 9 a.m. to 5 p.m.

COURSE LOAD

Extended Learning provides part-time programs for working adults. The Extended Learning course schedule is based on students taking six to nine credits per semester. Students who wish to take more than nine credits in a semester or term must receive written permission from the assistant dean.

ACADEMIC SUPPORT SERVICES

Undergraduate Extended Learning supplies a range of academic support services, including:

- academic advisement
- educational planning
- tutoring

MATHEMATICS AND WRITING CENTERS

Located on the Main Campus in Chester, the facilities of these centers are available to assist students in improving skills. Students may seek these services on their own initiative or at the suggestion of faculty.

Math Center—The Math Center offers individualized and group tutoring at all levels of mathematics. The center's staff includes members of the mathematics faculty and experienced tutors. Faculty may refer students or students may seek assistance on their own at the first sign of a problem. The Math Center is located in Room 273 of Academic Center North.

Writing Center—If a student needs help with any writing assignment, regardless of the course, the Writing Center is the place to go for assistance. Staffed by Widener professors, instruction is designed to deal with the student's individual needs. The center is beneficial to both the good writer who wants additional polishing and the student who is having difficulty. Appointments are suggested. The Writing Center is located in the Old Main Annex.

TUTORING

Limited tutoring is available for a broad range of topics and courses. In some instances, students serve as peer tutors. In other instances, faculty and graduate students provide assistance. Call the Center for Extended Learning for more information.

CAREER SERVICES

Career Services assists students with choosing a major; exploring career options; gaining experience through cooperative education, internships, and summer jobs; developing effective résumés; learning interviewing skills; creating individualized job search strategies; and applying to graduate school. These services are available to all Widener students. Individual assistance from a career counselor is available by appointment or during walk-in hours.

All students have access to PrideCareers, an online service that offers job listings and an employer database, as well as the ability to post résumés to employer-accessible résumé databanks. Students may also use PrideCareers to participate in the Alumni Mentor Program. Career Services coordinates several career fairs annually, offering students the opportunity to meet with employers and to learn about full-time and internship opportunities. An active recruiting program brings employers from a variety of fields on campus to interview students for positions.

FOCUS, a Web-based career guidance system, is available to assist students with decisions related to choice of major and career. A career library is located within Career Services and houses career resources and graduate school materials. Visit the Career Services website for hours, a calendar of events, and career and job search resources: www.widener.edu/careers.

DISABILITIES SERVICES

Disabilities Services is a comprehensive support service for students who have physical, learning, and/or psychological disabilities. Disabilities Services offers individual academic coaching and counseling to students enrolled in one of Widener's standard academic programs. Coaching typically focuses on development of individual learning strategies, academic planning, social or emotional adjustment, and linking students with Widener's extensive academic support services. Disabilities Services serves as an advocate for disabled students on campus. Disabilities Services is located at 520 E. 14th Street. Disabilities Services' phone number is 610-499-1266.

Any student has the right to request reasonable accommodation of a disability. A student seeking accommodations needs to bring appropriate documentation of his or her disability to Disabilities Services. If the student has any questions or concerns about the response to a request, the student is encouraged to meet with the director to explore and discuss those concerns. If the student and director are unable to reach a satisfactory resolution, the student can meet with the provost to discuss possibilities for resolving the concerns or filing a grievance.

Please see the Extended Learning website for more information on these services (widener.edu/extended).

ACADEMIC INFORMATION

ACADEMIC AND GENERAL POLICIES

- A student's degree program and catalog are binding only after the student has been officially accepted into the degree and has enrolled and attended classes at Widener. If the student receives an official degree requirement sheet but delays enrollment, the student will be required to meet any changes that occur in his or her degree program.
- If a student enrolls in classes but does not complete the application process and is not an accepted student, the student will be required to follow the degree program in effect at the time he or she completes the application. For example: If you enrolled in classes in fall 2018, but do not send in transcripts from your transfer institution until fall 2019. You would be required to follow the 2018–2019 catalog; you would not be eligible to follow the 2019–2020 catalog.
- Students who drop out for three consecutive years or more must reapply for admission and meet the program requirements in effect at the time of readmission.
- Students are responsible for knowing and meeting the graduation requirements for their degree program. Keeping in contact with the advisor, at least once a year, will help students stay on track.
- After official acceptance at Widener, a student may take a maximum of 9 credits at another institution but first the student must obtain written permission from the associate dean.
- A minimum grade of 'C' is required for all transfer credit. Some programs have a time limit on age of transfer courses.
- Students may take no more than 24 credits, in any combination, from the areas of ACCT, BLAW, BUS, EC, FIN, MGT, MHR, MIS, MKT, OPM, QA, SBAH, or SMGT.
- Graduation is not an automatic process; a student must fill out and submit a graduation petition form with payment. The student's record is then reviewed and the student notified of his or her graduation status and any requirements that need completion.

ADMISSIONS

Requirements—Undergraduate Extended Learning maintains an open admission policy for mature (22 years of age and over) students. There is no testing requirement for admission. Some programs may require additional criteria, please see "Exceptions" below.

Exceptions—Students who have been dismissed from Widener or have administrative or academic holds must contact the associate dean. Please call Extended Learning at 610-499-4282 for more information.

Legal Education—The open admission policy does not apply to joint programs with the Legal Education Institute. Please contact the Legal Education Institute at 302-477-2205 for more information on legal and legal nurse consulting programs.

Widener-Crozer Partnership—The open admission policy does not apply to the joint program with Crozer. Please contact the program advisor at 610-499-4282 for more information on this program.

International Students—The open admission policy does not apply to international students, or students under the age of 22 who are not direct transfers from an Extended Learning articulation institution. International students and those under the age of 22 must apply through the day admissions office at 610-499-4126.

Admission to Degree Status (Matriculation)—Students admitted to degree candidacy are called matriculated students.

- **If you have never attended college**, matriculated status is attained by submitting to the Center for Extended Learning proof of high school graduation (in the form of a copy of the diploma, transcript, or GED certificate). Home school students are required to submit a curriculum validation along with their completed application.
- **If you have attended college and earned 12 or more credits**, matriculated status is attained by submitting sealed transcript(s) from all colleges attended to the Center for Extended Learning.
- **If you have attended college and earned less than 12 credits**, college transcript(s) *plus* proof of high school graduation are required.

When all documents are received, you are notified by the associate dean of acceptance as a matriculated student.

Admission to Nondegree Status (Undeclared)—Any individual who can demonstrate a need may be admitted to specific courses on a nondegree basis regardless of prior educational background. Students admitted to specific credit courses on a nondegree basis are called 'undeclared' students. All courses successfully completed by undeclared students may be applied toward a degree, if applicable, should the student decide to seek one later. Applicants are notified in writing of the action taken on their applications.

Undeclared Students—To become a degree-seeking student, an undeclared student must submit official transcripts from all colleges previously attended and proof of high school completion (if prior college work is less than 12 credits). An exception to this is a student who does not meet the grade point average requirements under the academic progress policy. A student may not be admitted to a degree program if he or she does not meet the minimum grade point average for the credits completed. Undeclared students will be accepted into the degree requirements in effect at the time of matriculation, not those that were current at the time of initial enrollment.

POLICY ON DISCLOSURE OF CRIMINAL CONVICTIONS

All applicants and students must disclose the existence of any pre- or post-admission criminal convictions, excluding minor traffic offenses. Applicants must disclose criminal convictions on the application form where indicated. Students must disclose any inaccuracy, corrections, or changes to the information provided on their application form in writing to the associate provost and dean of students. Students must also disclose in writing any post-admission arrests or criminal convictions to the associate provost and dean of students.

1. PRE-ADMISSION CONVICTION AND PRE-ADMISSION DISCLOSURE (APPLICANTS)

Upon pre-admission disclosure, from any source, of an applicant's conviction of a crime, whether misdemeanor or felony, the university will refuse admittance in all instances involving violence, child abuse, sexual misconduct, or illegal drugs, and may refuse admittance with respect to other convictions. However, upon refusal of admittance based upon a pre-admission disclosure by the applicant, the affected applicant may submit additional materials or request a meeting with an Admissions Office representative for further consideration.

2. PRE-ADMISSION CONVICTION AND FAILURE TO DISCLOSE (STUDENTS/APPLICANTS)

Upon discovery, from any source, of an undergraduate applicant's or student's failure to disclose a pre-admission criminal conviction, whether misdemeanor or felony, the applicant/student will be subject to refusal to admit, immediate revocation of acceptance, or dismissal, as the case may be. A student's dismissal will be in accordance with Student Handbook procedures.

3. POST-ADMISSION CONVICTION AND TIMELY DISCLOSURE (STUDENTS)

Upon timely disclosure by the student, of the student's post-admission conviction of a crime, whether misdemeanor or felony, the student will be subject to discipline in accordance with the procedures set forth in the Student Handbook.

4. POST-ADMISSION CONVICTION AND FAILURE TO DISCLOSE (STUDENTS)

Upon discovery, from any source, of a student's failure to disclose a post-admission conviction of a crime, whether misdemeanor or felony, the student will be subject to immediate dismissal. The student's dismissal will be in accordance with Student Handbook procedures.

Nothing contained in sections 1 through 4 above shall in any way limit the university's right and authority as set forth in the Student Handbook, "Policy on Protective Action," to take immediate action when, in the sole judgment of the university, the health, safety, or welfare of the college community or the student is threatened or endangered.

LEAVE OF ABSENCE/READMISSION

It is assumed that students who are pursuing an associate's or bachelor's degree may not be able to enroll in courses continually each semester from the time of matriculation until graduation due to the demands of family, career, or personal issues. If an Extended Learning student must stop taking classes, he or she may return to the college without penalty and continue to complete the degree requirements that were in effect at the time of matriculation, providing the absence is less than three consecutive years. A student who does not attend classes for three consecutive years (36

months) will be considered officially withdrawn and must reapply. A student returning to Extended Learning after three years or more will have to meet the degree requirements in effect at the time of his or her reapplication and re-enrollment in Extended Learning.

Readmitted students are responsible for all qualitative and quantitative requirements for the degree that are in effect at the time of readmission, as opposed to those that might have been in effect during the period of prior attendance. Students readmitted to Widener University following an absence of three or more years may, at their option, have their prior credits recognized (in a similar manner to those of transfer students) in accordance with the following:

- All courses completed with grades of C or higher will be recognized as credit with no qualitative value.
- Earlier courses in which a grade of F was earned are not carried forward. For students with a GPA of at least 2.00 at the time of re-entry, courses with grades of C-, D+, or D may be used to satisfy curricular requirements consistent with the school's/college's policy on the transfer of C- or lower grades.
- The determination as to which of the courses are acceptable in satisfying specific degree requirements will be made by faculty in the major area into which the student is accepted.
- Calculation of the student's new GPA will begin at the point of re-entry. All courses taken at Widener will be listed on the transcript.
- Honors will be awarded on the basis of the cumulative GPA under the same conditions applicable for all transfer students.

Students interested in this option should contact the associate dean.

MEDICAL WITHDRAWAL/LEAVE OF ABSENCE

The associate dean, in consultation with and upon the recommendation of university physicians, psychologists, or psychiatrists or other professionals, may invoke the university's right to require a student to withdraw from the university or take a leave of absence for medical or psychological reasons. Such reasons include but are not limited to situations where a student may cause imminent harm to himself/herself or others: situations where a student cannot be effectively treated or managed while a member of the university community; or situations where one's medical or psychological state seriously impedes the academic performance or social adjustment of the students or others in the academic community. Prior to any decision regarding readmittance to the university, the associate dean may require a student completing a medical leave of absence to be evaluated by the university medical and/or psychological staff or other professionals.

TRANSCRIPT REQUESTS

Students needing a transcript of their Widener University academic record should go online to www.widener.edu/registrar for information. A fee will be charged for each transcript.

TRANSFER CREDIT

Extended Learning welcomes students who wish to transfer from other colleges or who have attended college in the past. After completing the application and forwarding official transcripts of all prior college work, transfer students will receive complete information showing how the college courses transfer. Students who do not disclose prior college records at the time of application are subject to dismissal or expulsion at any future time when

prior attendance is discovered. The following are considered in awarding transfer credits:

- Course work must come from a regionally accredited institution of higher learning recognized by the appropriate professional body. An original transcript with institutional seal and registrar’s signature is required.
- Course work is accepted and placed against requirements of a chosen curriculum either as equivalent to a required course or as an elective. Other eligible courses are accepted on the transfer credit statement with an appropriate notation. Transferred electives are designated in a particular discipline area such as humanities, science, or social science, if appropriate.
- Credit will not be awarded for developmental, basic, community service, or physical education courses or programs.
- Transfer credits will be awarded for not more than one half of the courses required in the major subject area of an academic program.
- Grades of C– or lower may not be transferred if the cumulative GPA from all prior institutions is lower than 2.00.
- No course with a grade of C– or lower may be transferred if it is a required course for the student’s major.
- Credit for English 101 may not be given for a course with a C– or lower grade.
- No course credit may be given for a C– or lower grade to satisfy any general education requirement.
- In sequential courses in which mastery of the first course is required for success in the second course (e.g. Calculus I and Calculus II), credit will be given if the second course’s grade is equal to or greater than C.
- No D or lower grades are permitted for transfer credit.
- No more than 24 credits of business courses may be transferred.
- Credit will be awarded to graduates of hospital-based programs in approved allied health professions only toward the allied health degree. The amount of credit awarded will be determined by the associate dean based upon specific technical certification (see BLOC credit).
- There is no time limit on transfer credit, except that the content of accepted courses must be such as to contribute to the readiness of students to progress through the program in the major area of study.
- Transfer credit decisions are guided by flexibility and common sense and have as a central concern the educational well-being of the student, the student’s educational goals, and the goals of the Center for Extended Learning.
- The final determination of transfer credit awarded is made by the associate dean.
- Extended Learning maintains articulation agreements with many colleges and programs on the national level.

ACADEMIC CREDIT FOR PRIOR LEARNING

Extended Learning recognizes that college-level learning may occur in settings other than the traditional classroom. Students may be awarded credit for learning acquired as the result of work experience or other self-directed learning activities. Not more than one half of the total credits required in the major subject area of an academic program can be earned through nontraditional methods. Also, it should be remembered that students still must satisfy the in-residence requirements—the final 30 credits for a bachelor’s degree and 15 credits for an associate’s degree.

Credit may be earned in the following ways (since no

grades are given for credit earned from these sources, such credit has no effect on a student’s academic average):

- Advanced placement.
- Advanced standing (BLOC credit)—for approved programs.
- Educational experiences in the Armed Services—verified by The American Council on Education.
- Training programs—“The National Guide to Educational Credit for Training Programs” and “The Directory of the National Program on Non-Collegiate Sponsored Instruction” (PONSI) verified by The American Council on Education.

Portfolio Assessment—Credit may be earned through the development of a portfolio that provides evidence and documentation that the student has achieved in a nontraditional setting the learning outcomes of specific courses. A portfolio is a file or folder of information compiled by the student about specific past experiences and accomplishments. The portfolio is evaluated by a faculty member who is expert in the field of the student’s area of learning. An advising/counseling session is required prior to the development of a portfolio. Contact the associate dean for more information.

TRANSFER CREDIT AFTER ACCEPTANCE

Once accepted into a degree program, a student is expected to continue his or her course work at Widener University. A student may request to take courses at another institution, and the associate dean may approve petitions for transfer back of credit under the following conditions:

- The student is in good standing with a GPA of 2.0 or better.
- No more than nine credits may be transferred back.
- No more than six credits in the major remain to be completed elsewhere.
- The student submits a catalog from the transfer institution and receives written approval to take specific courses prior to registration.
- The normal regulations for transfer credit apply.

Courses taken at other institutions have no effect on the student’s cumulative average at Widener since quality grade-point credits will not be transferred. A minimum grade of C must be earned in a course to have the credits transferred to Widener.

GRADING SYSTEM

Here is the scale of grades and the equivalent in quality points:

A (Excellent)	4.00
A-	3.70
B+	3.30
B (Good)	3.00
B-	2.70
C+	2.30
C (Average)	2.00
C-*	1.70
D+*	1.30
D (Passing)*	1.00
F (Failure)	0.00
P (Pass: pass/no pass course)	0.00
NP (No Pass: pass/no pass course)	0.00
AU (Audit: no credit)	0.00
I (Incomplete)	0.00
W (Withdrawn)	0.00

**Passing but below the required average for graduation.*

The plus/minus grading system is optional, the decision resting with each instructor.

Students receiving W or F in any course are required to repeat the course to obtain credit. They cannot enroll in any course for which the failed/withdrawn course is a prerequisite until the prerequisite course is successfully completed.

Pass/No Pass Grading Option (P/NP)—Students may elect to take certain courses on a pass/no pass basis. Pass/no pass forms are available in the Extended Learning Office and must be submitted to the associate dean before the end of the second week of a semester, or before the end of the first week of a summer session. Whether a student receives a grade of pass or fail, the course and grade will be recorded on the transcript but will not affect the cumulative GPA. The following conditions apply to pass/no pass:

- A student must have matriculated status and may elect the pass/no pass option after completing 30 credits of study.
- No more than one course each semester or summer session may be graded on the pass/no pass basis.
- The course cannot be (1) within the major field, (2) one that is required for graduation, or (3) one that satisfies Widener University general education requirements.
- A maximum of six courses may be taken as pass/no pass.
- The student may request that a course be graded pass/no pass—or, if pass/no pass was originally opted, that the traditional letter grade be recorded instead—by no later than the second week of the semester or the first week of the summer session.
- No courses in a minor may be taken on a pass/no pass basis.

Consult with your academic advisor to be certain that a course to be taken meets the above requirements.

Auditing (AU)—A student may elect to audit a course, that is, to enroll but receive no academic credit. Such a student must formally register, paying the same tuition and fees as if the course was taken for credit. The student is not subject to any of the usual academic requirements (class attendance, examinations). A decision to audit a course must be made when registering. Once enrolled as an audit student, one cannot seek to change status and receive credit.

Incomplete (I)—A grade of I is given to a student who has failed to complete course requirements because of excusable reasons. To receive a final grade for the course, the student must complete all requirements by the midterm of the next semester following the semester in which the Incomplete was given. This date will be printed in the academic schedule. The next working day after this date, the Registrar's Office will change all remaining Incompletes to Failures. The instructor may stipulate that the work be made up prior to the midterm date.

Any student who receives an incomplete grade (I) in two consecutive semesters or terms will be subject to the following:

- The student will be limited to six credits for the following two semesters/terms (six credits for the entire summer term).
- The student must sign an academic contract prior to registration and meet at least twice during the semester with an academic advisor during which time strategies for successful completion of the contract and the student's academic progress are discussed.

Credit—The unit of credit is the semester hour.

DEAN'S LIST AND HONORS

At the close of each semester, the Center for Extended Learning publishes a Dean's List of students who have earned academic distinction. To be selected, the student must be in a degree program, have carried at least six semester hours, and have achieved a semester GPA of not less than 3.50. Students who carried at least six semester hours in the semester and earned an average of 3.00 to 3.49 will be awarded Academic Honors for that semester.

ACADEMIC INTEGRITY POLICY

The Academic Integrity Policy was approved by the Faculty Council. Additional regulations are excerpted and paraphrased from the "Minutes of the Academic Council." These regulations explain Widener University's expectations regarding students' academic conduct and describe procedures related to those expectations. Exceptions to the regulations may be made only by special action of the school/college academic councils of the Academic Review Board. References in this catalog refer to all Extended Learning students.

STATEMENT ON ACADEMIC INTEGRITY

Widener University strongly supports the concept of academic integrity and expects students and all other members of the Widener University community to be honest in all academic endeavors. Cheating, plagiarism, and all other forms of academic fraud are unacceptable; they are serious violations of university policy. In some circumstances, students' conduct may require review under the research integrity policy, the freedom to learn policy, the judicial review policy, and other university policies. Widener University expects all students to be familiar with university policies on academic integrity, as outlined in this catalog. The university will not accept a claim of ignorance—either of the policy itself or of what constitutes academic fraud—as a valid defense against such a charge.

VIOLATIONS OF ACADEMIC INTEGRITY

Violations of academic integrity constitute academic fraud. Academic fraud consists of any action that serves to undermine the integrity of the academic process or that gives the student an unfair advantage, including:

- inspecting, duplicating, or distributing test materials without authorization.
- cheating, attempting to cheat, or assisting others to cheat.
- altering work after it has been submitted for a grade.
- plagiarizing.
- using or attempting to use anything that constitutes unauthorized assistance.
- fabricating, falsifying, distorting, or inventing any information, documentation, or citation.

Each student's program may have on record additional specific acts particular to a discipline that constitutes academic fraud. These specific acts are specified in relevant handbooks or course syllabi.

STATEMENT ON PLAGIARISM

One of the most common violations of academic integrity is plagiarism. Plagiarism can be intentional or unintentional. However, since each student is responsible for knowing what constitutes plagiarism, unintentional plagiarism is as unacceptable as intentional plagiarism and commission of it will bring the same penalties. In many classes, faculty members will provide their definitions of plagiarism. In classes where a definition is not provided, students will be held to the definition of plagiarism that follows:

Definition of Plagiarism

Plagiarism—submitting the work of others as one's own—is a serious offense. In the academic world, plagiarism is theft. Information from sources—whether quoted, paraphrased, or summarized—must be given credit through specific citations. When a

student paraphrases a work, it is still necessary to cite the original source. Merely rearranging a sentence or changing a few words is not sufficient. The citation style should be appropriate for the discipline and should clearly indicate the beginning and ending of the referenced material. All sources used in the preparation of an academic paper must also be listed with full bibliographic details at the end of the paper, as appropriate in the discipline.

FACULTY AND STUDENT RESPONSIBILITIES

- Every student, faculty member, and administrator is responsible for upholding the highest standards of academic integrity. Every member of the Widener community shall honor the spirit of this policy by refusing to tolerate academic fraud.
- When expectations for a course are not addressed in this policy, it is the responsibility of the instructor to provide students with additional guidelines for what constitutes “authorized” and “unauthorized” assistance.
- It is the responsibility of every student to seek clarification if in doubt about what constitutes “authorized” and “unauthorized” assistance. In cases of collaborative work, all students within the collaborative group may be responsible for “unauthorized” assistance to any individual student within the collaborative group.
- Students are required to obtain permission prior to submitting work, any part of which was previously or will be submitted in another course. The instructor has the option of accepting, rejecting, or requiring modification of the content of previously or simultaneously submitted work.

A student who suspects that a violation of academic integrity has occurred should report that violation to the associate dean. In this report, the student should describe any action taken, such as talking with the person involved or with a faculty or staff member. Every effort will be made to preserve the anonymity of the student reporting the incident; however, confidentiality cannot be guaranteed.

RESOLUTION AT THE FACULTY/STUDENT LEVEL

Process

- A faculty member who becomes aware of possible academic fraud should inform the suspected student(s) in writing and send a copy to the associate dean.
- The faculty member will also provide the student with the opportunity to respond to the charges within five business days. If the student fails to respond to this opportunity, the student forfeits any right to appeal the decision to the college level and the faculty member will determine the penalty.
- The faculty member and student will discuss the academic fraud and agree to pursue student/faculty resolution, or, if no such agreement is reached, the matter will be referred at the college level where the course is taught.
- If the faculty member is not satisfied with the sanctions available, he or she may refer the case at the college level by informing the associate dean.
- If the student does not accept responsibility for the academic fraud or disagrees with the sanction imposed by the faculty member, the student may appeal the outcome at the college level.

Penalties

The suggested penalty for academic fraud in any course is failure in the course. However, faculty members may take alternative steps. Penalties available to faculty members include:

- Formal warning.
- Reduction in grade for the assignment.
- Reduction in the grade for the course.
- Failing grade for the assignment.
- A failing grade (F) in the course.

- A failing grade (XF) in the course (a grade of XF will appear on the transcript and be defined on the transcript as failure as a result of academic fraud).

Reporting, and Offenses Subject to Expulsion

In all cases where a faculty member informs a student of possible academic fraud, the faculty member will inform the associate dean as the office of record.

In cases where a faculty member takes action for a case of academic fraud, the faculty member will send a report describing the academic fraud and the penalty being imposed to the student and the associate dean.

All reports of academic fraud will be reviewed to verify whether reports have been received indicating that the student has been found responsible for any other act of academic fraud. In cases where the associate dean finds that the case is a repeat offense where the student has received a failing grade (F or XF) in a course for each offense or a case where a student has stolen or attempted to steal an examination, the associate dean will refer the case to the associate provost for undergraduate academic affairs. This individual will expel the student from the university. The student may appeal cases resulting in expulsion to the Academic Review Board.

RESOLUTION AT THE COLLEGE/SCHOOL LEVEL

Process

- Cases of academic fraud outside the class will be referred to the associate dean.
- Upon receiving the case, the associate dean shall notify the student in writing of the charge of academic fraud, the penalty to be imposed, and all rights of appeal.
- If a student wishes to contest the charge of academic fraud, the student may do so according to the process stipulated in the *Student Handbook*. In such a case, the student will also be informed of the process.
- In cases where the penalty results in dismissal of the student, the student may appeal the decision at the university level in writing or by e-mail to the associate provost for undergraduate academic affairs.

Penalties

The maximum penalty imposed in school or college resolution for individuals convicted of academic fraud shall be dismissal from the school or college. Lesser penalties may include:

- Formal warning.
- Reduction in grade for the assignment.
- Reduction in the grade for the course.
- Failing grade for the assignment.
- Failing grade (F) in the course.
- A failing grade (XF) in the course (a grade of XF will appear on the transcript and be defined on the transcript as failure as a result of academic fraud).
- Required attendance at an academic integrity workshop or tutorial.

Reporting, and Offenses Subject to Expulsion

The associate dean will send a report describing the academic fraud and the penalty being imposed to the student, the affected faculty member(s), and the Office of the Associate Provost for Undergraduate Academic Affairs.

All reports of academic fraud will be reviewed by the associate provost for undergraduate academic affairs to verify whether reports have been received indicating that the student has been found responsible for any other act of academic fraud. In cases where the associate provost for undergraduate academic affairs finds that the case is a repeat offense where the student has received a failing grade (F or XF) in a course for each offense or a case where a student has stolen or attempted to steal an examination, the associate provost for undergraduate academic affairs

will expel the student from the university. The student may appeal cases resulting in expulsion to the Academic Review Board.

RESOLUTION AT THE UNIVERSITY LEVEL

Process

The associate provost for undergraduate academic affairs will review all reports of academic fraud.

- If the associate provost for undergraduate academic affairs finds the case is a repeat offense where the student has received a failing grade (F or XF) in a course for each offense, the associate provost for undergraduate academic affairs will expel the student from the university. The student may appeal the case to the Academic Review Board.
- If the associate provost for undergraduate academic affairs finds the case is a repeat offense where the student has not received a failing grade for both offenses, the case will be referred to the Academic Review Board.
- If the student has stolen or attempted to steal an examination, the associate provost for undergraduate academic affairs will expel the student from the university. The student may appeal the case to the Academic Review Board.

Penalties

The maximum penalty imposed by the Academic Review Board for individuals convicted of academic fraud shall be expulsion from the university. Penalties include:

- An XF grade in the course (a grade of XF will appear on the transcript and be defined on the transcript as failure as a result of academic fraud).
- Removal of the privilege of representing the university in extracurricular activities, including athletics, as well as the privilege of running for or holding office in any student organization that is allowed to use university facilities or receives university funds.
- Suspension from the university for up to one academic year. Students suspended for academic fraud cannot transfer into Widener any credits earned during the suspension.
- Dismissal from the university. Students dismissed for academic fraud must apply for readmission according to the Academic Review Board guidelines. Readmission applications by students suspended for academic fraud must be approved by the Academic Review Board.
- Expulsion from the university without the opportunity for readmission.

Reporting

The associate provost for undergraduate academic affairs will send a report describing the academic fraud and the penalty being imposed to the student and the affected faculty members, as well as maintain a copy as the office of record.

APPEALS/DECISIONS ON ACADEMIC INTEGRITY

When a student is expelled or dismissed by the associate provost for undergraduate academic affairs, the student may initiate his or her appeal to the Academic Review Board by notifying the associate provost for undergraduate academic affairs in writing of the request for an appeal, together with a concise statement of the grounds for the appeal.

Written notice of the student's request for appeal, together with the concise statement of the student's grounds for the appeal, must be received by the associate provost for undergraduate academic affairs no more than ten business days following the decision of the faculty, college, or university.

When a case is referred to the Academic Review Board, the associate provost for undergraduate academic affairs shall notify the student in writing of the time and location for the Academic Review Board hearing.

The membership of the Academic Review Board consists of the provost, the associate provost for undergraduate academic

affairs, the dean of each school/college, the chair of the faculty, and the chair of the Faculty Council Academic Affairs Committee; provided, however, that any majority of the foregoing members shall constitute a quorum for purposes of conducting any matters to come before the Academic Review Board pursuant to these standards. Any faculty member on the Academic Review Board involved in the original accusations will not participate in deliberations in that case.

At an appeal before the Academic Review Board, the student shall have the opportunity to be heard and the right to produce witnesses or introduce evidence subject to the reasonable discretion of the Academic Review Board. The student may also be accompanied by a representative of his or her choosing who may not participate in the appeal. The Academic Review Board shall not be subject to any evidentiary rules but shall accept or reject evidence in its sound discretion. All appeals shall be closed to the public and no stenographic record shall be required unless requested at the expense of the requesting party. In the absence of a stenographic record, the Academic Review Board shall provide, in its sole discretion, either a recorded record or notes of the proceedings taken by a member of the Academic Review Board.

The results of all appeals to the Academic Review Board, permitted in the Academic Integrity Policy, shall be final.

Any matter submitted to a faculty member, the school/college, or the university for decision or review under this policy shall be decided in a timely manner and the parties shall use their best efforts to conclude the proceedings within the semester in which the alleged offense has occurred or the appeal is received; provided, however, that any delay in the proceedings shall in no way operate as a waiver of the university's right to assess any or all of the sanctions permitted hereunder.

ATTENDANCE

Since it is assumed that learning cannot take place without regular communication between the student and teacher, class attendance is important. It is recognized that some adults will find it necessary to miss a class for serious reasons such as illness or job responsibility. No indiscriminate absence from classes is permitted. Instructors are within their prerogative to consider a student's attendance when assigning a final grade.

All class work, quizzes, examinations, and other assignments missed because of absence must be made up to the satisfaction of the instructor. At the instructor's request, warning letters will be sent to those who are excessively absent.

MISSED EXAMINATIONS AND QUIZZES

Students who miss any examination or quiz given during a scheduled class, may, with the permission of the instructor, take the missed examination or quiz in the Center for Extended Learning during office hours. This is done by appointment only. Since space is limited, the student must call the Center for Extended Learning to schedule an appointment. No exams or quizzes can be taken on a walk-in basis.

ACADEMIC GRIEVANCE APPEAL PROCEDURE

If a student has a grievance concerning a class in which he or she is enrolled, the student will first try to resolve the problem with the instructor of the class. If it is impossible to resolve the matter at this level, the student must place the grievance in writing and can then appeal to the next higher level. The student should inquire at the office of the dean responsible for the course in question for the proper appeal procedure if the student's grievance is not resolved to the student's satisfaction after appeal to the instructor.

COMPUTATION OF ACADEMIC AVERAGE UPON CHANGE OF MAJOR

Students who change their major must meet all the requirements of the new curriculum.

- The student may request, when changing to the new major, that the grades earned for no more than four courses completed under the former major and not required in the new major be omitted from the computation of the cumulative GPA and changed to pass/no pass. Such courses may be applied to the new major only as free or limited electives.
- All course work and grades received under the former major remain part of the student's academic record. However, the student's cumulative GPA will be recomputed effective with the change to the new major. (Original grades are used to compute academic honors at commencement.)
- Students should consult with their academic advisor and submit a written request to the associate dean.

DROPPING AND ADDING OF COURSES

All dropping and adding of courses can be accomplished only by contacting the Center for Extended Learning. Notice to the instructor of intention to drop is not acceptable. A student who does not drop a course officially will receive a grade of F (failure) for the course. Students who are veterans and who have changed the number of credits (semester hours) for which they are enrolled as a result of dropping or adding must immediately notify the coordinator of Veterans Affairs. For specific dates and the effect of dropping and adding courses on the transcript, please consult the academic calendar or call the Center for Extended Learning.

REPETITION OF COURSES (VOLUNTARY)

A student may repeat any course, regardless of the grade, to change a cumulative GPA on the permanent record. The conditions are:

- No course may be repeated more than once without written permission from the associate dean.
- Courses previously taken under the standard grading system (A through F) may be repeated under the pass/no pass option. However, they must fall within the regulation for pass/no pass, and the student must receive a passing grade in order to effect any change on the transcript.
- When a course is repeated, the former grade remains on the transcript but carries no credit and is not used in calculating the student's cumulative GPA. The latter grade replaces the original grade for credit and quality points on the transcript. This applies even when the latter grade is lower than the former. If a student withdraws from a repeated course, no change will be effected. Please note that in cases of academic fraud, this policy does not apply.
- Permission to repeat a course for cumulative GPA change must be approved by the academic advisor.
- A student may not repeat a course to earn academic honors.
- "Repetition of Course" forms are available in the appropriate campus office. The completed form must be presented to that office when the student enrolls in the course.

Courses, once attempted at Widener, cannot be repeated at another institution without the permission of the associate dean, and in no case can the repeat affect the Widener University cumulative grade-point average.

SUBSTITUTION OF COURSES

Another course may be substituted for a required course under special circumstances. This requires approval of the associate dean. Students desiring this option should consult with their academic advisor and submit a written request.

WAIVER OF COURSES

Certain courses may be waived if a student has achieved a passing grade in a higher level course in the same subject. Only a required course can be waived. In lieu of the waived course, a course of the same credit value is to be scheduled, such course to be determined by the academic advisor in consultation with the associate dean. Approval of a course waiver is made by the associate dean. Students must submit the request in writing.

CREDIT BY EXAMINATION

College-Level Examination Program (CLEP)—Any student may take CLEP tests to demonstrate college-level competency. There are two test categories. The "Subject Examination" measures achievement in college courses that the Center for Extended Learning equates to its offerings. The "General Examination" measures achievements in subject matter that can be credited as electives. If an upper-level course has been taken, a student cannot register for a CLEP test at a lower level in the same subject area.

DANTES Subject Standardized Tests (DSSTs)—The DANTES program is a testing service conducted by Educational Testing Service. These tests have been used by U.S. military personnel to obtain credit toward a degree. In 1983, the tests were made available for the first time for use by civilians. Extended Learning recognizes the recommendation for credit made by the American Council on Education, and awards credit for subjects that can be equated to Extended Learning courses.

THE UNDERGRADUATE WRITING PROGRAM

Writing is more than simply a means of communication, and good writing is a skill that should be mastered by all students. Writing is also a means of thinking and learning, and as such it is an important tool that faculty can use as part of the learning process. In order to develop good writing in all students, Widener University has developed a university-wide writing program.

ENGL 101 is required for all Extended Learning students. All incoming students who do not need to take ENGL 101 will need to complete the writing sample during their first semester on campus. Each school/college periodically uses a writing sample administered by the Writing Center to document the writing progress of their students. Students who need to raise their level of writing have the opportunity to complete a personal writing instruction plan coordinated by the Writing Center. Alternatively, students with a serious deficiency also have the option to take an appropriate course to address the deficiency.

The following table lists the timeframe during which an Extended Learning student must complete the writing sample administered by the Writing Center. The table gives the minimum scores students are expected to obtain without having to complete additional work. Certain majors may require higher scores than those listed.

Credits Toward Degree	Minimum Score
1 - 27	3
28 - 73	4
74 and above	5

Writing Enriched Courses—All students must complete courses that are designated as “writing enriched.” A writing enriched course has three or more writing assignments that include student editing and revision so that students learn to correct their writing errors. The multiple writing assignments, including revisions, total at least 25 pages. Writing enriched courses are specifically designated on the schedule of course offerings with the notation “W.” Certain programs may require specific courses to satisfy this requirement and a student may have to take more than four writing enriched courses to complete his or her degree. Students may be required to take as many as four writing enriched (W) courses according to the following:

Credits Toward Degree	Must Complete
1 - 27	4 W courses
28 - 73	3 W courses
74 and above	2 W courses

Please note: Transfer courses may not count toward writing enriched courses.

Writing Requirements for Graduation—Associate’s degree candidates must complete a minimum of one writing enriched course and attain a level 4 competency on the writing sample to graduate. Bachelor’s degree candidates must complete the number of writing courses based on the credits at the time of enrollment (see table above) and attain a level 5 competency on the writing sample to graduate. All final writing samples must be completed within 18 months of graduation.

PROGRAM SUPPORT—WRITING CENTER

The university maintains a Writing Center to assist students with writing assignments in any course. Professional tutors in the center work individually with students and coordinate their efforts with instructors. The center is equipped with a network of computers for students to use. Faculty encourage students to use the center from the first draft of an assignment through to the final revision. Call the center at 610-499-4332 for more information.

MATH PROFICIENCY

All students must demonstrate proficiency in mathematics prior to graduation by successfully completing a mathematics course (MATH 111 or higher).

ACADEMIC PROGRESS POLICY

STANDARDS FOR CUMULATIVE GPA

To be in good standing, students must meet the following academic progress standards:

Semester Hours Completed	Minimum GPA
15.5 or fewer	1.70
16 - 30.5	1.80
31 - 60.5	1.90
61 and more	2.00

Extended Learning students who do not meet these standards will have their records reviewed by the associate dean to determine if they should be dismissed or if they should be allowed to continue their studies. If students are allowed to continue, they may be required to meet specific conditions established by Center for Extended Learning administrators.

In addition, students may be required to submit a written academic plan on improving their academic average and meet on a regular basis with their advisor. This provision may be continued until a 2.00 cumulative GPA is attained.

MANDATORY REPETITION OF A COURSE

Any student falling below the appropriate minimum GPA standard who fails a required course in his or her major, must repeat the course in the next regular semester (i.e., fall or spring) that it is offered.

STANDARDS FOR SEMESTERLY PROGRESS

Grounds for dismissal for academic failure include:

- Failing to achieve the minimum GPA necessary for good standing consistent with “Standards for Cumulative GPA.”
- Failing six or more credits in one semester.
- Failing to meet the specific requirements and conditions stipulated by the Center for Extended Learning, including failure to make adequate academic progress.

Note that the two summer sessions comprise one semester.

Students who are dismissed have the option to petition the Center for Extended Learning for reinstatement under specific requirements and conditions.

STANDARDS FOR ELIGIBILITY FOR JUNIOR LEVEL COURSES

Some programs require a GPA higher than the minimum GPA on the progress ladder in “Standards for Cumulative GPA” or stipulate other conditions for continuation into the junior year. To learn about such standards and conditions, students should consult with their academic advisor.

ACADEMIC RESIDENCY POLICY

An Extended Learning student seeking a bachelor’s degree must be enrolled for the last 30 semester hours (15 semester hours for the associate’s degree or a minor/certificate program) in courses offered by Widener through the Center for Extended Learning or one of its other schools or colleges.

- Not included in the last 30 semester hours is academic credit earned through prior learning (such as successful scores attained in the College Level Examination Program (CLEP) or the awarding of credit for life/learning experiences) or credit awarded for courses taken at other institutions.
- A minimum of 50 percent of credits in the student’s major program area must be taken at Widener.
- A student is expected to continue his/her studies in the Center for Extended Learning once matriculated status has been established.
- Requests for “transfer back of credit” occur in cases in which a student who is close to completion of a degree must withdraw from Extended Learning because of a move to another geographical part of the country, or a student needs a course to graduate that is not being offered (requests in this case must be completed prior to the final semester). This policy provides for exceptions to be made to the college’s residency rule, which states that the last 30 credits (15 credits for associate’s degree) must be taken at Widener University.

GRADUATION INFORMATION

A student who anticipates qualifying for graduation should arrange for an advising session when 90 credits have been earned if seeking the bachelor's degree, or 50 credits if seeking the associate's degree. At this session, remaining course requirements will be confirmed.

When the student has determined the expected graduation date, a graduation petition is completed online. The university confers degrees three times a year but only one ceremony is held (in May). If the expected graduation date is May, the petition must be submitted by November 1 of the previous year; if August, by March 1 of that year; and if December, by July 1 of that year.

When the graduation petition is received, the student's academic record is reviewed. The student is notified by email regarding approval or denial of the petition.

All details and instructions regarding the commencement exercises are posted online at www.widener.edu/commencement in the spring. The site is updated regularly, so check back often for important information.

GRADUATION CRITERIA

To graduate from the Center for Extended Learning, students must:

- Satisfactorily complete all required courses in curriculum and have cleared any "I" (incomplete) grades.
- Have at least a 2.00 overall GPA and, if applicable, the minimum GPA for the major courses.
- Satisfy residency requirement by taking the last 30 credits of classroom instruction at Widener University. (15 credits for associate degrees.)
- Take at least 50 percent of the major courses at Widener University.
- Take the required number of writing enriched courses.
- Earn the required score on the writing sample within 18 months of graduation.
- Submit no more than three credits of successfully completed developmental courses toward fulfillment of his/her graduation requirements.
- Demonstrate math proficiency by completing MATH 111 or higher.
- Submit a Petition to Graduate form with payment by the deadline.

Any student who intends to take a CLEP examination, a challenge examination, or who needs a score of 5 on the writing sample (4 for associate's degree students) must do so by March 1 for a May graduation date, August 1 for an August graduation date, and November 1 for a December graduation date.

AUGUST GRADUATE PARTICIPATION POLICY

Students who have a cumulative grade-point average equal to or greater than 2.00 and who have no more than nine credits (bachelor's degree) or four credits (associate's degree) remaining to complete the requirements for the degree may petition for permission to participate in the May commencement ceremony. To petition for permission to participate in the ceremony, the student must, before February 1:

- Verify through consultation with the associate dean of Extended Learning that the minimum academic requirements as stated above are met.
- Submit for approval a written summer course plan to the associate dean detailing completion on or before August 30 of these credits.

- Receive written permission from the associate dean to participate in the commencement exercises.
- At the time of the participation petition, the student must also petition for August graduation.
- If a grade of "F" or "I" is received for a course taken during that final summer, the student must re-petition for a later graduation date.

Note: Graduation honors are not announced for students who are participating in the ceremony under this policy. Honors are not calculated until the degree is completed and the student's graduation is approved.

CONFERRING OF DEGREES

Students who complete their graduation requirements by the end of the spring semester and petition to graduate will have degrees conferred at the commencement exercises in May. Students who complete their work and petition to graduate during either the summer or fall semester will be listed as having completed work in either August or December of that year, respectively. There will be no graduation exercises at that time, but students may elect to attend the commencement exercises the following May.

ACADEMIC HONORS

For graduation with the bachelor's degree, honors will be calculated on all work completed in Extended Learning, including the original grades in the case of substitute and repeated courses and approved course work taken at other schools while an Extended Learning student. A minimum of 45 credits of registered in-class course work must be taken in Extended Learning to be eligible for honors.

The minimum grade-point averages for honors are:

3.50	Cum Laude (with distinction)
3.70	Magna Cum Laude (with high distinction)
3.85	Summa Cum Laude (with highest distinction)

For students with transfer credit, the average of all courses taken in Extended Learning (a minimum of 45 registered credits) will be considered for a preliminary review. For those who have averages indicating honors in Extended Learning, and only those, the grades of all prior courses taken at other institutions will be averaged in to determine final eligibility. The final average may not exceed the average earned in Extended Learning.

For transfer or re-entry students who have been out of college for three or more consecutive years, the prior record will be omitted for honors calculation, provided the student has at least 45 credit hours of classroom work in Extended Learning. If a former Extended Learning student has not earned the minimum 45 credits since reentering, all prior Extended Learning classroom work and transfer credit will be included in the honors calculation.

EXPECTATIONS, RIGHTS, AND RESPONSIBILITIES: THE WIDENER COMPACT

Widener University is a corporation, chartered by the Commonwealth of Pennsylvania and the State of Delaware, with authority vested in its Board of Trustees. Appropriate authority, then, is specifically delegated by the board to the president of Widener University, and through the president to other members of the administration and faculty and to individuals and groups throughout the institution. The following policies and procedures articulate specific rights or privileges the university grants students and the expectations it has for them.

The Office of Student Affairs will handle reports of violations of the Widener Compact directly by settlement or by referral to the appropriate hearing boards or administrator. At the discretion of the dean of Student Affairs, parents of students will be notified of disciplinary action or potential problems. Officers and faculty advisors should note that the Office of Student Affairs might withdraw university recognition from student groups or organizations for just cause.

THE RIGHT AND FREEDOM TO LEARN

Widener University is a comprehensive teaching institution. As members of our academic community, our students are encouraged to develop the capacity for critical judgment and to engage in sustained and independent study. Free inquiry and free expression in an environment of individual and group responsibility are essential to any community of scholars. The following guidelines have been developed to preserve and protect that community.

1. IN THE CLASSROOM

- a) Students are responsible for thoroughly learning the content of any course of study, but they should be free to take reasonable exception to the data or items offered, and to reserve judgment about matters of opinion. Therefore, students should be evaluated by their professors solely on the basis of their academic performance.
- b) Widener University is prepared to protect a student through orderly procedures against prejudiced or capricious academic evaluation by a faculty member.
- c) Protection against improper disclosure of information concerning a student is a serious professional obligation of faculty members and administrative staff that must be balanced with their other obligations to the individual student, the university, and society.

2. OUT OF THE CLASSROOM

- a) Campus organizations, including those affiliated with an extramural organization, must be open to all students without regard to sex, disability, race, age, color, religion, national or ethnic origin, marital status, status as a veteran of the Vietnam era or other covered veteran, gender identity, or sexual orientation.
- b) Widener University students and university-sponsored or university-recognized organizations are free to examine and discuss any issue and to express opinions, publicly or privately, and are free to support causes by orderly means that do not disrupt the regular and essential operations of the university. Any such expression must comply with university guidelines governing free expression activities (see Student Organizations—Protocols). The participation by any student in any unlawful or disruptive activity that fails to comply with university guidelines or disrupts or interferes with the programs, functions, or conduct of the university is a serious offense punishable by suspension, dismissal, or expulsion.
- c) The student press is free of censorship, and its editors and managers are free to develop their own editorial policies and news coverage; however, Widener expects accurate reporting, correct writing, and good judgments in matters of taste.
- d) As constituents of the academic community, students are free to express their views on institutional policy and on matters of general interest to the student body, provided they do so in a manner that is lawful and organized and complies with university guidelines regulating free expressive activities (see Student Organizations—Protocols). For this purpose, students elect representatives to the Student Government Association. There is also Student Services Committee, chaired by a member of the faculty, on which student members sit.

ADDITIONAL STUDENT RIGHTS AND RESPONSIBILITIES

The policies and procedures contained in this bulletin are premised on several basic rights for all members of the Widener community. In addition to the rights articulated in the “The Right and Freedom to Learn” section of this bulletin, students have the following additional basic rights and responsibilities:

1. THE RIGHT TO SAFETY AND SECURITY

In order to assist Campus Safety and to promote security on campus, individuals must assume responsibilities for their own safety and security and for those of others. Students share this responsibility by carefully following all university and community rules and regulations.

2. THE RIGHT TO A CLEAN ENVIRONMENT

All members of the Widener community share the responsibility for maintaining a clean environment.

3. THE RIGHT TO COMMUNAL PROPERTY

For the general welfare of the university, all students have a responsibility to exercise reasonable care in the use of personal or university property.

4. THE RIGHT TO AN ENVIRONMENT SUITABLE FOR STUDY AND FOR COMMUNITY LIVING

Academic study requires a reasonably quiet environment. Community living requires that all members of the Widener community respect one another and each person’s property and share a responsibility for maintaining a clean and safe environment.

5. THE RIGHT TO SAFE AND SECURE RECORDS

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They are:

- a) The right to inspect and review the student’s educational records within 45 days of the day the university receives a request for access.
Students should submit to the registrar, associate dean, head of the academic department, or other appropriate official written requests that identify the record(s) they wish to inspect. The university official will make arrangements for access and notify the student of the time and place the records may be inspected. If the records are not maintained by the university official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
- b) The right to request the amendment of the student’s education records that the student believes are inaccurate or misleading.
Students may ask the university to amend a record that they believe is inaccurate or misleading. They should write to the university official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading.
If the university decides not to amend the record as requested by the student, the university will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.
- c) The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent.

One exception which permits disclosure without consent is disclosure to university officials with legitimate educational interests. A university official is a person employed by the university in an administrative, supervisory, academic or research, or support staff position (including, without limitation, law enforcement unit personnel, health staff, athletic coaches and trainers, and admissions counselors and recruiters); a person or company with whom the university has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; a student serving on an official committee, such as a disciplinary or grievance committee; or a person assisting another school official in performing his or her tasks.

A university official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility and/or to perform his or her job duties.

Upon request, the university discloses education records without consent to officials of another university in which a student seeks or intends to enroll.

- d) The right to file a complaint with the U.S. Department of Education concerning alleged failures by Widener University to comply with the requirements of FERPA. The name and address of the Office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, S.W.
Washington, DC 20202-4605

- e) The right to withhold public disclosure of any or all items of “directory information” by written notification to the Registrar’s Office of the university or the school of law, as applicable, within two (2) weeks after the commencement of the fall or spring semesters of any given academic year. Under current university policy, the term “directory information” includes, without limitation, a student’s name, home and campus address, electronic mail address, home and campus telephone number, photograph, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, enrollment status, degrees, honors and awards received, and the most recent previous educational agency or institution attended by the student.

STUDENT CODE OF CONDUCT

Extended Learning students must read and adhere to the Widener University Student Code of Conduct, which can be found in the *Student Handbook* at widener.edu/studenthandbook.

BACHELOR’S DEGREE PROGRAMS

GENERAL EDUCATION GOALS AND OBJECTIVES

1. A liberally educated graduate communicates effectively.

- a) Gives clear presentations before a group.
- b) Writes papers that require locating, analyzing, and formally referencing information sources to support conclusions.

2. A liberally educated graduate thinks critically.

- a) Makes claims and draws conclusions that require the analysis and evaluation of evidence.
- b) Synthesizes divergent content, methodologies, and models.
- c) Makes and assesses ethical judgments.
- d) Demonstrates an awareness of different points of view and analyzes how these are informed by factors that may include culture, ethnicity, race, socioeconomic status, gender identity, age, disabilities, language, religion, sexual orientation, or geographical area, among others.

3. A liberally educated graduate uses quantitative methods effectively.

- a) Solves problems using mathematical methods.
- b) Interprets, makes inferences, and draws conclusions from data.
- c) Determines whether numerical results are reasonable.

4. A liberally educated graduate has developed a wide range of intellectual perspectives and methodologies.

- a) Evaluates the workings of the natural and physical world using theories and models that can be tested by experiments and observations.
- b) Evaluates social science theories and research methods related to questions of human behavior, mental processes, communication, social and cultural structures, and institutions.
- c) Evaluates philosophical, historical, and aesthetic arguments, evidence, and artifacts.

DEVELOPMENTAL COURSES

Developmental courses enable students to master fundamental knowledge that they need to succeed in their curricula at Widener. The following courses are designated as developmental:

ENGL 100
MATH 101
RDG 105

Developmental courses do not satisfy distribution requirements. No more than three credits of developmental coursework may be counted toward graduation.

DISTRIBUTION REQUIREMENTS

All students are required to complete a minimum of 12 semester hours in each of the three areas of humanities, social science, and science/mathematics. A Semester hour consists of one hour per week in a classroom per semester or two to three hours in laboratory or fieldwork per semester. This requirement is based on the conviction that a baccalaureate degree represents more than expertise in a specific field. Students broaden themselves by taking courses in academic areas that have traditionally been at the heart of an undergraduate education. Students should work closely with advisors in selecting courses appropriate to their interests and academic needs.

Courses taken on pass/no pass basis may not be used to satisfy the university distribution requirement. Both semester-long and certain module courses may be used to satisfy distribution requirements.

THE FOLLOWING SUBJECT AREAS SATISFY DISTRIBUTION REQUIREMENTS:

Humanities

art history
creative writing
English (excluding ENGL 100, 101, 111)
history
humanities
modern language

music

philosophy

Science and Mathematics

astronomy
biology
chemistry
computer science (excluding CSCI 101–124)
earth and space science
environmental science
mathematics (excluding MATH 101–110)
physics
psychology 355
science (excluding SCI 100)

Social Science

anthropology
criminal justice
economics (EC 201, 202 only)
communication studies (COMS 130, 180, 275, 290, 390)
political science
psychology (excluding PSY 381, 382, 383, 384, 385, 395, 409, 410, 419, 423)
social science (excluding SSCI 409, 410)
sociology

Depending on the major, specific courses may be required within each of the three areas.

Requirements for students majoring in allied health, legal studies, and professional and applied studies—Any courses may be selected from among the three areas of humanities, science and mathematics, and social science, resulting in the completion of 12 semester hours in each area. One humanities course must be 300 level or higher. One social science course must be 200 level or higher. Students must complete a 3- or 4-credit mathematics course, MATH 111 or higher. Students who intend to go on to graduate studies in business should take EC 201 and EC 202 as one of the social science and one of the free electives. Allied health and professional studies majors are also required to complete ASC 401. Professional studies majors must take one social science or humanities course with a global focus.

Requirements for students majoring in criminal justice, liberal studies, organizational development and leadership, and psychology—English 101 is required to ensure writing skill. Students must complete a 3- to 4-credit mathematics course. Majors may have a computer course requirement.

Humanities (12 credits): At least one course in humanities must be at an advanced level (300 level), except for students taking two semesters of modern language.

- Any history course (3 credits)
- Any one course from any of these four areas: English literature (130 level or above), art history, music, or philosophy (3 credits)
- Two additional courses in humanities (6 credits)

Science/Mathematics (12 credits): One semester of a science course with an associated laboratory, one semester of mathematics (MATH 111 or above), plus additional courses in science or mathematics (MATH 111 or above).

Social Science (12 credits):

- Two introductory social science courses in different fields, which will give a societal/cultural perspective (6 credits)
- Two additional courses in social science, one of which must be at an advanced level (200 level and above) (6 credits)

Students are encouraged to take further courses in social science or humanities about other cultures and societies.

ASC 401: Values Seminar in Extended Learning (3 credits): An upper-level interdisciplinary course that involves a discussion of values as affecting individual and societal decision making. Students must have completed a minimum of 90 credits, with six semester hours in each of the following: science and mathematics, humanities, and social science.

GENERAL EDUCATION GOALS

By completing these requirements, students at Widener fulfill the university's general education goals, which state:

- Students communicate effectively.
- Students use quantitative methods effectively.
- Students understand the world from multiple perspectives.
- Students cultivate an awareness of themselves and their role within the human community.
- Students cultivate an awareness of their relationship to the natural world.
- Students understand ethical theories and how to apply them personally and professionally.
- Students understand and apply methods of inquiry and interpretation.
- Students think critically.

Moreover, graduates become liberally educated, possessing knowledge beyond the boundaries of a chosen field or discipline.

BS IN ALLIED HEALTH (ENTRY PROGRAM)

120 semester hours of credit required for degree

The bachelor of science in allied health is open to those students interested in careers in healthcare and related fields. The major is broad-based and provides in depth background for the student who wishes to enter the allied health professions or wants to continue their education on the master's level.

ALLIED HEALTH ENTRY PROGRAM CURRICULUM

*Students with less than 75 transfer credits will take UCS 101; those with 75 transfer credits or more will take UCS 102. This will be determined at acceptance.

**One course must be MATH 111 or higher.

BS IN ALLIED HEALTH (DEGREE COMPLETION)

121–123 semester hours of credit required for degree

This program is open only to those holding associate's degrees or hospital certificates in approved allied health professions. This degree permits students to complete a minor or select courses that will enhance personal and professional goals.

Advanced standing of 51 semester hours of credit is awarded to graduates of approved hospital programs in radiologic technology who are also certified by the American Registry of Radiologic Technologists and to graduates of approved hospital programs in respiratory therapy who are also certified by the National Board for Respiratory Care. For those who have qualified for either of the above certifications through course work completed at either a

community or four-year college, advanced standing of 30 semester hours will be awarded in addition to transfer credit on a course-by-course basis. Total credit awarded for radiologic technology and respiratory therapy courses may not exceed 51 semester hours.

Advanced standing of 40 semester hours of credit is awarded to those who have completed approved programs and are registered as dental hygienists.

Advanced standing of 30 semester hours of credit is awarded to those who have completed approved programs in other recognized allied health fields. A list of approved programs is available from the allied health advisor. Registered nurses who are no longer working in the field of nursing may be admitted with advanced standing of 30 semester hours to the allied health degree program with permission of the allied health academic advisor.

Students must satisfy certain general education requirements in the areas of humanities, social science, and science/mathematics. (Note: Students receiving any segment of advanced standing of less than 51 hours may have to take up to 12 semester hours of science/mathematics to satisfy the 12 semester-hour requirement in this area.) All students must complete one mathematics course.

The degree awarded is the bachelor of science in allied health.

TOTAL SEMESTER HOURS	121–123

*Students with less than 75 transfer credits will take UCS 101; those with 75 transfer credits or more will take UCS 102. This will be determined at acceptance.

**See General Education Requirements. Students who do not have 12 credits of science/mathematics within their BLOC credit must take 12 credits of science/mathematics area courses within the limited electives. One course must be MATH 111 or higher.

†Students who have been awarded advanced standing of 30 credits will take 33 credits of limited electives. Students who have been awarded advanced standing of 40 credits take 23 credits of limited electives. Those students who have 51 credits of advanced standing take 12 credits of limited electives.

MASTER OF EDUCATION IN ALLIED HEALTH

Students who complete the bachelor of science in allied health are encouraged to apply for admission to the master of education in allied health education (see the *Allied Health Education Graduate Catalog*).

WIDENER-CROZER ALLIED HEALTH PARTNERSHIP

Undergraduate Extended Learning at Widener and the Crozer-Chester Medical Center have partnered to offer the bachelor of science in allied health—diagnostic medical sonography degree and the associate of science in allied health—radiologic technology degree.

BS IN ALLIED HEALTH—DIAGNOSTIC MEDICAL SONOGRAPHY (DMS)

121–123 semester hours of credit required for degree

This program is designed to prepare competent, entry-level general sonographers in the cognitive, psychomotor, and affective learning domains. Upon successful completion of the program, students are eligible to sit for the American Registry for Diagnostic Medical Sonography (ARDMS) certification. The degree awarded is a bachelor of science in allied health—DMS.

PROGRAM REQUIREMENTS

Complete an associate of science in general studies degree that includes some of the requirements for the diagnostic medical sonography (DMS) program. Once students meet the criteria for admission to the DMS program, they can move into the bachelor's program. Students without previous college credits are encouraged to work with their advisor.

ADMISSION REQUIREMENTS FOR THE ULTRASOUND PROGRAM

- 3.0 grade point average (GPA) recommended
- Grade of "C" or better in the following courses:
 - ENGL 101 Reading, Thinking, & Writing
 - MATH 117 Elementary Functions
 - BIOL 121 Anatomy and Physiology I (within 5 years of admission)
 - BIO 122 Anatomy and Physiology II (within 5 years of admission)
 - PHYS 141 College Physics
 - ALLH 220 Healthcare & the Law (or Medical Ethics)
- Medical Terminology

ADDITIONAL PRECLINICAL REQUIREMENTS

- Active certification in CPR/BLS
- FBI fingerprint, background check, and Pennsylvania child abuse clearance
- Physical and drug clearance
- Interview with the Crozer-Chester DMS program director
- Certified Nursing Assistant (CNA) license required within 6 months of clinical start, if not active in direct patient care (program director determination)

Students will receive Widener credit for all Crozer-Chester courses and clinicals and will be required to complete their courses and clinicals in consecutive semesters. Sitting for national registry boards in physics, abdomen, and ob/gyn are also a requirement for graduation.

BA IN CRIMINAL JUSTICE

120 semester hours of credit required for degree

The criminal justice major prepares students for careers in criminal corrections, the courts system, police work, probation, and other law-related professions. The program is also a good preparation for graduate work in law, public and criminal justice system administration, and the social sciences in general. The major is broad based, emphasizing the study of crime within the context of the larger disciplines of sociology, government and politics, and psychology.

The major provides a solid theoretical understanding of the administration of justice in the United States at local, state, and federal levels. Its goals are to have students understand the changing nature of the relationship between criminal justice institutions and the persons and groups that make up the environment of these institutions and to explore historically and comparatively the social forces that shape differing kinds and rates of criminal conduct.

*See General Education Requirements.

†The research sequence begins in the fall and covers four semesters (2 years, with no research courses offered in the summer).

ACADEMIC POLICIES FOR CRIMINAL JUSTICE MAJORS

Criminal justice majors are required to maintain a 2.0 average in the major. This GPA is calculated using the criminal justice core requirements only. Student GPAs will be reviewed at the end of each academic year. If the student's GPA falls under 2.0, the student is required to retake the courses in which he/she received below a C in order to raise the GPA to a 2.0. The student will retake the courses during the following summer or fall or whenever next offered. If a student needs to repeat a core requirement elective, he/she must choose one that is offered in the following fall semester. All classes in which students receive an F must be repeated as soon as the course is offered again.

BA IN LIBERAL STUDIES

120 semester hours of credit required for degree

The liberal studies program provides broad interdisciplinary study in the liberal arts and sciences. The program affords a breadth of exposure to the major academic disciplines of the social sciences, humanities, and sciences while providing an opportunity to achieve depth in selected areas. With the assistance of the academic advisor, the student can schedule a number of courses to meet specific interests and needs. The curriculum provides the foundation for a number of careers, given the interest of business and government in hiring people with broad knowledge, writing skills, and analytic abilities fostered by a liberal arts concentration. It is also an appropriate preparation for a number of graduate programs.

The degree awarded is bachelor of arts. This degree permits the selection of a minor.

BA IN ORGANIZATIONAL DEVELOPMENT AND LEADERSHIP

120 semester hours of credit required for degree

This program is designed for students who desire to improve their career skills in leadership, communication, and organizational effectiveness in order to assume supervisory and leadership roles in diverse corporate, service, and nonprofit settings. It is not a business degree but instead concentrates on the skills of critical thinking, ethics, and dealing with organizational stability and change. Upon successful completion of the program, the bachelor of arts degree is awarded.

BS IN LEGAL STUDIES

120 semester hours of credit required for degree

Students enrolled in this ABA-approved program are provided the maximum opportunity to become educated in the theory, philosophy, and ethical practice law. They become well versed in civil and criminal law, legal writing, and procedure and may concentrate on a particular area of law through the choice of legal electives. The legal skills acquired through this program enable graduates to assist attorneys in all phases of private and public law practice. Graduates of this program may serve as legals to attorneys in law firms, in corporate offices, and on the legal staffs of various government agencies. Paralegals do not exercise independent legal judgment and do not render legal advice or opinions, set fees, accept cases, or appear in court. They work under the supervision and direction of attorneys. Paralegal studies graduates become proficient in numerous areas, including document preparation, legal research and writing, civil procedure, case file maintenance, and law office management. Students completing this program are awarded both a bachelor of science degree and an ABA-approved legal certificate of completion. See also Legal Education Institute (LEI) information on page 28.

Paralegals may not provide legal services directly to the public except as permitted by law.

BS IN PROFESSIONAL AND APPLIED STUDIES

120 semester hours of credit required for degree

This program is open to any student holding an associate in applied science degree from a regionally accredited institution. Most students will receive 30 semester hours of advanced standing credit; students from approved technical programs will receive 45 semester hours.

The program is designed to enhance students' personal and professional skills through careful selection of courses within the professional development area, which may include a minor.

**Professional development courses must encompass a specific minor. Only six credits of transfer work may be used within the professional development courses/minor.

[†]Students who have been awarded advanced standing of 30 credits will take 24 credits of free electives. Those students who have 45 credits of advanced standing take 9 free elective credits. Students who do not have 12 credits of mathematics/science within their BLOC credit must take 12 credits of mathematics/science within the free electives.

Note: A minimum of 30 credits in addition to ASC 401 and UCS 400 must be taken at Widener.

BA IN PSYCHOLOGY

120 semester hours of credit required for degree

Psychology is the scientific study of human behavior. Students may choose this field out of personal interest, as preparation for graduate study, or as preparation for careers in mental health, counseling, corrections, human resource management, and so on. Courses in the related fields of anthropology, criminal justice, and sociology are recommended to psychology majors. The bachelor of arts degree is awarded upon successful completion of the curriculum. This degree permits selection of a minor.

**Students must earn a 'C' or better in all PSY courses.

***If a student takes PSY 211, PSY 230, or PSY 235, they cannot take the corresponding course that has the lab: PSY 331, 332, or 333.

†PSY 331, PSY 332, PSY 333 or PSY 334.

††Select courses from ANTH, APSU, BIOL, COMS, CJ, GWS, POLS, PRWR, SOC.

+Any courses except those in ACCT, BUS, BLAW, EC, FIN, MGT, MHR, MIS, MKT, OPM, QA, SBAH, or SMGT.

ASSOCIATE'S DEGREE PROGRAMS

The associate's degrees and their concentrations are associate in arts (liberal arts) and associate in science (allied health, general studies, legal studies, professional and applied studies, and radiologic technology). To fulfill degree requirements, students must successfully complete their last 15 semester hours of courses enrolled as Extended Learning students and have earned a grade-point average of at least 2.00 for all course work taken at Widener.

AS IN ALLIED HEALTH

61 semester hours of credit required for degree; 30 semester hours of credit taken in the Center for Extended Learning, after being awarded advanced standing

This associate in science degree program is designed for those who have graduated from approved hospital-based programs in any of the allied health professions.

WIDENER-CROZER ALLIED HEALTH PARTNERSHIP

Undergraduate Extended Learning at Widener and the Crozer-Chester Medical Center have partnered to offer the bachelor of science in allied health—diagnostic medical sonography degree and the associate of science in allied health—radiologic technology degree.

AS IN ALLIED HEALTH—RADIOLOGIC TECHNOLOGY

61–63 semester hours of credit required for degree

This program is designed to prepare students to become x-ray technicians. Upon successful completion, students are eligible to sit for the American Registry of Radiologic Technologists (ARRT) exam. The degree awarded is the associate in science in allied health—radiologic technology.

PROGRAM REQUIREMENTS

Prerequisite academic courses that are necessary for admission and degree program courses can be taken through the Center for Extended Learning in the evening or online. Following admission to the program, 24 months of radiologic technology courses and clinical training will be taken at Crozer–Chester Medical Center and its clinical affiliates. Students will receive Widener credit for all Crozer-Chester courses and clinicals and will be required to complete their degrees before sitting for the national registry board examinations.

ADMISSION REQUIREMENTS FOR THE RADIOLOGIC TECHNOLOGY PROGRAM

- Completion of a medical terminology course is recommended but not required
- 2.50 or higher GPA

ADDITIONAL PRECLINICAL REQUIREMENTS

- FBI fingerprint
- Background check
- Pennsylvania child abuse clearance
- Physical and drug clearance
- Interview with Crozer radiologic technology program director

AS IN GENERAL STUDIES

60 semester hours of credit required for degree

This associate in science degree program permits a student to structure an academic course of study, with the aid of an advisor, to meet individual needs and professional goals. While the student has the latitude to choose 18 of the 20 courses, assistance from the advisor should result in these selections being particularly meaningful.

AA IN LIBERAL ARTS

60 semester hours of credit required for degree

The liberal arts program is designed to provide broad interdisciplinary study in the liberal arts and sciences. The program affords a breadth of exposure to the major academic disciplines of the social sciences, humanities, and sciences while providing an opportunity to explore selected areas in depth. With the assistance of the academic advisor, a student can schedule a number of courses to meet specific interests and needs. The curriculum provides the foundation for continuing on into the bachelor's program in liberal studies. The degree awarded is associate in arts.

AS IN LEGAL STUDIES

60 semester hours of credit required for degree

This ABA-approved legal program focuses on legal research and writing, the mechanics of the civil litigation process and various specialized areas such as probate, litigation, real estate, criminal law, and technology. The program provides intensive specialty skills and broad liberal arts education for students who enter the legal profession. Students completing this program are awarded both an associate of science degree and an ABA-approved legal certificate of completion. Many associate students continue in the bachelor program at the Legal Education Institute. Paralegals do not exercise independent legal judgment and do not render legal advice or opinions, set fees, accept cases, or appear in court. They work under the supervision and direction of attorneys. See also Legal Education Institute (LEI) information on page 28.

AS IN RADIOLOGIC TECHNOLOGY

66 semester hours of credit required for degree; 15 semester hours taken in the Center for Extended Learning after being awarded advanced standing credit

Requirements for this degree consist of graduation from an approved hospital-based radiologic technology program (for which 51 semester hours of credit will be granted), certification by the American Registry of Radiologic Technologists (ARRT), and the successful completion of the courses listed below. Advanced standing and matriculation will be granted upon presentation of hospital transcripts and ARRT certification.

MINORS

The minors offered through the Center for Extended Learning include applied supervision, criminal justice, psychology, and sociology. These minors allow students in certain bachelor's degree programs to concentrate in an additional area of personal interest or professional development. To earn a minor, students must complete at least 15 credits in the minor at Widener University. Students interested in pursuing a minor should contact their academic advisors.

APPLIED SUPERVISION MINOR

22 semester hours of credit required

This program may be taken in addition to or in lieu of a degree program in Extended Learning by individuals who seek the skills required for entry-level supervisory positions. The program is designed to be practical and applications-oriented, addressing the theories and practice of human relations and supervision, the legal aspects of supervision, supervising staff, leadership skills, organizational psychology, and planning and organizing. In addition, three courses are designed to incorporate experiential learning activities that allow students to meet professional goals related to supervision. It is recommended that students interested only in the certificate have a minimum of 30 college credits and complete ENGL 101 prior to enrolling.

PRE-PROFESSIONAL PREPARATION

Students interested in:

- pre-law
- pre-physical therapy

should call the Center for Extended Learning at 610-499-4282 for an appointment with a pre-professional preparation advisor. Undergraduate Extended Learning offers many of the courses that prepare students for these fields.

PRE-PHYSICAL THERAPY 3+3 PROGRAM

This program is for students interested in the field of physical therapy and is designed to provide the academic background needed for admission in the Doctor of Physical Therapy (DPT) graduate program. Students in the program will earn both their bachelor's degree and their doctor's degree. Please contact the School of Human Service Professions at 610-499-4272 for more information.

PRE-LAW

The Association of American Law Schools has emphasized that no single major or individual group of courses provides a secret key to preparation for law school. Students should major in a field that is intellectually challenging and that will develop:

- Comprehension and expression in words.
- Critical understanding of the human institutions and values with which the law deals.
- Creative power and thinking.

Common majors for pre-law include liberal studies and management. To speak to an academic advisor about pre-law preparation, contact the Extended Learning Office at 610-499-4282.

LEGAL EDUCATION INSTITUTE

In a cooperative venture with the Delaware Law School, the Center for Extended Learning provides paraprofessional legal education to qualified full- and part-time students on the Delaware Campus. The institute's faculty are deeply committed to providing a rigorous program of legal education qualifying students for rewarding careers in law-related fields of endeavor. Full-time students earn their credits over four semesters of study. Part-time students earn their credits over six semesters and two summer sessions.

The Legal Education Institute offers its students a unique learning experience. Both the institute and Delaware Law, one of the nation's largest law schools, are integral parts of Widener University. This close affiliation affords students the benefits of the university's vast resources, including the opportunity to:

- Study and research in the same environment as law students and attorneys, with full access to Delaware Law's extensive law library.
- Practice newly acquired legal skills in one of Delaware Law's many clinical programs and advocacy classes.
- Observe numerous regional and national moot court and trial competitions.
- Attend lectures by noted practitioners in the legal community.

Most importantly, students at the Legal Education Institute receive exceptional classroom instruction. Experience and diversity characterize the backgrounds of the administration and faculty.

The legal studies certificate programs provide specialty instruction for students who have earned a college degree or who have accumulated at least 60 qualified college credits. Students must complete 24 required credits and may enroll in additional legal specialty electives.

The certificate programs can be completed in as little as two semesters. Applications are accepted year-round with start dates in August, January, and May. Individuals wanting more information should e-mail LEI@widener.edu.

LEI ACADEMIC GOALS AND OBJECTIVES

The primary goal of the Legal Education Institute (LEI) is the education of qualified individuals in the theory and philosophy of law and ethical responsibility under the supervision of attorneys.

Further, "[a] legal assistant or legal is a person, qualified by education, training, or work experience who is employed or retained by a lawyer, law office, corporation, governmental agency, or other entity and who performs specifically delegated substantive legal work for which a lawyer is responsible. (*Guidelines for the Approval of Paralegal Education Programs*, American Bar Association Standing Committee on Paralegals, Effective September 1, 2013, at page 3.)"

The overall LEI program goal is the education, training, and development of students thereby fostering an understanding and appreciation of the law, ethical responsibilities, and practical training to enhance their personal and professional ability to adapt and grow with changes in the legal environment.

LEI goals reflect the prevailing ethical and educational standards established by the American Bar Association: to enhance competent and effective delivery of legal services to all segments of society. It is important to note that legals may not provide legal services directly to the public except as permitted by law. Paralegals work under the direct supervision of attorneys.

LEGAL NURSE CONSULTANT CERTIFICATES

24 semester hours of credit required

A Widener legal nurse consultant (LNC) brings medical knowledge to the practice of law. Through a combination of online and seated lectures, practical instruction, and mentorship experiences students learn to evaluate, analyze, and consult on the medical aspects of legal issues. Students can explore issues relating to forensic science, toxic torts, product liability, and personal injury.

The goal of the ABA-approved LNC program is to provide maximum opportunity for registered nurses to be educated both in the classroom and in the diverse fields in which LNCs practice. Courses are taught by highly experienced professional attorneys and LNCs. Students who are accepted into the LNC program must hold a diploma or an associate's or bachelor's degree in nursing and a current RN license.

LEI Legal Nurse Consultant Program Objectives

- Provide the maximum opportunity for nurses to become educated in the theory, philosophy, and ethical appreciation of the law.
- Prepare students to become an integral part of the legal team.
- Foster an understanding and appreciation for the role of the legal nurse consultant that reflects the prevailing ethical and educational standards set forth by the legal profession.
- Provide students with deductive reasoning skills when preparing chronologies of medical events and organizing and reviewing medical records.
- Provide students with extensive instruction in legal research, including the use of electronic legal research databases.

LEGAL STUDIES CERTIFICATE

24 semester hours of credit required

This program provides specialty instruction for students already holding 60 college credits. The program focuses on legal research and writing, the mechanics of the civil litigation process, and various specialized areas of practice such as probate, litigation, and business organizations.

LEI Legal Program Objectives

- Provide opportunity for students to receive applicable training, practical skills, and necessary education to effectively contribute to the legal environment.
- Prepare students to become an integral part of the legal team.
- Enhance students' understanding of their ethical responsibility and role under the supervision of attorneys.
- Provide students with an understanding of the U.S. legal system and sources of law.
- Teach students active listening skills and effective written and oral communication skills.
- Provide students with extensive instruction in legal research and technology offerings, including the use of electronic legal research databases.

GENERAL LEGAL STUDIES CERTIFICATE

number	course name	sem. hours
<i>See course descriptions for required prerequisites and corequisites</i>		
LEI 101	Intro. to Law	3
LEI 102	Legal Research & Writing I	3
LEI 104	Legal Research & Writing II	3
LEI 201	Wills & Trusts	3
LEI 205	Civil Practice	3
LEI 206	Business Organizations	3
LEI 212	Ethics & Paralegalism	3
LEI 238	Computer Technology & the Law	3
TOTAL SEMESTER HOURS		24

Note: Students must take at least ten credits or the equivalent of legal specialty courses through traditional classroom instruction.

CONCENTRATIONS

Our legal certificate program has been expanded to provide students with the opportunity to specialize their education and prepare for exciting careers in the legal field. All legal certificates with concentrations have been approved by the American Bar Association.

LEGAL STUDIES CERTIFICATE WITH A CONCENTRATION IN CORPORATE LAW

24 semester hours of credit required

number	course name	sem. hours
<i>See course descriptions for required prerequisites and corequisites</i>		
LEI 101	Intro. to Law	3
LEI 102	Legal Research I	3
LEI 104	Legal Research II	3
LEI 106	Contract Law	3
LEI 205	Civil Practice	3
LEI 206	Business Organizations	3
LEI 212	Ethics & Paralegalism	3
LEI 240	Intellectual Property <i>or</i>	
LEI 208	Bankruptcy	3

Service learning courses are designated S.L.

ALLIED HEALTH (ALLH)

ALLH 100 INTRODUCTION TO THE HEALTH PROFESSIONS (3 S.H.)

Health and health care represent an increasingly varied set of professional fields. Individuals prepared in allied health can find themselves with careers in community clinics, research hospitals, pharmaceutical firms, insurance agencies, and advocacy groups (to name just a few). This entry-level course explores the diverse career options available to those with degrees in allied health.

ALLH 111 MEDICAL TERMINOLOGY (3 S.H.)

Allied health, like any other professional discipline, has its own specialized lexicon. Those in the various fields of allied health must understand this shared language not only to interact with other professionals but also to carry out career responsibilities. In this entry-level course, students learn and practice medical terminology—from anatomy and physiology to diagnostics and technology.

ALLH 205 INTRODUCTION TO PHARMACOLOGY (3 S.H.)

Students will analyze pharmacology; review the principles of pharmacokinetics and pharmacodynamics. The course will discuss how medications interact with and affect the human body. The development and business aspects of medications will be explored. Students will learn about theories that explain infections and the strategic use of antibiotics. This course will cover ethical issues related to pharmacology, including the opioid epidemic and how the profit of medications influence prescription practices. Consideration is given to the biological, psychological, sociological and environmental factors that influence pharmacology.

ALLH 218 NUTRITION IN HEALTH CARE (3 S.H.)

This course is designed to increase the student's knowledge about the scientific principles of human nutrition and how sound nutrition practices are related to achieving optimal health and wellness. The following aspects of dietary nutrients will be covered: physical and chemical properties, physiological functions, dietary allowances, energy balance, food labeling, food-borne illnesses, deficiency diseases, and availability of nutrients from various food sources.

ALLH 220 HEALTH CARE AND THE LAW (3 S.H.)

This course covers interrelationships of law and medicine. Topics include the legal organization of health care providers, status of the doctor-patient privilege, the patient's 'Bill of Rights,' analysis of a malpractice case, law of criminal insanity, restrictive covenants in employment contracts, and the definition of death. Emphasis will be placed on the developing national policies and practices relating to the delivery of health care. ALLH 220 may be used as a prerequisite for APSU 350 with written permission from the dean. ALLH 220 may only be taken by allied health majors. Students may not receive credit for both ALLH 220 and APSU 215. Prerequisites: ENGL 101 and 102.

ALLH 230 HEALTH AND WELLNESS FOR LIFE (3 S.H.)

Effective and efficient delivery of health care involves more than just expensive treatments for maladies. Preventive and maintenance care, particularly for illnesses related to lifestyle and aging, are emerging as an important avenue for allied health. Students in this course discover the interrelationships of health and wellness, with a focus on individualized care.

ALLH 310 UNDERSTANDING CANCER (3 S.H.)

Cancer—the very word can be frightening. No longer necessarily a death knell, a diagnosis of cancer can nonetheless create a minefield for patients, families, and providers. In this course, students discover some of cancer's underlying mechanisms, risk factors, and treatment options. This course emphasizes nuanced approaches for treating the cancer while respecting the person.

ALLH 330 INTRODUCTION TO NON-WESTERN MEDICINE (3 S.H.)

Too often, Westernized societies may forget that approaches to understanding, preventing, and managing the care of patients are filtered through one of many medical paradigms. Some paradigms reflect evolving knowledge in historical time; others, particularly from outside the West, offer alternative understandings of the body. This course explores a smattering of non-Western medical paradigms. 3 semester hours

ALLH 390 STATISTICS FOR ALLIED HEALTH PROFESSIONS (3 S.H.)

A primary objective of the course is to develop an understanding of statistical concepts and procedures sufficient for both conducting appropriate statistical analysis and interpretation of the results. Authentic research examples are used throughout the course as illustrations of the many different methods of conducting basic statistical analyses for the social sciences. As a result, this course enables students to become informed consumers of all forms of introductory level statistical analyses used in the allied health fields.

ALLH 409 ALLIED HEALTH PROJECT (3 S.H.)

This project gives senior-level students the opportunity to develop a substantial educational resource or conduct an educational research project related to the field. Prerequisites: ENGL 101 and 102 and permission of the allied health advisor.

ALLH 421 ISSUES IN ALLIED HEALTH CARE (3 S.H.)

The seminar involves an interdisciplinary approach to explore the issues and roles within allied health professions. Students have the opportunity to integrate their technical training, liberal arts background, and chosen specialty to their professional area. Topics covered include ethics, cost containment within the healthcare industry, professionalism, accountability, and health care delivery. Prerequisites: ENGL 101 and 102, completion of 90 credits, and approval of advisor.

ALLH 425 APPLIED EPIDEMIOLOGY AND POPULATION HEALTH (3 S.H.)

While health and health care are individualized partnerships of patients and providers, the societal level of disease patterns may be equally important. Consider the AIDS epidemic, the EBOLA crisis, and influenza outbreaks—caring for the individual cannot be separated from understanding the population. To that end, this course introduces students to epidemiological models of health and disease.

ALLH 444 INTRODUCTION TO GENETICS (3 S.H.)

This course will cover the fundamentals of classical and molecular genetics, including defining the gene and its structure. Students will also learn basic principles and research methods in the study of genetics. Students will explore the relationship between genetics and evolution, including the topics of recombination, mutation, selection, and population genetics.

ALLH 485 COMMUNITY HEALTH (3 S.H.)

With a focus on developing professionals to work in diverse healthcare environments, this course introduces students to the theoretical concepts related to community and public health. Students will explore the meaning of health in the context of the community as well as the research methods used to study community health issues. This course will present information on communicable and non-communicable diseases, environmental issues, and nutrition.

ALLIED HEALTH (ALLH)—DIAGNOSTIC MEDICAL SONOGRAPHY SPECIFIC COURSES

The following ALLH XXXC courses are open only to those students accepted into the Widener-Crozer Partnership program.

ALLH 270C INTRODUCTION TO ULTRASOUND (2 S.H.)

This is an online course that serves as a welcome to the Crozer-Keystone Health System, the policies of CKHS, and the ultrasound department. It will also serve as an introduction to the field of ultrasound by reviewing the basic concepts and ergonomics of the field. This course will equip the student with the basic scanning technique principles. Prerequisites: Acceptance into the DMS program.

ALLH 271C ABDOMEN I (3 S.H.)

This is a hybrid course of normal abdominal anatomy/cross-section, variants, embryology, and sonographic findings. Laboratory values and other related tests are also discussed. Prerequisites: Acceptance into the DMS program.

ALLH 272C SONOGRAPHIC PHYSICS AND INSTRUMENTATION (3 S.H.)

This is a hybrid course that presents general acoustic principles to include the physics of energy transfer through wave propagation, surface reflection processes, transducer construction, beam profile consideration and Doppler, A-mode, B-mode, M-mode and real-time instrumentation. In addition, the applied principles of instrumentation, knobology, and quality control are emphasized. It is designed as the first of two courses. Prerequisites: Acceptance into the DMS program.

ALLH 273C SCAN LAB I (3 S.H.)

This lab involves explanation and operations of equipment, ergonomics, scanning planes, and protocols for abdominal organs. The students scan each other as patients. The abdominal organs are taught in sections, starting with scanning of the sagittal liver, then transverse liver, gallbladder, aorta, pancreas, renal, bladder, spleen, superficial abdominal musculature, chest, and gastrointestinal tract. The required scanning tests will be completed, by the school faculty, in the scan lab. Once the students pass the test for sagittal liver, which is three to four weeks after the start of the program, they will be promoted from observe (O) to back scan (BS) status in clinical. Prerequisites: Acceptance into the DMS program.

ALLH 274C CLINICAL PRACTICUM I (2 S.H.)

This course encompasses clinical rotations throughout the Crozer-Keystone Health System and affiliates. Students put into practice the knowledge learned in the classroom. Students begin to scan each other during the scheduled scanning labs as well as “observing” and “backscanning” patients with the staff sonographers in the department. Students become accustomed to and contribute to the daily operations of the department. The

clinical staff will evaluate each student for his or her contribution to the department and patient-care skills. Prerequisites: Acceptance into the DMS program.

ALLH 275C ABDOMEN II (3 S.H.)

This is a hybrid course that encompasses abdominal pathology, sonographic findings, laboratory values, and other related tests. This course elaborates on the abdominal organs covered in Abdomen I. Prerequisites: ALLH 271C.

ALLH 276C OB/GYN I (3 S.H.)

This is a hybrid course that encompasses the non-pregnant, normal female pelvic anatomy/cross-section, including pediatric gynecologic sonography through menopause. The obstetrical portion of the course will encompass fertilization through the third trimester of a normal pregnancy. The scanning protocols and procedures are explained during the course. Prerequisites: Completion of semester I courses.

ALLH 277C SCAN LAB II (2 S.H.)

This lab involves applying information learned in Scan Lab I and working on performing a complete abdominal exam. Once students satisfactorily demonstrate that they can perform a complete abdomen, they are promoted from back scan (BS) to begin scan or scan (S) status in clinical for abdominal organs. At this point, the students are still under direct supervision for all procedures. Pelvic scanning is then taught, transvaginal being an option, if there are class volunteers. Thyroid, carotids, venous duplex for legs, and musculoskeletal are presented. If the class feels that the objectives are completed early, the students will be directed to report to clinical for the remainder of the scheduled hours. Prerequisites: ALLH 273C.

ALLH 278C CLINICAL PRACTICUM II (3 S.H.)

This course includes clinical rotations throughout the Crozer-Keystone Health System and its affiliates. Students are expected to scan patients under the direct supervision of the staff sonographer and to apply knowledge from the classroom and scan labs to the clinical setting. The required competencies and tests will demonstrate a progression of scanning abilities. The required competencies will be completed under the supervision of the designated, clinical preceptors and/or school faculty. The clinical staff will evaluate each student for his or her contribution to the department and patient-care skills. Prerequisites: ALLH 274C.

ALLH 300C OB/GYN II (3 S.H.)

This hybrid course encompasses abnormal gynecology and obstetrics. The gynecology portion of this course includes pediatric to menopausal sonography and the pathological processes that can occur at each stage. The obstetrical portion ranges from the first to the third trimester. Major structural and congenital abnormalities are discussed, as well as some major chromosomal abnormalities. Prerequisites: ALLH 276C.

ALLH 301C SMALL PARTS SONOGRAPHY (1.5 S.H.)

This course is a lecture presentation. Specific categories to be discussed include the thyroid gland, parathyroid gland, neck masses, breast, scrotum, prostate, and musculoskeletal. The course will include the normal physiology and anatomy as well as the most common pathological processes for each section. The sonographic appearance, protocols and scanning techniques are covered. Prerequisites: Completion of semester II courses.

ALLH 302C PEDIATRIC SONOGRAPHY (1.5 S.H.)

This course is a lecture presentation of normal anatomy, variants, embryology, and sonographic findings associated with neurosonography, pyloric stenosis, neonatal spine and neonatal hips. Other pertinent related tests are discussed. Prerequisites: ALLH 301C.

ALLH 303C VASCULAR I SONOGRAPHY (3 S.H.)

This is a hybrid course that encompasses anatomy of the cerebrovascular system, upper and lower extremity vasculature, vascular testing for these systems, pathophysiology and hemodynamics. This course also elaborates on technical terms associated with imaging of these systems and machine optimization. Prerequisites: Completion of semester II courses.

ALLH 304C CLINICAL PRACTICUM III (4 S.H.)

Students are introduced to additional clinical sites. These include Maternal Fetal Medicine and A.I. duPont Hospital for Children. Students are expected to broaden their knowledge and scanning capabilities. Students are expected to achieve “indirect” supervision for abdominal studies early in the semester and be evaluated for “indirect” scanning for transabdominal pelvis. “Indirect” scanning status can only be awarded after the entire didactic course content for a specialty area has been successfully completed. The students will be individually evaluated for this level of supervision change. The required competencies and testing will demonstrate progression of improved scanning capabilities. Minimal competency in OB scanning is required, according to the Clinical Practicum III syllabus. The required competencies will be completed under the supervision of the designated, clinical preceptors and/or school faculty. The clinical staff will evaluate each student for his or her contribution to the department and patient-care skills. Prerequisites: ALLH 278C.

ALLH 305C VASCULAR II SONOGRAPHY (2 S.H.)

This hybrid course encompasses the study of arterial and venous hemodynamics, arterial and venous testing, medical therapies, invasive tests, surgical therapies, non-surgical intervention, pathophysiology, test validation and statistics, and technical aspects of selected tests and case studies. Prerequisites: ALLH 303C.

ALLH 306C SEMINAR IN SONOGRAPHIC PHYSICS (1 S.H.)

This hybrid course encompasses the study of advanced ultrasound physical principles. It is designed as the second of two courses. Seniors gain a deeper understanding of the physical principles of diagnostic medical sonography at a level that is required for success at the nationally administered registry examinations in ultrasound and for entry level practice in the field. Prerequisites: ALLH 272C.

ALLH 307C CLINICAL PRACTICUM IV (5 S.H.)

Students are expected to be at the level of “indirect” supervision for abdominal and transabdominal pelvic exams to begin this course. Students are expected to demonstrate competency by adding the level of indirect supervision to further procedures. Scanning abilities should be broadened in all aspects of ultrasound. The required competencies and testing show progression of improved scanning abilities. The required competencies are completed under the supervision of the designated, clinical preceptors and/or school faculty. The clinical staff evaluates each student for his or her contribution to the department and patient-care skills. Refer to Clinical Practicum IV syllabus for further competency requirements. Prerequisites: ALLH 304C.

ALLH 308C CLINICAL PRACTICUM V (6 S.H.)

Students are expected to demonstrate competency in almost all aspects of diagnostic ultrasound. Students may request to rotate to a specialty area, as long as this does not negatively impact on the ability to complete required competencies. Approval of this request is at the discretion of the program director. The required competencies and testing show progression of improved scanning abilities. The required competencies will be completed under the supervision of the designated, clinical preceptors and/or school faculty. The clinical staff will evaluate each student for his or her contribution to the department and patient-care skills. Prerequisites: ALLH 307C.

ALLIED HEALTH (ALLH)—RADIOLOGIC TECHNOLOGY SPECIFIC COURSES

The following ALLH XXXC courses are open only to those students accepted into the Widener-Crozer Partnership program.

ALLH 101C INTRODUCTION TO RADIOLOGIC TECHNOLOGY (0.5 S.H.)

A course designed to give students a history of the radiology profession and its role in medicine. It will define the ethical and legal responsibilities assumed in becoming a member of the allied health profession. An introduction to medical and technical terminology, in addition to concepts of radiation protection, are presented. Rules and regulations governing the school are reviewed. Career options and continuing education in the diagnostic imaging sciences are also presented. Prerequisite: None.

ALLH 102C ANATOMY AND PHYSIOLOGY I (2 S.H.)

This course provides a detailed study of anatomical nomenclature, cells, cellular reproduction, tissues, and osseous (bony) anatomy and physiology. Emphasis is placed on bony anatomy with correlation to radiographic identification of bony anatomy. Corresponding medical terminology is presented. Prerequisite: General biology knowledge. Co-requisites: ALLH 104C, ALLH 110C.

ALLH 103C RADIOGRAPHIC EXPOSURE I (1 S.H.)

This course presents students with the fundamental information of exposure techniques necessary to produce quality radiographs. A detailed study of x-ray production, x-ray tube, primary/secondary radiation, tube rating, and cooling charts is presented. The structure and function of radiographic film, intensifying screens, grids, beam limiting devices, and basic concepts of digital radiography are discussed. Correlation to clinical practice is emphasized. Prerequisite: General algebra knowledge. Co-requisites: ALLH 102C, ALLH 104C, ALLH 110C.

ALLH 104C RADIOGRAPHIC PROCEDURES I (1 S.H.)

This course presents radiographic positioning and procedures of the chest, abdomen, upper and lower extremities and gastrointestinal system. Routine and supplemental positions are discussed with emphasis placed on routine projections performed in the radiology departments of CCMC and DCMH. Anatomy, as seen on radiographs, is also included, as well as a weekly lab demonstration. Prerequisite: None. Co-requisites: ALLH 102C, ALLH 103C, ALLH 110C.

ALLH 105C PROCEDURES I DEMO/LAB PRACTICE (1 S.H.)

Procedure I Demo/Lab Practice correlates with Radiographic Procedures I class. The clinical lab is performed in a radiographic room at CCMC. Students are given printed step-by-step instructions indicating the correct way to perform the procedure. Students are encouraged to take notes in their clinical books during the demonstration. Students perform simulation

practice on each other. Anatomy may also be reviewed at the end of the lab. Focus is placed on the upper and lower extremity, abdomen, chest, and contrast procedures. Prerequisite: None. Co-requisites: ALLH 102C, ALLH 103C, ALLH 110C.

ALLH 106C PATIENT CARE I (1 S.H.)

This course begins with a survey presentation of radiologic procedures. Hospital organization, professional societies, and the health care delivery system are explored. Medical terminology is presented. Attention is given to patient needs, including communication, empathy, evaluation, meeting physical needs, and cultural diversity. Legal, professional, and ethical responsibilities are discussed. Demonstrations on body mechanics, immobilization, infection control, and asepsis are presented. Fire safety, MSDS, and hospital regulations are presented. Prerequisite: None. Co-requisites: ALLH 110C.

ALLH 107C RADIATION PHYSICS I (1 S.H.)

This course gives students an understanding of the fundamentals in mathematics, measurements, and chemistry. Basic physical concepts of energy, matter, electricity, magnetism, electrostatics, electromagnetism, motors, and generators are studied for the understanding of the x-ray circuit. This course will advance to transformers, converters, high voltage generators and rectification. Prerequisite: General science and algebra knowledge. Co-requisite: None.

ALLH 110C CLINICAL I/FILM CRITIQUE I (5 S.H.)

This orientation course gives students an introductory view of the various functions and operations of the radiology department and the role they play in the hospital's health program. Students are assigned to areas of the department for observation of staff technologists and their duties. Students observe and assist in all routine procedures in the clinical area to meet specified clinical objectives. Students, under direct supervision, will begin the application of theories and procedures taught in Radiographic Procedures I. Prerequisite: None. Co-requisites: ALLH 102C, ALLH 103C, ALLH 104C, ALLH 106C, ALLH 107C.

ALLH 122C ANATOMY AND PHYSIOLOGY II (1 S.H.)

A detailed study of the anatomy and physiology of bodily systems is presented, including muscles, cardiovascular, respiratory, digestive, nervous, urinary, endocrine, and reproductive systems. Emphasis is placed on radiographic correlation. Corresponding medical terminology is presented. Prerequisites: ALLH 102C. Co-requisites: ALLH 128C, ALLH 130C.

ALLH 123C RADIOGRAPHIC EXPOSURE II (1 S.H.)

Developing on Radiographic Exposure I, this course presents a detailed study of the theory of radiographic technique and its practical application in radiography. The mathematics of technique conversion is presented. Additionally, the relationship of and factors influencing contrast, density, detail, and distortion are examined. Critical thinking and problem solving skills are utilized in the diagnosis and correction of technical errors. Prerequisites: ALLH 103C, ALLH 110C. Co-requisites: ALLH 130C.

ALLH 124C PROCEDURES II DEMO/LAB PRACTICE (1 S.H.)

Procedures II Demo/Lab Practice correlates with Radiographic Procedures II class. The clinical lab is performed at DCMH. Students are given printed step-by-step instructions indicating the correct way to perform the procedure. Students are encouraged to take notes in their clinical books during the demonstration. Students perform simulation practice on each other. Anatomy may also be reviewed at the end of lab. Focus is placed

on bony thorax, vertebral column, headwork, and additional supplemental views. Prerequisites: ALLH 102C, ALLH 103C, ALLH 104C, ALLH 110C. Co-requisites: ALLH 122C, ALLH 123C, ALLH 128C, ALLH 130C.

ALLH 127C RADIATION PHYSICS II (1 S.H.)

This course gives students an understanding of the fundamentals in mathematics, measurements, and chemistry. The second half of the course presents a detailed study of x-ray production and the interactions of x-radiation with matter. The other forms of ionizing radiation are discussed with a correlation to the use of radionuclides to radiation therapy and nuclear medicine. The x-ray circuitry is examined in detail. Problem solving skills are utilized in the determination of safe and unsafe radiographic exposures. Emphasis is placed in identification and prevention of equipment malfunction through technologist use. Prerequisites: General science and algebra knowledge. Co-requisite: None.

ALLH 128C RADIOGRAPHIC PROCEDURES II (1 S.H.)

This course is a continuation of Radiographic Procedures I. Projections include special chest views, bony thorax, vertebral column, and cranial radiography. Routine and supplemental positions are discussed with emphasis placed upon routine projections performed in the radiology departments of CCMC and DCMH. A radiographic anatomy review is included, as well as a weekly lab demonstration. Prerequisites: ALLH 104C, ALLH 110C. Co-requisites: ALLH 122C, ALLH 123C, ALLH 130C.

ALLH 130C CLINICAL II (5 S.H.)

An advanced progression of Clinical I, students move from the observatory to the participatory phase via active assistance to the staff technologist for all routine procedures in the department. Students begin applications of theories and procedures taught in Radiographic Procedures II and Radiographic Exposure II. Prerequisites: ALLH 104C, ALLH 110C. Co-requisites: ALLH 122C, ALLH 123C, ALLH 127C, ALLH 128C.

ALLH 206C PATIENT CARE II (2 S.H.)

This course provides students with the necessary skills to handle patients with special needs, including pediatric and geriatric patients, and medical equipment. Assessment and documentation of vital signs is presented. Assessing and responding to medical emergencies is presented in detail. Also discussed are pharmacology, medication administration, and contrast media uses and reactions. Venipuncture techniques are presented. Students are required to complete a research project. Prerequisite: ALLH 106C. Co-requisite: ALLH 221C.

ALLH 213C ADVANCED IMAGING (1 S.H.)

This course is a study of advanced radiographic imaging, including principles of tomography, stereoradiography, xeroradiography, fluorography, image intensification, computed tomography, mammography, and magnetic resonance imaging. Recording media, including video, cine, serial changers, and spot cameras are presented. Prerequisites: Completion of semesters I & II. Co-requisite: ALLH 221C.

ALLH 214C QA (QUALITY ASSURANCE) & IMAGE ACQUISITION (1 S.H.)

This course focuses on the general care of equipment, functional tests, causes, correction, and prevention of equipment breakdown. Radiographic quality control is emphasized, including processing control and tests for processing quality. JCAHO requirements, including repeat survey, LMP documentation, and other indicators, are presented and projects assigned. The chemistry of radiographic

film processing is covered. Manual and automatic processing methods are discussed in detail. Processing errors and film artifacts are explained and illustrated with radiographs. Instruction in the theory and maintenance of processing equipment is given, including processor systems, silver recovery, OSHA requirements, and personnel safety. Film composition is reviewed along with an understanding of image formation. Prerequisite: Completion of semester I & II. Co-requisite: ALLH 221C.

ALLH 215C INTRODUCTION TO CROSS-SECTIONAL ANATOMY (0.5 S.H.)

The basic anatomy as seen in cross section is introduced. This course is designed to enhance students' perception skills of cross-sectional images displayed in the axial, sagittal, and coronal orientations. Prerequisites: ALLH 102C, ALLH 122C. Co-requisites: ALLH 216C, ALLH 221C.

ALLH 216C PATHOLOGY (1 S.H.)

This course presents an overview of pathology as demonstrated on radiographs. Detailed emphasis is placed on critical thinking and problem solving skills involved in the alteration of technical factors and positioning techniques for patients who present with special needs associated with pathological processes. Prerequisites: Completion of semesters I & II. Co-requisite: ALLH 221C.

ALLH 217C PROCEDURES DEMO LAB (1 S.H.)

Routine and supplemental projections are covered in preparation for the senior scenario and trauma competency, which commence in the final semester. Focus is placed on headwork (routine and tabletop), review of headwork anatomy, along with any radiographs that may be used during radiography of the trauma patient. Prerequisites: ALLH 104C, ALLH 110C, ALLH 128C, ALLH 130C. Co-requisites: ALLH 213C, ALLH 214C, ALLH 215C, ALLH 216C, ALLH 221C.

ALLH 221C CLINICAL III/FILM CRITIQUE III (5 S.H.)

This course is a continuation of Clinical I and II at a more advanced level. Students are expected to progress toward independent performance (indirect supervision). Opportunities are offered in specialty and elective areas of interest. Prerequisite: Completion of semesters I & II.

ALLH 222C RADIATION PROTECTION (0.5 S.H.)

This course presents in detail the potential for biological damage caused by radiation. Radiation detection, quantities and units, in traditional and SI units and federal and state agencies are discussed. Dose limits for workers and patients, with emphasis on the ALARA principle are presented. Genetic and somatic effects of radiation along with practices, policies and procedures for insuring safe radiation limits are presented. Principles of Radiobiology, including radiation's effects in biologic systems are discussed. Historical, social and medical outcomes of radiation survivors are discussed. Prerequisite: Completion of semesters I & II. Co-requisite: ALLH 250C.

ALLH 225C RADIOBIOLOGY (0.5 S.H.)

This course reviews the effects of radiation at a molecular and cellular level, and chromosome damage. Discussion of early and late effects of radiation to various systems, fundamentals of physics, radiation biology, and the atom are included. Prerequisites: ALLH 213C, ALLH 216C, ALLH 222C. Co-requisites: ALLH 227C, ALLH 231C.

ALLH 227C SENIOR REGISTRY REVIEW (2 S.H.)

Used as preparation for the registry examination. Written mock registry exams are taken as well as monitored computerized

exams. Instructor review lectures/quizzes are included of various courses, along with a comprehensive review of Physics I & II, also known as Radiation Physics III. Prerequisites: ALLH 213C, ALLH 214C, ALLH 215C, ALLH 216C. Co-requisites: ALLH 222C, ALLH 225C, ALLH 231C, ALLH 235C.

ALLH 231C RADIOGRAPHIC IMAGE ANALYSIS (0.5 S.H.)

This course serves as the culmination of lessons learned as well as general radiographic review for the registry examination. Each student presents cases to the class offering routine projections, modification of routine, technical critique and positions best suited to demonstrate anatomy. Prerequisite: Completion of semesters I & II. Co-requisites: ALLH 225C, ALLH 227C, ALLH 250C.

ALLH 235C SPECIAL PROCEDURES (1 S.H.)

Special radiographic techniques of contrast media are studied. Emphasis is placed on basic examination of body systems including mammography, myelograms, hysterosalpingography/pelvimetry, arthrography, urography, venography, urography/biliary, angiography, specialized skeletal studies, ERCP, etc. Examinations are emphasized with regard to exposure, procedure, and clinical reason. Prerequisite: Completion of semesters I & II. Co-requisites: ALLH 222C, ALLH 250C.

ALLH 240C SENIOR COMPETENCY (1 S.H.)

Senior Final Competency is performed in the last semester of the program. Final competency testing is a reaffirmation of the student's competence. A list of protocols is distributed to the student. Final competency is made up of five components: Staff evaluations & log sheets, the average of two senior scenarios, to include critical thinking/problem solving skills, the average of a trauma test performed in the ED, and film critique of random cases presented in Radiographic Image Analysis class. Each component is worth 25 percent of the student's senior final competency grade. Prerequisite: All semester I, II, & III requirements. Co-requisite: ALLH 250C.

ALLH 250C CLINICAL IV (5.5 S.H.)

Students function under indirect supervision in clinical areas where competency has been recorded. Students build on theories and procedures learned. Students practice quality assurance theories learned in Semester III. Opportunities are given, at the request of the student, for additional specialty or elective rotations. Reaffirmation of the student's competency is assured through the final competency procedure. Prerequisite: Completion of semesters I, II, & III. Co-requisites: ALLH 222C, ALLH 225C, ALLH 227C, ALLH 231C, ALLH 235C.

ANTHROPOLOGY (ANTH)

ANTH 105 CULTURAL ANTHROPOLOGY (3 S.H.)

This course acquaints students with how anthropologists use a cross-cultural approach to understanding shared human perceptions and behaviors, and teaches anthropological research techniques of ethnography and corporate culture analysis. Why are cultures different? This course looks at similarities and differences among world's cultures in terms of technological levels, social organization, and ideology. Topics include symbolism, language, sex roles, economic systems, kinship, political systems, religion, warfare, and cultural change. Students get to explore local culture through experiential projects outside the classroom. No prerequisite.

ANTH 255 RACE AND RACISM (3 S.H.)

As social scientists assert, race matters. What is race? How does race play a role in American society? This course explores race from all of its dimensions: biology, culture, language, and cultural evolution. In addition to investigating the evolutionary factors that give rise to physical human variation some use to define race, this course addresses the processes that gave rise to social inequality. Students use an anthropological approach to trace the formation of the current U.S. racial hierarchy from the colonial era to the present and examine the shifting character of racial discrimination across time and space. No prerequisite.

APPLIED SUPERVISION (APSU)

APSU 210 INTRODUCTION TO APPLIED SUPERVISION (3 S.H.)

An introduction to human relations and supervision. Topics include organizational culture, change in the workplace, leadership and leadership styles, ethics, effective communication skills, setting goals, and group dynamics. This course also introduces students to the learning journal, experiential education, portfolio development, and program requirements. Prerequisites: ENG 101; completion of 30 credits of college course work is also recommended.

APSU 215 LEGAL ASPECTS OF SUPERVISION (3 S.H.)

This course reviews the legal aspects of human relations in a work environment. Topics include legal issues related to the selection of personnel, staff evaluation, promotion, and discipline, and the terminology associated with legal issues in a work environment. A learning journal is required. Students may not receive credit for both ALLH 220 and APSU 215. Prerequisite: APSU 210.

APSU 350 EFFECTIVE PLANNING AND ORGANIZING (3 S.H.)

First-line supervisors need the ability to foster flexibility in an evolving work environment. Topics include time management, task delegation, development and implementation of departmental goals, and effective communication. A learning journal is required. Prerequisites: APSU 215, PSY 204, declaration of minor.

APSU 355 SUPERVISING STAFF (3 S.H.)

Teamwork, understanding group dynamics, and conflict-resolution skills are important components of supervising and motivating staff. Topics include team-building skills, motivating and empowering staff, providing consistent and objective performance evaluation, as well as legal issues related to staff evaluation, discipline, and termination. A learning journal is required. Prerequisite: APSU 350.

APSU 360 EFFECTIVE LEADERSHIP SKILLS (3 S.H.)

Leadership types and styles are discussed as they relate to the need for a supervisor to identify and develop his or her own leadership style. Topics include leadership style inventory, coaching and mentoring staff, effective verbal and written communication skills, productivity, leadership vs. management roles, and ethics in the workplace. A learning journal is required. Prerequisite: APSU 350.

APSU 375 MANAGING TECHNOLOGY ORGANIZATIONS (3 S.H.)

This course introduces students to the ways in which management principles are applied in the kinds of work they are most

likely to encounter in a technology environment. The course traces the historical development of engineering and technology management. Students learn the basic functions of management and have the opportunity to learn the application to organizational activities such as research, engineering, design, production planning, production operations, and technical marketing and service activities. Prerequisites: APSU 210, 215, and 350.

APSU 450 SEMINAR IN APPLIED SUPERVISION (4 S.H.)

Intended as an opportunity for students to synthesize their previous course work and experiential education, APSU 450 features discussions of the current issues in supervision. It is an opportunity for students to research an area of supervision relevant to their professional goals. Prerequisites: All APSU lower courses.

ART HISTORY (AH)

AH 101 ART HISTORY I (3 S.H.)

A survey of the major visual arts—architecture, sculpture, painting—from prehistoric times to the Renaissance. No prerequisites.

AH 102 ART HISTORY II (3 S.H.)

A survey of the major visual arts—architecture, sculpture, painting—encompassing the period from the Renaissance to contemporary times. No prerequisites.

ARTS AND SCIENCES (ASC)

ASC 401 VALUES SEMINAR IN EXTENDED LEARNING (3 S.H.) (W)

This upper-level interdisciplinary course involves a discussion of values that affect individual and societal decision making. Completion of a paper is a major component of the course. Prerequisites: Completion of six credits in each of the three areas (science, humanities, and social sciences) and the attainment of at least 90 credits. (This course does not meet distribution requirements without approval of the dean.)

ASC 409 SENIOR PROJECT (3 S.H.) (W)

This is a preparation for the research project required for students enrolled in the liberal studies baccalaureate program. Projects are interdisciplinary. Guidelines can be obtained from the academic advisor. Prerequisite: Completion of 90 semester hours.

ASTRONOMY (ASTR)

ASTR 100 INTRODUCTION TO ASTRONOMY (FORMERLY ESSC 108) (3 S.H.)

This course is designed for nonscience majors. The course provides an overview of the whole universe. Astronomy topics include understanding the planets, the Sun, stars and stellar evolution, the Milky Way, galaxies, and cosmology. The history of astronomy, telescopes, and the nature of light and gravity are also covered. Students are expected to have basic math and calculator skills. Evening observation sessions using the Widener Observatory are a required part of the course. No prerequisites. 3 hours lecture. 1 hour observing.

ASTR 110 ASTRONOMY LABORATORY(1 S.H.)

This laboratory course is designed to complement ASTR 108. Lab exercises include identifying moon features, optics, understanding star properties, spectral analysis, classification of galaxies, etc. The laboratories are mostly pen and paper exercises to

be completed in class. This course fulfills the general education science laboratory requirement. Corequisite: ASTR 108. 2 hours laboratory.

BIOLOGY (BIOL)

BIOL 100 PRINCIPLES OF BIOLOGICAL SYSTEMS LECTURE (3 S.H.)

This introductory course focuses on the established fundamental principles common to all known forms of life. Topics include the origin of life forms (abiogenesis) on this planet and the evolution and operation (metabolism and self-perpetuation) of such life forms at various levels of biological organization. Comprehension of the principles, including “complementarity between structure and function,” is emphasized throughout. Three class hours. Students may not receive credit for both this course and BIOL 101.

BIOL 101 PRINCIPLES OF BIOLOGICAL SYSTEMS (4 S.H.)

This introductory course focuses on the established fundamental principles common to all known forms of life. Topics include the origin of life forms (abiogenesis) on this planet and the evolution and operation (metabolism and self-perpetuation) of such life forms at various levels of biological organization. Comprehension of the principles, including “complementarity between structure and function,” is emphasized throughout. The course is designed as a science elective for business, humanities, and social science students. Three class hours; three laboratory hours. Students may not receive credit for both this course and BIOL 100.

BIOL 107 BIOLOGY AND SOCIETY: BIOLOGY FOR AN ENGAGED CITIZENRY (4 S.H.) (W)

This writing enriched course for nonscience majors is designed to fulfill the lab science distribution requirements. The goals of the class are to empower students (our future citizenry) to make informed decisions by helping them acquire the tools of gathering information (research), decision making, and persuasion. The class is centered on four topics: evolution, environmental pollution, biotechnology, and human populations and reproductive health. We encourage students to become engaged in issues regarding all four topics by assigning “action papers.” These are letters written by students and sent to people in profit and non-profit organizations and government agencies, politicians, or any one in a position to take action on these matters. The letters request information, prompt certain actions, or express an opinion regarding a specific policy based on sound understanding of the science involved. Small inquiry groups conduct web-based research on these topics and present their findings in oral presentations/discussions to the class community. Each inquiry group and individual student writes a paper on each of the four topics. Course assessment is based on these assignments. Three class hours; three laboratory hours.

BIOL 113 EVOLUTION (3 S.H.)

This course is designed for nonscience majors interested in understanding the theory of evolution. An understanding of evolution requires knowledge of the scientific process, how hypotheses are formulated, and the definition of scientific theory. These topics are covered at the beginning of the course. Other topics include a discussion of the origin of life on earth, biographical information about Charles Darwin and discussion of his books *The Voyage of the Beagle* and *On the Origin of Species*,

the evidence supporting the theory of evolution, basic concepts in genetics, and a comparison between artificial and natural selection. The course concludes with a discussion of evolutionary developmental biology and human evolution. This course fulfills the science distribution requirement. Prerequisite: None.

BIOL 115 HUMAN NUTRITION (3 S.H.)

An introduction to the science of nutrition. Human nutrient requirements, nutrient absorption, malnutrition (overconsumption as well as underconsumption), recommended dietary guidelines, and topics of current interest are covered. Special attention is paid to helping students evaluate their own nutrition practices. Designed as a science elective for nonscience majors. Three hours lecture.

CHEMISTRY (CHEM)

CHEM 100 CHEMISTRY AND EVERYDAY LIFE (3 S.H.)

This course introduces chemical concepts and how they impact human beings in their daily activities. The intent is to develop an appreciation for the molecular world and the fundamental role it plays in daily life and to develop an understanding of the major scientific and technological issues affecting our society. The course examines matter, atomic theory, bonding, molecular structure, acids and bases, states of matter and organic chemistry. Other topics include the role that chemistry plays in energy production, especially from fossil fuels and alternative fuel sources, and in the structure and properties of polymers and plastics including recycling issues. The course is designed as a science elective for business, humanities, and social science majors. Students may not receive credit for both CHEM 100 and SCI 107. Prerequisite: MATH 101 or satisfactory performance on the Mathematics Placement Test. CHEM 111 is a laboratory course designed to accompany this course, but students are not required to take both the lecture and the laboratory course.

CHEM 101 INTRODUCTION TO CHEMISTRY I (3 S.H.)

This course is designed for students who are in a nonscience pre-physical therapy major and students who do not intend to major in science or engineering. The various principles of chemical behavior are discussed and correlated with other sciences. Topics include bonding, structure, reactivity, stoichiometry, gas laws, solutions, solubility, equilibrium, energy relationships, periodic table, an introduction to organic chemistry, and hydrocarbons. CHEM 101 must be taken concurrently with CHEM 103. 3 hours lecture. 1 hour recitation. 3 semester hours

CHEM 103 INTRODUCTION TO CHEMISTRY LABORATORY I (1 S.H.)

This laboratory course is closely coordinated with CHEM 101 and serves to illustrate the principles examined in that course. Qualitative and quantitative experiments involving primarily inorganic systems are carried out. CHEM 103 must be taken concurrently with CHEM 101.

COMMUNICATION STUDIES (COMS)

COMS 130 MEDIA AND SOCIETY (3 S.H.)

This course examines the historical evolution and present day structure and composition of the mass media and its related industries. It also briefly examines the impact of mass media on individuals and society and introduces students to mass communication research.

COMS 180 PUBLIC SPEAKING & PRESENTATION (3 S.H.)

The course provides students with the skills needed to deliver compelling speeches and presentations. Students will learn to communicate information powerfully for both small groups and large audiences.

COMS 275 INTRODUCTION TO PUBLIC RELATIONS (3 S.H.)

This course introduces the field of public relations, its functions, and its various applications. It examines basic concepts and principles of public relations and the history of the field. The basic public relations process—research, planning, execution, and evaluation is applied to a course project.

COMS 290 INTERPERSONAL COMMUNICATIONS (3 S.H.)

This course introduces students to principles of interpersonal communication. The course examines basic verbal and nonverbal elements that affect communication between individuals in a variety of interpersonal and small group contexts: friendship, romantic relationships, marriage, the family, the social peer group, and the work group.

COMS 390 ORGANIZATIONAL COMMUNICATION (3 S.H.)

This course introduces students to the field of organizational communications and its practices in both nonprofit and business organizations. The course is both theoretical and practical in nature. Students are expected to learn the basic understandings upon which communication in organizations is founded and the skills to effectively identify and communicate with audiences within and outside of organizations. Students are also exposed to organizational problems and communication solutions within those organizations.

CRIMINAL JUSTICE (CJ)

CJ 105 INTRODUCTION TO CRIMINAL JUSTICE (3 S.H.)

A general introduction to the study of the American system of criminal justice. The crime problem, the police, the judicial system, and correctional agencies are examined. Both the legal and behavioral realities of each stage of the criminal justice process are discussed and analyzed.

CJ 205 LAW ENFORCEMENT (3 S.H.)

An introduction to a range of historical, political, and sociological problems in institutions vested with the responsibility to enforce laws and preserve order. Emphasis is also placed on the study of the relationship between police and the communities in which they serve. Prerequisite: CJ 105.

CJ 210 CRIMINAL COURTS (3 S.H.)

An analysis of judicial decision making with an emphasis on the structure and performance of American trial and appellate courts. In addition to reviewing the basic legal concepts that underlie the criminal courts, students examine research findings on the behavior of judges, juries, prosecutors, defense attorneys, defendants, and other key actors in the judicial process. Prerequisite: CJ 105.

CJ 215 THE CORRECTIONAL SYSTEM (3 S.H.)

A general overview of the U.S. corrections system and a survey of today's most important correctional problems. Emphasis is placed upon the nature of the prison experience, alternatives to incarceration, judicial intervention in correctional affairs, and the controversy concerning the effectiveness of rehabilitation programs. Prerequisite: CJ 105.

CJ 225 PRINCIPLES OF CRIMINAL INVESTIGATION (3 S.H.)

This course is an introduction to the fundamentals of the criminal investigation process. It provides students with an understanding of the investigative process, beginning with the detection of a crime and culminating with the presentation of the case in court. In addition to the basic investigative processes, students examine crime scene searches, including the proper procedures for recording, collecting, and preserving evidence. Students also identify the elements of crime, as defined in applicable state law, and incorporate the rules of evidence and criminal procedure as appropriate. Prerequisite: CJ 105.

CJ 230 DOMESTIC VIOLENCE AND THE JUSTICE SYSTEM (3 S.H.) (SAME AS GWS 230)

The main objective of the course is to introduce students to the subject of family violence, especially as it relates to the legal system in the United States. This will be accomplished by exploring (1) the historical roots of domestic violence, (2) social science theoretical perspectives, (3) the roles and the players, (4) the typical criminal prohibitions, (5) the experiences of victims who seek help from the court, religious, and medical authorities, and (6) efforts at developing prevention and intervention strategies. In addition, the course will seek to develop skills in students to find and evaluate information on family violence, especially as it is found in sociological sources and court records.

CJ 235 RACE/ETHNICITY, CLASS, CRIME, AND JUSTICE (3 S.H.)

This course focuses on how various dimensions of social stratification influence the nature and types of crimes committed, responses of the criminal justice system to such crime, and strategies for reform. With a primary emphasis on gender, race and class, students study not only the effects of stratifying factors on socialization, but also how such socialization processes relate to crime and society's reaction to criminal deviance. Prerequisite: CJ 105.

CJ 240 DOMESTIC TERRORISM (3 S.H.)

This course explores domestic terrorism, or terrorism committed by Americans on American soil. Students study the history and case studies of domestic terrorism, such as the Oklahoma City bombing, eco-terrorists, the Unabomber crime spree, the DC Snipers, and political assassinations. This course also focuses on hate groups and militias (nearly 1,000 hate groups are active in the United States). Students examine the U.S. governmental responses to cults, hate groups, and militias, including law enforcement and state-sponsored violence. Students learn the organizational structure and philosophies behind domestic terrorism events and how to interpret terrorist acts from various theoretical perspectives. Prerequisite: CJ 105

CJ 245 WOMEN AND CRIMINAL JUSTICE (SAME AS GWS 245) (3 S.H.)

This course explores theoretical and empirical research that relates to gender and criminal justice. The course is divided into three sections: women as offenders, women as victims, and women as criminal justice practitioners. Emphasis is placed on the intersection of victimization and offending for women and girls. Topics include the nature and pattern of criminal offending by women and girls, their treatment by the criminal justice system, and how their gender may influence their punishment. The course also addresses the experiences of women as survivors of domestic violence, sexual abuse, and sexual harassment.

Additional topics include women's experiences as law enforcement officers, attorneys, judges, and correctional officers.

CJ 255 GANGS IN AMERICA (3 S.H.)

This course covers important issues surrounding the study of gangs in America. In particular are discussions of the definition of "gangs," the nature and extent of the gang problem in the United States, theoretical explanations for gang activity, and gang policies. The course is designed to help students gain an understanding of gang activity in the United States, and to think critically about ways to address this problem. No prerequisites.

CJ 267 MEDIA, CRIME, & CRIMINAL JUSTICE (3 S.H.)

This course provides an introduction to the study of the influence of the mass media, especially film and television, on public perceptions of crime and the effectiveness of the criminal justice system in contemporary America. Drawing on communications theory; the accuracy of media depictions of crime, criminals, and the operations of criminal justice; and the part played by media imagery in the cause or prevention of criminal behavior are subject to critical analysis. The role of the mass media in the construction of a collective image of crime and justice that is sharply at odds with real trends is explored to highlight the growing potential for conflict between public demand for crime control and the requirements of due process and the preservation of civil rights and personal freedom. Prerequisite: CJ 105 or COMS 130 or instructor's permission.

CJ 285 ORGANIZED CRIME (3 S.H.)

This course addresses that branch of criminality commonly known as "organized crime." Discussions focus on a more precise understanding of the term itself, as well as on the various forms this type of criminal deviance has taken. There is also an analysis of the impact of notorious criminals whose exploits have shaped organized crime throughout the 20th century.

CJ 305 CRIMINAL EVIDENCE (3 S.H.)

Using the Federal Rules of Evidence, students explore the authentication, reliability, and credibility of evidence through lecture, role playing, and discussion. Students will learn, for example, why certain types of evidence are not permitted in courtrooms. Students gain insight into investigation and research techniques that exemplify establishing a credible basis for prosecution, defense, or presentation of academic or scientific argument.

CJ 315 JUVENILE JUSTICE SYSTEMS(3 S.H.)

This course provides an overview of the phenomenon of juvenile delinquency and the system designed to handle this form of social deviance. Topics to be covered include discussions of theoretical explanations of delinquency, the evolution of the concept of juvenile justice, and the system's response to the problems of child abuse, status offenders, delinquent youth gangs, and trends in juvenile crime. Prerequisite: CJ 105.

CJ 320 WHITE COLLAR CRIME (3 S.H.)

This course examines various forms of white collar crime, including corporate, occupational, and governmental crimes. Case studies illustrate the features of many of the different offenses that are included under the term "white collar crime," including consumer frauds, embezzlement, bribery, and insider trading. An introduction to some of the legal issues involved in the investigation and prosecution of white collar crime will be provided. The course will also review some of the theoretical explanations for this form of criminality and will consider the

challenges associated with the enforcement of relevant laws, the investigation and prosecution of such offenses, and the sentencing of white collar offenders.

CJ 325 CRIMINAL LAW AND PROCEDURE (3 S.H.)

This course addresses the phenomenon of criminal law and the procedures involved in the criminal justice system. Topics include the legal presumptions of innocence and individual culpability, rules of evidence, legal representation, and sentencing/punishment. The course also addresses Constitutional guidelines governing the procedures of arrest, adjudication, and appeal. Prerequisite: CJ 105.

CJ 330 CAPITAL PUNISHMENT (3 S.H.)

This course is a comprehensive study of the practice of capital punishment in America. Historical, philosophical, legal, and criminological sources are used to explore what is arguably one of the most controversial issues facing criminal justice today. Through various written assignments, students are encouraged to develop an understanding of capital punishment that is based on fact, rather than emotion, and one that recognizes the complex interplay of legal and moral issues at the heart of the public debate on this punishment practice.

CJ 335 COMMUNITY-BASED YOUTH DEVELOPMENT INTERVENTION STRATEGIES AND PRACTICES: INTEGRATING CRIMINAL JUSTICE AND PSYCHOLOGICAL APPROACHES (SAME AS PSY 335) (6 S.H.)

This is an interdisciplinary criminal justice and psychology year-long course on community intervention strategies and practices for at-risk youth. Theories and research that explain problem behaviors (i.e., mental health, substance abuse, delinquency) are reviewed, focusing on both the macro-structural factors emphasized in criminology and the micro-level perspective emphasized in psychology. Current intervention and prevention programs are examined and combined with field experience to train students in the principles of civic engagement, as well as in the mentoring and treatment of at-risk youth. Open to criminal justice or psychology majors with junior standing or above, or with instructor's permission.

CJ 345 CRITICAL ISSUES IN CRIMINAL JUSTICE (3 S.H.)

Selected issues confronting the criminal justice system and society in the United States are examined through assigned readings, discussion, visiting speakers, and research papers or projects.

CJ 346 ISSUES IN POLICING (3 S.H.)

This course focuses on the challenges presented by policing in modern communities. Focusing on the "practical" side of policing, topics include the impact of selection, training, and professional socialization on community law enforcement, as well as the effects of discretion, racial diversity, and urban crime.

CJ 380 CRIMINAL JUSTICE RESEARCH AND ANALYSIS (4 S.H.)

This course is designed to help students understand the many ways in which academics study crime and conduct research in the criminal justice field. The major goal of this course is to develop a research proposal on a topic of the student's choice and to apply the appropriate statistical analyses for the research question. Topics include problem formation, research designs, research ethics, sampling issues, data sources, and data analysis. This course includes lab exercises for application of the material learned.

CJ 405 ETHICS IN CRIMINAL JUSTICE (3 S.H.) (W)

This senior-level, writing enriched course addresses various aspects and approaches to the practice and study of ethics in the criminal justice system. Topics include philosophical approaches to crime, justice, and punishment, as well as practical ethics for

those who work in the system. After studying the concepts of ethical justice, students apply ethical principles to law, law enforcement, and corrections. Required for all seniors in the major.

CJ 409, 410 SENIOR RESEARCH (3 S.H. EACH COURSE)
Research in an area of special interest. Required of all majors in criminal justice.

CJ 423 CRIMINAL JUSTICE INTERNSHIP (6 S.H.)
Subject-related work experience. The setting must be approved by the faculty. Required of all criminal justice majors in the senior year. Others are not eligible.

CJ 499 INDEPENDENT STUDY (3 S.H.)
Individual study for specially qualified advanced students. Requires permission of criminal justice faculty member.

EARTH AND SPACE SCIENCE (ESSC)

ESSC 103 PLANET EARTH (3 S.H.)
A course designed to expand one's awareness of science in general with particular emphasis on the geosciences. The principal topics include the study of Earth, its oceans, resources, and climate; Earth as compared to other planets in our solar system; and the fate of Planet Earth. This course is for nonscience majors. Corequisite: ESSC 113.

ESSC 109 INTRODUCTION TO WEATHER AND CLIMATE (SAME AS PHYS 109) (3 S.H.)
This course provides a descriptive survey of weather and climate for nonscience majors. Subjects include composition and structure of the atmosphere, solar and terrestrial radiation, temperature, atmospheric stability, forms of condensation and precipitation, pressure and wind systems, severe weather (thunderstorms, tornadoes, and hurricanes), weather analysis and forecasting methods, air pollution, the changing climate, world climates, and optical phenomena in the atmosphere. The laboratory component, ESSC 119, is a separate course. Credit will not be granted for both this course and ENVR/PHYS 209 Meteorology. Three hours lecture. No prerequisites.

ESSC 113 PLANET EARTH LABORATORY (1 S.H.)
Laboratory associated with ESSC 103. Selected laboratory and field exercises related to corresponding text topics on Planet Earth. Corequisite: ESSC 103.

ESSC 119 WEATHER AND CLIMATE LABORATORY (SAME AS PHYS 119) (1 S.H.)
This laboratory course accompanies ESSC 109. Students engage in exercises that involve analyses of daily weather cycles, employing instruments to determine atmospheric temperature and humidity, learning about the forms of condensation and precipitation, studies of global pressure and wind systems, analyses of surface and upper-air weather maps, understanding the nature of air pollution, and classification of world climates. This course fulfills the College of Arts and Sciences science laboratory requirement. Two hours laboratory. Corequisite: ESSC 109.

ECONOMICS (EC)

(Students weak in mathematical skills should enroll in MATH 101 prior to registering for EC 101 or 202.)

EC 101 PRINCIPLES OF MACROECONOMICS (3 S.H.)
An introductory study of the determinants of the aggregate level of economic activity in a global economy. Attention focuses on the demand for output by households (consumption), businesses

(investment), government, and trade with the rest of the world (net exports), as well as the roles played by fiscal and monetary policies. In addition, interest centers on the problems of inflation, unemployment, federal budget deficits, and stimulating economic growth. Topics covered include measuring the levels of output and income, Keynesian and classical models of aggregate demand and supply, the banking system and money creation, impacts of government fiscal and monetary policies, inflationary processes and models of inflation, unemployment-inflation tradeoff controversies, public debt burdens, international trade policies, and determinants of economic growth. This course may be used to satisfy the social science general education distribution requirement. Prerequisite: 30 semester hours.

EC 202 PRINCIPLES OF MICROECONOMICS (FORMERLY EC 102) (3 S.H.)

An introductory study of the operations of output (product) and input (resource) markets as they relate to demand and supply decisions by households, businesses, government, and the rest of the world (foreign trade patterns). Attention centers on the role of prices in allocating scarce resources among competing users, as well as on imperfections in and failures of markets to effectively allocate such resources. Among the topics covered are an introduction to economizing problems and issues, market systems and demand and supply analysis, consumer behavior and product demand, production functions and costs, output pricing under various market structures, input pricing under various market structures with special emphasis on labor markets, and demand and supply determinants of international trade patterns. This course may be used to satisfy the social science general education distribution requirement. Prerequisite: 30 semester hours.

ENGLISH (ENGL)

ENGL 101 READING, THINKING, AND WRITING (3 S.H.)
Success in college calls for curiosity, engagement, and a willingness to be challenged, as well as having a strong foundation in reading, writing, and thinking. First-year students at Widener begin their college career with ENGL 101, a course designed to prepare undergraduates for serious academic inquiry, full participation in the intellectual life and mission of the university, and sustained self-directed learning throughout the curriculum. Students have the opportunity to select a section of ENGL 101 focused on a particular theme or topic. Through a variety of challenging reading and writing assignments engaging with the topic of choice (including a common reading), students become more careful and discerning readers. They will express insights and craft sustained arguments supported by carefully chosen evidence from primary and secondary material, and they will strengthen their ability to ask questions, evaluate, and synthesize complex information and draw conclusions.

ENGL 102 LITERATURE AND CRITICAL WRITING (3 S.H.) (W)

Students are introduced to the principal literary genres of fiction, drama, and poetry as a means of stimulating critical thinking and further developing skills in writing and analysis. This course contributes towards satisfying the humanities distribution requirement. All sections are writing enriched. Prerequisite: ENGL 101 or equivalent.

ENGL 131 LITERATURE OF THE WESTERN WORLD I (3 S.H.)
A critical and historical survey of the significant works in Western literature from the ancient world through the

Renaissance. Authors and works may include the Bible, Homer, Sophocles, Sappho, Ovid, Marie de France, Dante, Milton, and others. No prerequisite.

ENGL 132 LITERATURE OF THE WESTERN WORLD II (3 S.H.)
A critical and historical survey of the significant works in Western literature from the early modern period to the present day. Authors may include Voltaire, Dostoevsky, Dickinson, Duras, Achebe, and others. No prerequisite.

ENGL 133 BRITISH LITERATURE I (FORMERLY ENGLISH LITERATURE I) (3 S.H.)
A critical and historical survey of the significant works in British literature from the medieval period to the early modern period. Authors and works may include *Beowulf*, Chaucer, Shakespeare, Donne, Wroth, Milton, Behn, and others. No prerequisite.

ENGL 134 BRITISH LITERATURE II (FORMERLY ENGLISH LITERATURE II) (3 S.H.)
A critical and historical survey of the significant works in British literature from the early modern period to the present day. Authors may include Blake, Austen, Tennyson, Joyce, Woolf, Lessing, and others. No prerequisite.

ENGL 145 WORLD LITERATURE (FORMERLY ENGL 130) (3 S.H.)
A study in literary traditions ranging from China, India, Japan, African nations, and other cultures. The course investigates connections between Eastern and Western writers. Works studied include those by Li Po, Basho, Roy, Achebe, Dangarembga, Rumi, Aidoo, Desai, and others.

ENGL 156 INTRODUCTION TO FICTION WRITING (3 S.H.)
This course introduces the beginning fiction writer to the technical aspects of the short story: setting, character, dialogue, point of view and plot. In addition, each class emphasizes the aesthetic dimensions of language. Not open to students who have completed ENGL 306.

ENGL 157 INTRODUCTION TO POETRY WRITING (3 S.H.)
This course introduces the beginning poet both to the aesthetic and qualitative dimension of poetry writing and to the technical and quantitative considerations: meter, forms, rhyme, image, simile, metaphor, and symbol. Not open to students who have completed ENGL 307.

ENVIRONMENTAL SCIENCE (ENVR)

ENVR 100 INTRODUCTION TO ENVIRONMENTAL SCIENCE (3 S.H.)
This course is designed for nonscience majors who are interested in the environment and environmental issues. Topics include an overview of humans and nature (environmental problems and their causes), principles and concepts (matter and energy, ecosystems, risk, toxicology, human health), resources and wastes, biodiversity, and living sustainably. Three lecture hours weekly.

ENVR 104 EARTH PROCESSES AS NATURAL DISASTERS (3 S.H.)
This course is a survey of Earth's surface processes that have a direct impact, often violently and without warning, on our global society. Information presented in this course integrates the principles of geology, meteorology, climatology, oceanography, and ecology and explores the many ways humans leave themselves susceptible to hazards driven by Earth's dynamic geologic and atmospheric processes. A series of case studies will outline each

topic area covered. These include the broad topic areas of earthquakes, volcanoes, flooding, mass wasting, coastal hazards, subsidence, severe weather, mass extinction, wildfires, and global climate change. Designed for a general audience, this course is open to all students who have a natural curiosity about events that often control our global existence. No prerequisites.

HISTORY (HIST)

HIST 100 WESTERN CIVILIZATION I (ANCIENT WORLD TO 1300) (3 S.H.)
A study of select themes in historical development from ancient Egyptian and Mesopotamian civilizations through classical Greece and Rome to the later Middle Ages. A humanistic analysis of the traditional and popular elements in social behavior. No prerequisite.

HIST 101 WESTERN CIVILIZATION II (1300 TO 1815) (3 S.H.)
A study of select themes in European history from the later Middle Ages to Napoleon. Topics of special interest include the Renaissance, the Reformation, the Scientific Revolution, the Enlightenment, and the French Revolution. No prerequisite.

HIST 102 WESTERN CIVILIZATION III (1815 TO PRESENT) (3 S.H.)
A study of select themes in European history from Napoleon to the present. Topics include the growth of industrialism, nationalism, socialism, and militarism. No prerequisite.

HIST 104 WOMEN IN THE WESTERN TRADITION (SAME AS GWS 104) (3 S.H.)
This course examines Western society's attitudes toward women and how these attitudes shaped women's participation in the social, political, economic, and cultural development of the Western world from ancient times to the present. A special effort is made to use primary source material in the course readings.

HIST 111 WORLD CIVILIZATION TO 1500 (3 S.H.)
This course provides a global perspective on the past before 1500. Beginning with the emergence of civilization, the course surveys the diffusion of civilization and the development of selected societies in regions such as Asia, the Middle East, and Africa. Attention is given to the major cultural, social, economic, and political experiences of the peoples in these areas.

HIST 112 WORLD CIVILIZATION SINCE 1500 (3 S.H.)
This course provides a global perspective on the past since 1500. Building on the themes of "tradition" and "encounter," the course examines the development of political, social, economic, and cultural experiences that have shaped the peoples of such regions as Asia, the Middle East, and Africa from the 16th century to the present.

HIST 121 AMERICAN CIVILIZATION I (3 S.H.)
American Civilization I surveys the history of the United States to 1877, with emphasis on how major economic, political, and social changes affected the lives and values of Americans. The focus is on how diverse peoples experienced and influenced the processes of colonization, nation-building, and sectional development. The class examines the kinds of evidence historians use to reconstruct the past and challenges students to think analytically about historical sources to learn how people made sense of and shaped American civilization.

HIST 122 AMERICAN CIVILIZATION II (3 S.H.)
American Civilization II surveys the history of the United States from 1877 to the present, with emphasis on how major economic,

political, and social changes affected the lives and values of Americans. The focus is on how the processes of industrialization, immigration, and urbanization transformed American life from a parochial, "homogeneous," rural, and agricultural experience to an urban, industrial, multicultural nation in an increasingly interdependent world. The class examines the kinds of evidence that historians use to reconstruct the past and challenges students to think analytically about historical sources to learn how people made sense of and shaped modern American civilization.

HIST 301 HISTORICAL PERSPECTIVES ON TECHNOLOGY (3 S.H.)

A survey of the interaction between technology and society, with particular emphasis on the Western world since the beginning of the Industrial Revolution.

HIST 321 WOMEN IN THE WORLD WARS (3 S.H.)

This course examines the experiences of British, French, German, Russian, and American women on both the homefront and battlefield during the First and Second World Wars. Through a comparative study of women's attitudes, their domestic and public activities, and government policies toward them, the course investigates women's traditional and nontraditional wartime roles. It also considers the impact of the World Wars on attitudes toward women and on women's opportunities and status in the immediate post-war years. Memoirs, diaries, and correspondence by women who worked in war industries, served in auxiliary military services, and fought on the front lines are among the primary sources students use to obtain evidence about women's wartime experiences.

HIST 333 NAZI GERMANY AND THE HOLOCAUST (3 S.H.)

An investigation of the origins and consequences of the Nazi regime, with particular attention to the planning and implementation of the "Final Solution" and the destruction of Europe's Jews.

HIST 353 COLONIAL AMERICA, TO 1760 (3 S.H.)

An in-depth survey of political, cultural, social, and economic developments in America to 1760. Topics include Native American societies, founding the English colonies, the adoption of slavery, religious diversification, the consumer revolution, the French and Indian War, and changes in the family.

HIST 354 REVOLUTIONARY AMERICA, 1760–1820 (3 S.H.)

An in-depth survey of political, cultural, social, and economic developments in America from 1760 to 1820. Topics include the imperial context, the development of provincial society, religious and intellectual currents, changes in the family, the American Revolution and its impact, the Constitution, the rise of party politics, and life in the early republic.

HIST 355 ANTEBELLUM AMERICA, 1820–1860 (3 S.H.)

An in-depth survey of political, cultural, social, and economic developments in America from 1820 to 1860. Topics include the development of classes, party politics, slavery, changes in the family, westward expansion, sectionalism, and the origin of the Civil War.

HIST 356 AMERICA FROM CIVIL WAR TO WORLD STAGE, 1861–1914 (3 S.H.)

An in-depth survey of political, cultural, social, and economic developments in America from 1861 to 1914. Topics include the Civil War, Reconstruction, the Gilded Age, national growth and its impact on peoples of color, and Progressive Reform.

HIST 357 AMERICA BETWEEN THE WARS, 1914–1945 (3 S.H.)

An in-depth survey of political, cultural, social, and economic developments in America from 1914 to 1945. Topics include the decline of Progressivism, cultural conflict in the 1920s, the Great Depression and the New Deal, and the home front during World War II.

HIST 358 RECENT AMERICA, 1945–PRESENT (3 S.H.)

An in-depth survey of political, cultural, social, and economic developments in America since 1945. Topics include the origins and development of the Cold War, McCarthyism, the rise of a counterculture, the Civil Rights Movement, the Vietnam War, and recent ideological conflict between liberalism and conservatism.

HUMANITIES (HUM)

HUM 225 WOMEN IN AMERICAN SOCIETY (3 S.H.)

The role of women in the making of the American nation. Topics include the role of women in industry and education, the feminist movement of the 19th and 20th centuries, the image of women in the media and in society, and the changing role of women in U.S. contemporary life.

HUM 310 AMERICAN FOLKLORE (3 S.H.)

An introduction to the field of folklore, this course encompasses the basic major divisions of the discipline: oral narrative, belief systems, material culture, and popular culture. Attention is given to the nature, development, function, and appropriateness of folklore in our culture. Through the examination, analysis, and discussion of the components of folklore, students gain both an understanding of and an appreciation for the discipline, especially with respect to its interdisciplinary ramifications. The opportunity to engage in fieldwork-oriented research is also afforded.

HUM 320 RELIGIONS OF THE WORLD (3 S.H.)

An exploration of the seven major religions of the world—Hinduism, Buddhism, Confucianism, Taoism, Judaism, Christianity, and Islam—which have formed civilizations and continue to shape the contemporary world. The course examines the origins and development of the seven religions and moves to the meaning these religions carry for their adherents today.

HUM 322 THE SEARCH FOR SPIRITUALITY (3 S.H.)

A study of the path to happiness, often called "spirituality," that includes the spirit of people and the nonmaterial rather than just the body of people and the material. This course explores the search for spirituality in the present era and attempts to evaluate this search against the background of spiritual wisdom that people from all cultures have discovered through the ages.

HUM 352 SCIENCE AND RELIGION (3 S.H.)

What is the place of religion in an age of science? Assuming one can still believe in God today, what view of God is consistent with scientific understanding? How can the search for meaning and purpose in life be fulfilled in the kind of a world disclosed by science? Alfred North Whitehead observed that the two strongest influences on humankind, religion and science, seem to be set against one another. It is no exaggeration to say that the future course of history depends upon the decision of this generation as to the relationship between them. This course seeks areas of reconciliation between the force of our religious institutions and the force of our desire for accurate observation and logical deduction. It is an introduction for non-experts to the central issues in science and religion today, with some focus on the interrelationship of science, spirituality, and worship.

**HUM 380 RELIGIOUS SEASONS, FEASTS,
AND FESTIVALS (3 S.H.)**

This course is a study of ritual as manifested in the religious life of Judaism, Christianity, and Islam. Religious seasons, feasts, and festivals are examined with regard to their meaning, historical development, and contemporary observance. Special emphasis is given to observing the common human concerns that are foundational to seasonal ritual expressions while noting those characteristics that render each religion unique.

INFORMATION SYSTEMS (IS)

**IS 101 INTRODUCTION TO PERSONAL
COMPUTERS (3 S.H.)**

An introduction to personal computers. The course presents students with a description of the various units that comprise a personal computer and how these units function individually and with each other. The basics of using Microsoft Windows are covered. The course provides hands-on experience and projects designed to improve competence in the use of Windows, word processing, and spreadsheet applications. Students may not receive credit for both IS 101 and CSCI 101.

**IS 105 INTRODUCTION TO COMPUTER-BASED
SYSTEMS (3 S.H.)**

An overview of computer information systems and computer science. This survey course introduces computer hardware, software, procedures, systems, algorithms, and human resources and explores their integration and application in business, science, and in other segments of society. The fundamentals of problem solving and programming in a high-level programming language are discussed and applied.

LEGAL EDUCATION INSTITUTE (LEI)

LEI 101 INTRODUCTION TO LAW (3 S.H.)

Required course for bachelor's and associate's degrees and all legal certificate programs.

An introduction to the legal system and an explanation of the legislative and judicial process, including how a legal rule is generated and maintained by the judicial system. Emphasis will be placed on jurisdiction, the development of the law through the court systems, torts, criminal law and procedure, business law, property law, family law and contracts. At the conclusion of this course students will have a working knowledge of legal terminology and have acquired an understanding of our legal system. Specifically, students will have gained an understanding of the following at the end of the semester: The role of the legal in the legal system; classification of the law including federal vs. state and civil law vs. criminal; civil litigation and the role of the legal including introduction to pleadings and trial preparation; identification of basic torts and their defenses; basic contract elements; types of real and personal property; legal consequences of marriage and divorce; and elements of crimes and defenses to crimes. This is a legal specialty course. Students must attain a minimum grade of C for this class. Prerequisite: None.

LEI 102 LEGAL RESEARCH & WRITING I (3 S.H.) (W)

Required course for bachelor's and associate's degrees and all legal certificate programs.

This course introduces students to the fundamentals of legal research. To begin, a general overview of the federal and state court systems is provided. Next, students learn to use and locate

most primary legal authorities, including cases, constitutions, and federal and state statutes. Attention is given to case analysis and the techniques of legal writing: citation form, cite checking, and the legal office memoranda. This is a legal specialty course. This is a writing enriched course. Students must attain a minimum grade of C for this class. Prerequisite: Introduction to Law or Introduction to Legal Nurse Consultant.

LEI 104 LEGAL RESEARCH & WRITING II (3 S.H.) (W)

Required course for bachelor's and associate's degrees and all legal certificate programs.

This course continues with the fundamentals of legal research. Students learn to use and locate primary sources not covered in Legal Research I, namely, administrative law and legislative history, and most secondary legal authorities, including digests, annotated law reports, periodicals, and encyclopedias. Additional attention is given to case analysis and the techniques of legal writing, which culminates in a self-directed research project and office memoranda. This is a legal specialty course. This is a writing enriched course. Students must attain a minimum grade of C for this class. Prerequisite: Introduction to Law or Introduction to Legal Nurse Consultant and Legal Research I.

LEI 106 CONTRACT LAW (3 S.H.)

Required course for bachelor's and associate's degrees and legal certificate programs with concentrations in corporate law, health law, and real estate law. It is an alternate course for the intellectual property concentration.

A survey of basic contract law provides students with the history and development of contract law in the United States. This course examines the necessary elements of a contract, enforcement of contracts, remedies for breach of contract, drafting of documents, and analysis of case situations that the legal may encounter in practice. This is a legal specialty course. Prerequisite: Introduction to Law and Legal Research I.

LEI 108 ENVIRONMENTAL LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This course introduces students to the study of environmental law, with emphasis on the role of the legal in this field. The course surveys major environmental acts in the United States. The course presents an overview of the treatment of issues and legislation concerning the environment from a legal perspective. This is a non-legal specialty course. Prerequisite: Introduction to Law and Legal Research I.

LEI 110 LEGAL DOCUMENT DRAFTING (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This course consists of hands-on practical experience through drafting of documents applicable to various legal environments. Students use mock scenarios where they represent clients and draft documents to fit their clients' needs in the role of a legal. This is a legal specialty course. Prerequisite: Introduction to Law, Legal Research I, and Civil Practice.

LEI 115 EMPLOYMENT LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

An examination into the area of the legal issues common to an employer in today's legal environment of business, students will review the applicability and legal issues surrounding personnel manuals and policies, as well as employment contracts. The course will also focus on the compliance with state, federal and administrative statutes and regulations that impact the daily life of employer and employee in the workplace. Legal issues that will also be studied include the Americans with Disabilities Act, Medical Leave Acts, Title VII, Discrimination, the Fair Labor

Standards Act, and whistle-blower statutes. This is a non-legal specialty course. (Prerequisite: Introduction to Law)

LEI 120 ESTATE ADMINISTRATION (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required for legal certificate with a concentration in estate administration.

This course serves as a guide through each stage of estate administration, including the probate process, inventory and appraisal of assets, preparation of inheritance and federal estate tax returns, and distribution issues. Introduction to estate administration software, case management, tickler systems, and ethical considerations in assisting estate administration clients are among the practical aspects of the course. This is a legal specialty course. Prerequisite: Introduction to Law, and Wills and Trusts.

LEI 121 INTRODUCTION TO CRIMINAL JUSTICE (3 S.H.)

Required course for bachelor's and associate's degrees and legal certificate with a concentration in criminal law.

An overview and analysis of the American system of criminal justice. The crime problem, and police, the judicial system and correctional agencies are examined. Special emphasis is placed on both the legal and behavioral realities of each stage of the criminal justice process, including intake forms in the criminal system from arraignment to prosecution and all applicable forms and research skill sets. This is a non-legal specialty course. Prerequisite: Introduction to Law.

LEI 126 JUVENILE JUSTICE (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This course examines the legal structure of the family with emphasis on juvenile law as it applies to minors. Emphasis is placed on the rights of minors and the family court system. This course also focuses on theories of delinquency, intervention programs, the legal rights of juveniles, intake and preadjudicatory process, sanctions, probation, and juvenile corrections. This is a non-legal specialty course. Prerequisite: Introduction to Law.

LEI 127 FILE MANAGEMENT & E-FILING FOR THE PARALEGAL (3 S.H.)

Elective course for the bachelor's and associate's degrees.

Students are given various case files, including correspondence, pleadings, discovery (i.e., interrogatories, requests for production, deposition notices, etc.), deposition transcripts, attorney notes, research, and other typical documents that may be found in a real-life case file. Class discussion deals with how to (1) properly organize a case file, (2) digest depositions, (3) prepare pleading and discovery binders, and (4) preparation of tickler and calendar system. Each student will turn in a completely organized case file at the end of the semester. This class is intended to give students practical experience in file management. This class has no exams but requires multiple projects. This is a legal specialty course. Prerequisite: Introduction to Law, Legal Research I, and Civil Practice.

LEI 128 PRIVACY LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

Privacy Law offers a comprehensive, in-depth treatment of all privacy issues. Coverage of government surveillance topics, such as Fourth Amendment, sensory enhancement technologies, wire tapping, computer searches, ISP records, the Electronic Communications Privacy Act, the Foreign Intelligence Surveillance Act, and the USA-Patriot Act; a thorough examination of new issues, such as privacy and access to public records, government access to personal information, airline passenger

screening and profiling, data mining, identity theft, consumer privacy, and financial privacy; coverage of emerging information technologies, such as computer databases, RFID (radio frequency identification technology), cookies, spyware, data mining, and others; and an introductory chapter with a thought-provoking philosophical discussion of information privacy. This is a non-legal specialty course. Prerequisite: Introduction to Law.

LEI 135 ADVANCED RESIDENTIAL AND COMMERCIAL REAL ESTATE FOR PARALEGALS (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required for legal certificate with a concentration in real estate.

Students learn how to prepare and complete all documents necessary for a residential and commercial real estate closing. Each document is explained in detail, and students learn how to obtain all necessary information to complete each document. Students learn about HUD-1 settlement sheets, mortgages, promissory notes, deeds, affidavits of title, title insurance, surveys, legal descriptions, agreements of sale, etc. Students also participate in a mock real estate settlement. Each student prepares a real estate closing binder in connection with a real estate transaction, including the preparation and completion of all of the above listed documents. This is a legal specialty course. Prerequisite: Introduction to Real Estate and Legal Research I.

LEI 201 WILLS & TRUSTS (3 S.H.) (W)

Required course for the bachelor's degree, general legal certificate, and legal certificate program with a concentration in estate administration. Elective for the associate's degree.

Study of the law of testamentary disposition, of the common instruments used in testamentary dispositions, the formalities for validity, construction and interpretation of wills, trusts, and other post-death transfer devices. Emphasis is placed on the probate process, estate administration, and federal and state tax concerns. This is a legal specialty course. This is a writing enriched course. Prerequisite: Introduction to Law and Legal Research I.

LEI 202 CONSTITUTIONAL LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

Survey of constitutional law providing students with an overview of the following areas: judicial, legislative, and executive powers, property rights, due process, freedom of speech, freedom of religion, the right to privacy, and discrimination. This is a non-legal specialty course. Prerequisite: Introduction to Law.

LEI 203 INTRODUCTION TO REAL ESTATE (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required for legal certificate with a concentration in real estate.

A comprehensive survey of the modern real estate property transaction, covering the review and/or drafting of basic documents involved in transfer of land such as deeds, mortgages, sales agreements, title insurance, and a review of federal and state regulation of land transfer and development. Emphasis is placed on ownership rights, survey and land descriptions, encumbrances, easements and licenses, financing, title examinations, real estate closings and leases. This is a legal specialty course. (Prerequisite: None)

LEI 204 TRIAL PROCESS (3 S.H.)

Required course for bachelor's and associate's degrees and legal certificate with a concentration in criminal law. It is an alternate course for the litigation concentration.

This class is a study of the trial process, examining pre-trial preparation and documentation, making a trial notebook, and preparing complex litigation for trial. Post-trial motion practice and appellate

practice are also discussed. Emphasis is placed on jury selection, opening statements, evidence, direct and cross examination, and closing arguments. This is a legal specialty course. Prerequisite: Introduction to Law, Legal Research I & II, and Civil Practice or Introduction to Criminal Justice and Evidence.

LEI 205 CIVIL PRACTICE (3 S.H.) (W)

Required course for bachelor's and associate's degrees; general legal certificate program; legal certificate programs with concentrations in corporate law, estate administration, health law, and litigation; and the legal nurse consultant certificate.

An examination of civil practice and procedure beginning with the filing of a complaint and extending through discovery, pre-trial motions, trial, post-trial motions, and appeal. Emphasis is placed on course of action, time limitations, case investigations, purposes of motions, depositions, settlements and dismissals. This is a legal specialty course. This is a writing enriched course. Prerequisite: Introduction to Law or Introduction to Legal Nurse Consultant.

LEI 206 BUSINESS ORGANIZATIONS (3 S.H.) (W)

Required course for bachelor's and associate's degrees; general legal certificate program; and legal certificate with a concentration in corporate law.

Comprehensive survey of the law of business associations from sole entrepreneur through partnership and corporate formation. Discussion of merger, acquisition, director's liability, and other corporate law topics. Emphasis is placed on shareholder agreements, classes of shares, rights of first refusal, methods of financing, and voting trusts. This is a legal specialty course. This is a writing enriched course. Prerequisite: Introduction to Law and Legal Research I.

LEI 207 FAMILY LAW (3 S.H.) (W)

Elective course for the bachelor's and associate's degrees.

Survey of the legal structure of the family with emphasis on the law of marriage, divorce, child custody, and support. Emphasis is placed on marriage issues, such as formation of marriage, prenuptial agreements, termination of marriage, and tax consequences. The course also contains child issues such as legal status of children, child custody, child support, and adoption. This is a legal specialty course. This is a writing enriched course. Prerequisite: Introduction to Law and Legal Research I.

LEI 208 BANKRUPTCY (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required course for legal certificate with a concentration in corporate law.

Comprehensive study of bankruptcy law and practice with an emphasis on consumer filings. The course consists of reviewing different types of consumer and commercial bankruptcies; relevant federal legislation governing bankruptcy; bankruptcy code; and resource materials necessary to bankruptcy practice. The course also emphasizes procedural rules and responsibilities of all parties involved. This is a legal specialty course. Prerequisite: Introduction to Law.

LEI 209 PRACTICUM (3 S.H.)

Elective course for the bachelor's and associate's degrees. It is an alternate course for the intellectual property concentration.

Internship and externship experiences. Practicum opportunities are available on campus with one of the law school's clinical programs. Off-campus experiences include working in law firms, corporations, law enforcement, or public agencies and the court systems. This is a legal specialty course. Prerequisites: Introduction to Law, Legal Research I & II, and Civil Practice.

LEI 210 TAXATION FOR PARALEGALS (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required for legal certificate with a concentration in real estate.

Analysis of income taxation, what constitutes income, exemptions, exclusions, deductions, and related issues. Examination of common federal taxation forms and schedules. Emphasis is on tax accounting, income, exclusions, and deductions for individuals. This is a legal specialty course. Prerequisite: Introduction to Law and Legal Research I.

LEI 211 LAW OFFICE MANAGEMENT (3 S.H.)

Elective course for the bachelor's and associate's degrees.

A review of the common management techniques used in law offices, including case management, document control, time accounting, trust accounting and other elements of the well-managed law practice. Emphasis is placed on employment policies, hiring policies, discrimination in the workplace, revenue and expenses, professional development and law office disasters. This is a non-legal specialty course. Prerequisite: Introduction to Law.

LEI 212 ETHICS AND PARALEGALISM (3 S.H.) (W)

Required course for bachelor's and associate's degrees; general legal certificate; legal certificate programs with concentrations in corporate law, criminal law, estate administration, intellectual property, litigation, and real estate.

An introduction to legal studies and the fundamentals of legalism with a comprehensive survey of professional responsibility issues for legal assistants, including the study of the American Bar Association's Model Code and Model Rules of Professional Responsibility and various professional legal associations' codes of ethics. Students explore licensing and regulating issues. This is a legal specialty course. This is a writing enriched course. Students must attain a minimum grade of C for this class. Prerequisite: Introduction to Law.

LEI 213 TORTS AND PERSONAL INJURY LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required course for legal certificate programs with concentrations in health law and litigation and the legal nurse consultant certificate.

Complete overview of tort and personal injury law. Emphasis is placed on intentional torts, tort defenses, negligence, strict liability, and products liability. Tort immunities and specific tort actions of nuisance and wrongful death are covered. This is a legal specialty course. Prerequisite: Introduction to Law or Introduction to Legal Nurse Consultant, Civil Practice, and Legal Research I.

LEI 216 INTERVIEWING & INVESTIGATION (3 S.H.)

Elective course for the bachelor's and associate's degrees.

An in-depth study of principles, methods, and investigative techniques used to locate, gather, document, and disseminate information. The emphasis is on developing interviewing and investigating skills intended to prepare legals to communicate effectively. This is a non-legal specialty course. Prerequisite: Introduction to Law.

LEI 217 VIOLENCE AND THE LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

Examination of how the law treats violent incidents, with particular emphasis on spousal and child abuse. Students review the Protection from Abuse laws of Pennsylvania, New Jersey, and Delaware. Students also examine juvenile violence and school violence. A research paper is required for this course. This is a non-legal specialty course. Prerequisite: Introduction to Law or Introduction to Legal Nurse Consulting, Introduction to Criminal Justice, and Legal Research I.

LEI 220 MEDICAL MALPRACTICE (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required for legal certificate with a concentration in health law.

This course consists of the following topics: establishing the professional relationship, negligence-based claims, informed decision making, causation and damages, affirmative defenses, limitations and immunities, vicarious liability and multiple defendants, hospital liability, contract, warranty and strict liability, and reform action of the litigation system. Our society has grown increasingly litigious while at the same time advances in medical technology and health care have increased the complexity of health care. As a result, a sizeable practice of both plaintiff and defense medical negligence has been created. In response to both real and perceived crises in health care, much legislation has addressed this highly specialized area of personal injury litigation. Students are introduced to topics such as the historical development of this area of law and litigation, risk management and prevention issues, insurance issues, discovery issues, causation and investigation, pretrial issues specific to medical malpractice claims, and trial of these claims. This is a non-legal specialty course. Prerequisite: Introduction to Law, Legal Research I, Civil Practice.

LEI 224 HEALTH CARE LAW & ETHICS (3 S.H.) (W)

Required course for the legal certificate with a concentration in health law and the legal nurse consultant certificate.

Course involves the legal aspects involved in today's health care field as it relates to the health care providers, the administrative staff, the patient, and the health insurance companies. Current legislation and regulatory issues are explored along with legal aspects of medical ethics. This is a legal specialty course. This is a writing enriched course. Prerequisite: Introduction to Legal Nurse Consultant or Introduction to Law, and Legal Research I.

LEI 225 SOCIAL SECURITY DISABILITY LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

An examination of Social Security Disability Law beginning with the initial claimant interview, case evaluation, initial determination of the state disability determination service and reconsideration levels. Concentration is on the administrative law judge hearing, representation of claimants at the hearing level, and preparation for the hearing with a focus on medical impairments, work activity, and listings. Emphasis is also placed on the appeals process from initial determination, post-hearing appeals council, and district court. This is a non-legal specialty course. Prerequisite: Introduction to Law and Legal Research I.

LEI 226 EVIDENCE (3 S.H.)

Required course for the bachelor's degree and legal certificate programs with concentrations in criminal law and litigation.

This course provides students with a working understanding of the federal and state "rules of evidence." Students gain an understanding of the function of rules of evidence, objections to be anticipated, and the preparation of a civil case for trial without the exclusion of evidence based on application of those rules. This is a legal specialty course. Prerequisite: Introduction to Law, Legal Research I & II, and Civil Practice or Introduction to Criminal Justice.

LEI 227 ALTERNATIVE DISPUTE RESOLUTION (3 S.H.)

Elective course for the bachelor's and associate's degrees.

Students gain practical insight in the theory that there are alternative means of deciding and going forward with a case. In-depth discussion includes mediation, arbitration, private counseling, and negotiation. Emphasis is placed on time considerations, efficiency

in handling a case, expertise in alternative resolution, and cost factors. This is a non-legal specialty course. Prerequisite: Introduction to Law and Civil Practice.

LEI 228 WORKERS' COMPENSATION LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This comprehensive course combines theoretical and practical approaches. The course focuses on the development and application of workers' compensation statutes. Topics include statutory elements of a claim for an accident to be work-related and compensable; defenses, burdens of proof, and procedure; distinctions among occupational injury, disease, and stress claims; different types of compensation available; effect of workers' compensation on civil actions; and related claims for damages and disability. This is a non-legal specialty course. Prerequisite: Introduction to Law and Legal Research I.

LEI 230 ADVANCED PARALEGAL SEMINAR: CRIMES OF THE CENTURY (3 S.H.)

Elective course for the bachelor's and associate's degrees.

An overview and analysis of the justice system using literature, film, drama, and other media. Focus is on current issues regarding the legal system, e.g., the existence of gender bias, the court of public opinion, the legal system as a force for social change, and how morality relates to law. Class is writing-intensive. This is a non-legal specialty course. Prerequisite: Introduction to Law, Legal Research I & II, and Introduction to Criminal Justice.

LEI 231 INTRODUCTION TO LEGAL NURSE CONSULTANT (3 S.H.)

Required course for the legal nurse consultant certificate.

Exploration of the role of the legal nurse consultant in the legal field. Areas of practice and professional responsibilities of the legal nurse consultant are examined. Basic introduction into legal terminology is introduced. This course enables students to gain a basic understanding of the history of LNC, opportunities, and professional associations and credentialing; understanding of various LNC practice forums; federal/state courts and the judicial system; the trial process including discovery, expert witnesses, medical examinations, exhibit preparation, and alternative dispute resolution (ADR); medical record review and trends in electronic medical records (EMRs); healthcare liability issues; and understanding the LNC's roles in popular settings. This is a legal specialty course. Prerequisite: None.

LEI 232 PRINCIPLES AND PRACTICES OF THE LEGAL NURSE CONSULTANT (3 S.H.)

Required course for the legal nurse consultant certificate.

A comprehensive application of major functions of a legal nurse consultant. Students analyze cases from both plaintiff and defense prospective and examine the legal nurse consultant's role in civil practice, further analysis of medical records, the trial process, and development of life care plans. The trial preparation, alternate dispute resolution, settlement, arbitration and mediation, interacting with defense clients, locating and working with expert witnesses, communication with plaintiff clients are introduced. This is a legal specialty course. Prerequisite: Introduction to Legal Nurse Consultant, Legal Research I, and Civil Practice.

LEI 233 LEGAL NURSE CONSULTING MENTORSHIP (3 S.H.)

Required course for the legal nurse consultant certificate.

Students are introduced to environments where legal nurse consulting is practiced. These include law firms, insurance companies, state agencies, independent practice settings, and risk management areas. Students are paired with legal nurse consultants

on a rotating basis in order to gain first-hand practical knowledge of the role of the legal nurse consultant. This is a legal specialty course. Prerequisite: Introduction to Legal Nurse Consultant, Legal Research I & II, Torts, Civil Practice, Principles & Practices of LNC, and Health Care Law and Ethics.

LEI 234 ALCOHOL, VEHICLE, AND THE LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

A comprehensive overview of established jurisprudence involving alcohol use and the operation of motor vehicles and the prosecution and defense of related matters. Discussion of applicable case and statutory law, the arrest process, pre-trial and trial activities, motion practice, and alternative sentencing. This is a non-legal specialty course. Prerequisite: Introduction to Law.

LEI 237 SEX CRIMES (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This course gives an overview of sex crimes, including sexual abuse of children, date rape, rape by a stranger, consensual sex crimes, and other related issues, such as the date-rape drug and special sanctions for offenders with transmittable diseases. Students gain heightened awareness of the specific problems in handling these issues in the criminal justice system and will analyze potential hazards in defending/prosecuting cases. Assignments incorporate current events, discussing assigned readings, and reviewing actual court documents relating to sex crimes. This is a non-legal specialty course. Prerequisite: Introduction to Law, Introduction to Criminal Justice, and Legal Research I.

LEI 238 COMPUTER TECHNOLOGY AND THE LAW (3 S.H.)

Required course for bachelor's and associate's degrees and the general legal certificate. It is an alternate for the litigation concentration.

This course provides students with indepth exposure to technology techniques used in the litigation process. The class is divided into litigation teams that manage the litigation, its discovery, and its trial presentation with the aid of exemplar computer programs used in the industry. Students have hands-on training in software programs and their application in the litigation process. This is a legal specialty course. Prerequisite: Introduction to Law and Legal Research I.

LEI 240 INTELLECTUAL PROPERTY (3 S.H.)

Elective course for the bachelor's and associate's degrees. It is an alternate course for the corporate law concentration.

This course is an overview of the classes of intellectual property, including patents, trademarks, service marks, copyrights, and trade secrets, with emphasis on the legal's role in securing intellectual property rights, ownership issues, and licensing of intellectual property. This is a legal specialty course. Prerequisite: Introduction to Law and Legal Research I.

LEI 242 ELDER LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This course provides a comprehensive view of law and procedure for the aging population. Upon completion of the course, students have an understanding of the different areas of the law that impact the elderly and their advocates. Topics include the role of the legal in the elder law office, drafting of advance directives and powers of attorney, interviewing techniques for the elderly client, patient rights in healthcare decision making, Medicare and Medicaid considerations, managed care, and long-term care insurance, financial planning, and social security. Drafting and completing forms unique to elder law are addressed, such as conservatorship for a family member, predesignation of guardian

form, and a notice of appeal of social security. This is a legal specialty class. Prerequisite: Introduction to Law.

LEI 245 CRIMINAL PROCEDURE (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required for legal certificate with a concentration in criminal law.

An advanced course in criminal law and procedure, in which students learn about the areas of bail arraignment, alternate resolutions, pretrial motions, trial skills, and sentencing. Students are provided a clinic-like experience with ample opportunity to have practical skills in all topical areas. This is a non-legal specialty course. Prerequisite: Introduction to Law and Introduction to Criminal Justice.

LEI 246 INTRODUCTION TO FORENSIC SCIENCE (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required course for the legal nurse consultant certificate with a concentration in forensic science.

This course is intended as a general introduction to the basics of forensic science. This introductory course covers areas of interest to those working in legal nurse consulting, the legal profession, and law enforcement. General areas include reviewing and understanding the autopsy report and bodily changes after death, specifics associated with strangulation, gunshot wounds, toxicology reports, medical records associated with sexual assault cases, as well as terminology associated with these reports. Students develop skills to analyze and scrutinize reports generated from the use of forensic DNA testing, including reviewing the collection and testing techniques. The use of references and the Internet is covered. Actual case examples are used when applicable. Coursework assumes NO prior forensic experience. This is a non-legal specialty course. Prerequisite: Introduction to Law or Introduction to Legal Nurse Consultant and Legal Research I.

LEI 248 ADMINISTRATIVE LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

A survey course of basic areas and practical considerations of administrative law. Administrative law defines the legal powers of government agencies and the limits of these powers. Topics include structure of administrative agencies, agency discretion, rules and regulations, investigations, informal and formal proceedings, and judicial review. Students are provided each class with exercises and examples of the practical aspects of the legal's role in administrative law. This is a non-legal specialty course. Prerequisite: Introduction to Law.

LEI 250 CYBER LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

The course provides students in the fields of computer fraud investigations and digital forensics with an understanding of the fundamental legal principles governing the collection and use of evidence. The course also covers federal computer crime statutes and rules of evidence as they relate to computer fraud investigations and digital forensics. This is a non-legal specialty course. Prerequisite: Introduction to Law, Legal Research I.

LEI 253 REAL ESTATE TITLE SEARCH & EXAMINATION (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required for legal certificate with a concentration in real estate.

Students learn the fundamentals of a land title search utilizing both classroom sessions and practical applications in two separate courthouses. This is an advanced class that emphasizes traditional and computerized search techniques along with classroom sessions to enhance students' understanding of the material they are

searching and the legal implications of that information. The title examination process is also reviewed as an extension of the search process. Students are uniquely educated through this course and positioned for placement and advancement in the real estate industry. Introduction to Real Estate is a prerequisite and Advanced Real Estate is recommended either prior to or in conjunction with this class. Students receive a certificate from PA Land Title Institute upon successful completion of this course. This is a legal specialty course. (Prerequisite: Introduction to Real Estate.)

LEI 254 BIOETHICS AND THE LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

Advances in medical technology have forced society to make increasingly complex decisions regarding life and death. Students are introduced to topics such as constitutional issues, health law technology, surrogacy, privacy issues, AIDS, wrongful birth/wrongful life, physician/patient relationship, cloning, human genome project, and constitutional issues. This is a non-legal specialty course. Prerequisite: Introduction to Law or Introduction to Legal Nurse Consultant.

LEI 255 WHITE COLLAR CRIME (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This course provides students with an understanding of the complexity of white-collar crime. Students review, analyze, and discuss actual case studies. Students also examine the legal and ethical aspects encompassed by the term "white-collar crime" and the extent and cost of white collar crime. Students identify and evaluate the legal elements that encompass both individual and corporate crimes and develop an appreciation of the difficulties of enforcement and prosecution of white-collar criminality. This is a non-legal specialty course. Prerequisite: Introduction to Law.

LEI 257 CRIME SCENE INVESTIGATION (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This course provides an overview of techniques and methods of crime scene investigation focusing on practical suggestions as well as theoretical viewpoints of the field. Topics include fundamentals of preliminary investigation, identification, protection and collection of evidence, applicable law, blood stain evidence, fingerprinting techniques, and court presentation. This is a non-legal specialty course. Prerequisite: Introduction to Law, Legal Research I, Introduction to Criminal Justice.

LEI 260 TERRORISM & HOMELAND SECURITY (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This course is an introduction to the structure, legal issues, and study of domestic terrorism. Organization and financing of terrorist networks, media influences, and terrorist tactics are reviewed. Both domestic terrorism and the development of international terrorism are discussed. This course provides an overview of the Patriot Act, civil liberties, and law enforcement bureaucracy. This is a non-legal specialty course. Prerequisite: Introduction to Law.

LEI 261 SPORTS AND ENTERTAINMENT LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This course addresses the ethical and legal principles for legal professionals involved in sports or entertainment law practice. In addition to looking at general topics, it provides details for specific genres including television, recording, music, and sports. It covers the legal structures of the entertainment industry, television, and film. live stage performances, recording and music publishing, and sports law. This is a non-legal specialty course. Prerequisites: Introduction to Law, Legal Research I.

LEI 264 CRIMINAL MITIGATION AND ETHICS (3 S.H.)

Elective course for the bachelor's and associate's degrees. Alternate course for the legal nurse consultant certificate with a concentration in forensic science.

This course introduces students to the psychological and neuropsychological issues found in forensic evaluations. The course explores foundational areas such as legal, ethical, and applied aspects of the mitigation evaluation. Students examine criminal and civil cases to develop an understanding of the various behavioral science matters that could impact the outcome of a criminal proceeding by lowering the amount of moral blame and thus lowering the criminal penalty or civil damages for the action. Examples include familial violence, malingering, and deception, competency to stand trial, and mitigatory defense. This is a non-legal specialty course. Prerequisite: Introduction to Forensic Science.

LEI 267 FORENSIC PSYCHOLOGY AND ETHICS (3 S.H.)

Elective course for the bachelor's and associate's degrees. Alternate course for the legal nurse consultant certificate with a concentration in forensic science.

This course focuses on the psychological and neuropsychological issues found in criminal forensic evaluations. The course reviews legal, ethical, and applied aspects of the forensic psychological evaluations. Students develop an understanding of the various behavioral science matters that could impact the outcome of a criminal proceedings. Examples include familial violence, malingering, and deception, competency to stand trial, and mitigatory defense. This is a non-legal specialty course. Prerequisite: Introduction to Forensic Science.

LEI 268 WRONGFUL CONVICTIONS (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This course examines the principal problems that lead to the conviction of the innocent and the leading proposals for reform. Students read and examine actual cases of the exonerated to further explore the causes and consequences of wrongful conviction. Faulty eyewitness identification, questionable testimony, police and prosecutorial misconduct, ineffective assistance of counsel, false confessions, reliability in the use of DNA evidence, and the improper use of science in the courtroom are examined. Students review court documents that are typically turned over in the criminal discovery process. Documents utilized in the actual review of cases for exoneration are examined. This is a non-legal specialty course. Prerequisite: Introduction to Law.

LEI 269 PRODUCT LIABILITY (3 S.H.)

Elective course for the bachelor's and associate's degrees.

An overview of personal injury and product liability litigation with emphasis on an analytical approach through thorough fact investigation and case preparation. The class covers a history of product liability law, case management, new case evaluation, determination of correct parties, and discovery. The importance of expert witnesses, specific types of medical and consumer products, design defects, and standards and regulations is discussed. Students learn how to locate and evaluate expert witnesses, evaluate forms, pleadings, and discovery. This is a non-legal specialty course. Prerequisite: Introduction to Law, Legal Research I, and Civil Practice.

LEI 271 CRIMINALISTICS (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This course examines criminal procedures and the admissibility of testimonial and physical evidence utilized in criminal trials and hearings. The exclusionary rule and the distinction between real and testimonial evidence as admitted or excluded from court

proceedings are emphasized through the use of case law. Through the discussion of court decisions, students can visualize the use of legal principles by law enforcement and correctional officers and others involved in the justice system. This is a non-legal specialty course. Prerequisite: Introduction to Criminal Justice.

LEI 273 CONSTITUTIONAL AND LEGAL RIGHTS OF WOMEN (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This course provides an overview of women's rights by exploring the landmark Supreme Court cases and changes in laws that have defined the legal rights of women in the United States. Students study women's efforts for constitutional equality; women's employment rights; reproductive freedom; same sex marriage issues; and women and crime. The class is taught from a constitutional law perspective, broadening the student's understanding of the foundations of women's constitutional rights. This is a non-legal specialty course. Prerequisite: Introduction to Law.

LEI 274 TRADEMARKS AND COPYRIGHTS (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required for legal certificate with a concentration in intellectual property.

This course provides an understanding of the basic principles of trademarks and copyrights. Practical skill building includes how to perform preliminary searches for trademarks, the trademark registration process, maintaining a trademark registration, and supporting trademark interparties and trademark usage and compliance. The second half of the course focuses on copyrights, which are used primarily to protect original artistic, literary, and musical works. Basic copyright concepts are introduced, which include the types of protectable works. Students learn how to obtain a copyright registration and establish rights for coauthors, as well as what is and is not protectable under copyright law. This section also examines copyright infringement, legal remedies for same, and the common defenses to an infringement allegation. This is a legal specialty course. Prerequisite: Introduction to Law and Legal Research I.

LEI 275 PATENTS AND TRADE SECRETS (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required for legal certificate with a concentration in intellectual property.

This course focuses on the law of patents and trade secrets and examines the role of the legal in securing patent rights and trade secrets. Students gain insight into the foundation of patent law process, including, patent application processes for utility, design and plants, ownership rights, transferring patent rights, remedy for/defenses involved in litigation upon infringement, and new developments/current events in patent law. Students will be able to define and describe the factors that establish a trade secret as well as be able to understand how they are protected, in addition to the possible legal remedies for misappropriation of a trade secret. This is a legal specialty course. Prerequisite: Introduction to Law and Legal Research I.

LEI 276 E-DISCOVERY (3 S.H.)

Elective course for the bachelor's and associate's degrees.

This course provides a framework for discussion of the issues surrounding the discovery of electronically stored information (ESI). The course addresses the identification and preservation of electronic materials, as well as technical aspects of reviewing and producing those relevant documents. Areas of interest include information management, collection, processing, technology, production, and presentation. Metadata, privilege, spoliation, and

authentication are also a focus. Use of these documents for trial presentation is a highlight. This is a non-legal specialty course. Prerequisite: Introduction to Law.

LEI 277 INTELLECTUAL PROPERTY TRANSACTIONS (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required for legal certificate with a concentration in intellectual property.

This course provides an in-depth look at intellectual property transactions, including nondisclosure (secrecy) agreements, employee agreements, technology transfer, mergers and acquisitions, and the due diligence required thereof, licensing and technology, Internet, and social media. This course examines the role of the legal in technology and corporate transactions such as outsourcing, strategic alliances, licensing, e-commerce, finance, and restructurings. The content of this course is a foundation for those who intend to specialize in intellectual property. This is a legal specialty course. Prerequisite: Introduction to Law, Legal Research I, Trademarks and Copyrights, Patents and Trade Secrets.

LEI 278 CAREER DEVELOPMENT FOR PARALEGALS (3 S.H.)

Elective course for the bachelor's and associate's degrees.

In this course, students concentrate on career development for new legal professionals. Students develop new résumés and cover letters and revise existing writing samples in preparation for entering the job market. With individual guidance from the instructor, students produce a primary résumé and alternative résumé(s) based upon their unique education and professional experience using the latest techniques in résumé development. Students have the opportunity to participate in mock interviews, develop and use an "elevator pitch," and utilize a variety of social media tools to manage their developing careers. Students study the hiring process for employment with solo practitioners, medium and large law firms, and state and federal government agencies. This course also includes a focus on the role of a mentor, membership in professional organizations, and networking. This is a legal specialty course. Prerequisite: Introduction to Law, Ethics, Legal Research I, and Legal Research II.

LEI 279 SPECIAL TOPICS IN CRIMINAL LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees.

Students survey a selection of special topics in criminal law, which can include victimology, measurement of crime, criminal evidence, criminology and the court system. The course instruction draws upon an exploration of landmark criminal law cases, including current cases when applicable. Students complete tasks from the perspective of a professional legal and learn the role and responsibilities of a legal within the realm of criminal law. This is a non-legal specialty course. Prerequisite: Introduction to Criminal Justice.

LEI 280 SPECIAL TOPICS IN AGING AND THE LAW (3 S.H.)

Elective course for the bachelor's and associate's degrees. Required for legal certificate with a concentration in elder law.

This course expands upon the fundamentals introduced in Elder Law. Specific focus is placed on living facilities for the elderly, including independent, assisted living, and skilled nursing homes; elder abuse issues such as legislation and the role of the elder care team; elder care resources; how technology has affected the aging population; and marriage among the elderly. This course reviews the role of the legal in elder law interviewing and investigation and ethical considerations involving the elder client, care-givers,

medical providers, and family members. This is a non-legal specialty course. Prerequisite: Introduction to Law, Legal Research I, and Elder Law.

MATHEMATICS (MATH)

Any student entering Widener who plans to take a math course other than MATH 101 as a first mathematics course must take the Mathematics Placement Test.

MATH 101 FUNDAMENTALS OF MATHEMATICS (3 S.H.)

This is a developmental mathematics course designed to review elementary algebra, to prepare students for further mathematics courses, and to develop problem-solving skills and critical thinking in mathematics. Topics include the real number system, linear equations and inequalities, exponents and polynomials, factorization, rational expressions, roots and radicals, and graphing. Because this course is developmental, it cannot count toward fulfilling the science distribution requirement. It may not be taken after completing any mathematics course with a higher number.

MATH 111 MATHEMATICAL IDEAS I (3 S.H.)

This course is designed for students pursuing early childhood teacher certification. Emphasis is placed on learning concepts and developing an understanding of mathematics as a body of connected ideas. The NCTM's Professional Standards for Teaching Mathematics provides a framework for selecting topics for this course. Topics are presented in a historical context and include an introduction to problem solving; elementary set theory; patterns, relations, and functions; number concepts and relationships; and elementary number theory. Prerequisite: MATH 101 or a satisfactory score on the mathematics placement test.

MATH 112 MATHEMATICAL IDEAS II (3 S.H.)

This course is also designed for students pursuing early childhood teacher certification. Emphasis is placed on learning concepts and developing an understanding of mathematics as a body of connected ideas. The NCTM's Professional Standards for Teaching Mathematics provides a framework for the selection of topics for this course. Topics are presented in an historical context and include synthetic and metric geometry; introductory notions in probability; and the collection, representation, and interpretation of data. Prerequisite: MATH 101 or a satisfactory score on the mathematics placement test.

MATH 115 CONCEPTUAL MATHEMATICS (3 S.H.)

This course is intended for students who have completed MATH 101 or demonstrated math proficiency on the math placement test. The course uses concepts of elementary algebra to solve consumer-related problems. This course satisfies a mathematics/science general education elective for noneducation and non-business majors. Students should consult their academic advisors before enrolling in this course. This course is not open to those who have completed MATH 117 or higher.

MATH 116 THE NATURE OF MATHEMATICS (3 S.H.)

This course is an introduction to the nature and utility of mathematics, designed for students majoring in humanities, social sciences, or education. Mathematical topics are chosen from the following: sets, logic, numeration systems, numbers, trigonometry, networks and graph theory, probability and statistics with applications to growth, financial management, combinatorics, and voting. Prerequisites: Humanities, social sciences, or education major, or permission of instructor; MATH 101 or at least Level 3 on the Mathematics Assessment.

MATH 117 ELEMENTARY FUNCTIONS (4 S.H.)

A review of elementary algebra followed by the study of functions and graphs (emphasizing polynomial, exponential, and logarithmic functions), systems of linear equations, matrices, and linear programming. Prerequisite: MATH 101 or a satisfactory score on the mathematics placement test.

MATH 118 ELEMENTARY CALCULUS I (4 S.H.)

Concepts of calculus. The emphasis is on the differentiation and integration of polynomial, rational, exponential, and logarithmic functions. Prerequisite: MATH 117 or a satisfactory score on the mathematics placement test.

MUSIC (MUS)

MUS 101 HISTORY & LITERATURE OF MUSIC I (3 S.H.)

An introduction to the language of music and a survey of music in Western civilization from the Middle Ages through Bach.

MUS 102 HISTORY & LITERATURE OF MUSIC II (3 S.H.)

An introduction to the language of music and a survey of music in Western civilization from 1750 to the present.

MUS 105 CONCEPTS OF MUSIC (3 S.H.)

This course surveys Western music from the medieval period up to the present day, as well as a limited number of non-Western music. The former is examined from an historical perspective; the latter, from a cultural perspective. Upon successful completion of the course, students will have the ability to critically evaluate a composition for stylistic content and historical characteristics. This course differs from MUS 101 and 102 in its subject matter, and in the substantial writing and listening components. Non-Western topics include Native American, Ghanaian, and Japanese music. Western music topics/composers include Gregorian chant, symphony, and 20th-century experiments; Bach, Vivaldi, Beethoven, Wagner, Stravinsky, and Glass.

MUS 109 AMERICA'S MUSIC (3 S.H.)

Treatment of the music of the United States that reveals the diversity of America's music from the early 17th century until the present. Factors that have contributed to American music's growth, including folk, sacred, and secular elements, are discussed.

MUS 306 MUSIC OF THE CLASSICAL PERIOD (3 S.H.)

This course examines music of the second half of the 18th century. Although the focus will be on the works of Wolfgang Amadeus Mozart, Joseph Haydn, and Ludwig van Beethoven, students will also look at the place of the musician in society, lesser known composers, and the development of genres such as the string quartet, the symphony, and opera.

MUS 307 MUSIC OF THE ROMANTIC ERA (3 S.H.)

The course examines Western European 19th-century music. Students study works by both well-known composers such as Schubert, Brahms, and Wagner, and lesser-known ones such as Balakirev, Field, and Clara Schumann. Topics for discussion include the impact of Beethoven, the lied, keyboard works, symphonic traditions, and opera.

MUS 308 MUSIC OF THE 20TH CENTURY (3 S.H.)

Developments in musical composition in the 20th century. Examination of styles and composers from impressionism to the electronic age.

MUS 371 POST-ROMANTICISM: 1875–1915 (3 S.H.)

An examination of the music of the post-Romantic period (1875–1915). Students focus on works by such composers as Bizet, Debussy, Franck, Mahler, Mascagni, Schoenberg, Strauss, and Wolf, with particular attention paid to the influence of Wagner and the role of text in generating sound and structure.

MUS 390 THE AMERICAN MUSICAL (3 S.H.)

The American musical is a unique genre, one that both delights and challenges its audience. It is simultaneously an entertaining combination of song, dance, and dialogue and a persuasive form of communication. It teaches us what and whom to care about and how to achieve this. Engaging us through music and drama, the creators and composers ask us to consider/reconsider ideas and concepts, and, potentially, change our behavior. This course explores selected 20th-century American musicals from a variety of perspectives, including musical style, the role of dance, identity, and ethnicity.

PHILOSOPHY (PHIL)

PHIL 105 INTRODUCTION TO LOGIC (3 S.H.)

A consideration of the forms of valid reasoning and argument, with practice in detection of fallacies. A survey of methods of deductive and inductive reasoning is undertaken. Examination of the concepts of validity, consistency, factual support, and probability, with special emphasis on methods of verification and proof in various sciences and in daily life. No prerequisite.

PHIL 110 CRITICAL THINKING (3 S.H.)

Techniques of critical thinking. Topics include analysis and systematization of ideas, uses of definition, methods of distinguishing valid arguments from fallacies, ways of improving statistical samples, strategies for presenting arguments clearly, equivalent ways of phrasing ideas, and legitimate versus inappropriate appeals to authority. The last weeks of the course are devoted to practicing what has been learned on topics such as medical ethics (e.g., euthanasia) and political theory (e.g., government regulation of business).

PHIL 120 SYMBOLIC LOGIC (3 S.H.)

This course is a rigorous examination of the theory and methods of symbolic logic. Students do problems and proofs in both sentential logic and first order predicate logic, using truth-tables, logic trees, and Int/Elim systems of natural deduction. Emphasis is placed on developing skills at translating sentences from natural language into symbolic notation. This course is useful for majors in computer science, mathematics, engineering, and disciplines in which knowledge of formal systems is important.

PHIL 210 MAJOR PHILOSOPHERS (3 S.H.)

An historical introduction to philosophy. The most interesting ideas of the major philosophers are selected to present a comprehensive view of the fundamental problems of knowledge, ethics, and philosophy of religion.

PHIL 215 ETHICS AND MEDICINE (3 S.H.)

A survey of moral problems and issues in medicine and biomedical research. No background in either science or moral philosophy is required. Problems discussed include genetic manipulation, informed consent, infanticide, abortion, euthanasia, and the allocation of medical resources. Moral theory is presented with the aim of enabling students to think critically and analytically about moral issues. The need for setting biomedical issues in broader perspective is stressed.

PHIL 350 ETHICS (3 S.H.)

This approach to philosophy is through the analysis of moral problems and the critical investigation of theories of moral characteristics in various cultures.

PHIL 352 BUSINESS ETHICS (3 S.H.)

An examination of ethical issues in the business world. Topics include product safety, consumerism, affirmative action, ecological damage, and the relationship between morality and economics.

POLITICAL SCIENCE (POLS)

POLS 101 AMERICAN GOVERNMENT & POLITICS (3 S.H.)

An introduction to basic concepts, functions, and processes of politics and government, using the American system as a model. Topics include political socialization, constitutional government, the legislative process, presidential leadership and the bureaucracy, the role of the judiciary, political parties, interest groups, and problems of civil rights. No prerequisites.

POLS 102 FOREIGN GOVERNMENTS & POLITICS (3 S.H.)

The principal goal of this introductory course is to provide students with a basic knowledge of how political systems around the world function. By examining a wide range of countries, students learn how and why the “rules of the political game” differ from country to country. It is hoped that, after taking this course, students will better understand political events that take place outside the United States and appreciate the diverse political ideas and aspirations of people around the world. No prerequisites.

POLS 204 CURRENT ISSUES IN WORLD AFFAIRS (3 S.H.)

This course introduces students to current issues in international relations. The course focuses primarily on such issues as relations between rich and poor nations, the race between food and population, energy, technology, and the threat to the environment. In addition, students may examine other issues in the headlines, such as terrorism, immigration, human rights, international trade, and the proliferation of chemical, nuclear, and biological weapons. The course hews closely to recent events.

POLS 205 AMERICAN PUBLIC POLICY & POLITICS (3 S.H.)

This course surveys the formal and informal processes by which public policy is made and implemented at all levels of government in the United States. Topics include how issues get onto the public and governmental agendas, basic policy formulation processes in the executive and legislative branches, budgetary policies and practices, the role of courts in the policy process, implementation of administrative law, and informal factors affecting policy, such as the economy, interest groups, the media, and technology. Prerequisite: POLS 101.

POLS 315 STATE AND LOCAL GOVERNMENT (3 S.H.)

An examination of political organization at the state and local levels and the effectiveness of governmental action in dealing with problems of community life. Attention is given to our rapidly expanding metropolitan areas, conflicts over community participation in the governmental process, and problems of relations between governments at different levels. Political structure and history of Pennsylvania are used for examples. Prerequisite: POLS 101.

POLS 319 INTRODUCTION TO CONSTITUTIONAL LAW (3 S.H.)

This course introduces students to the development of constitutions, constitutionalism, and judicial review as a way of granting, limiting, and dividing power within nations. A brief study of the evolution of the Anglo-Saxon common law system as a way of developing constitutional precedents is included. Students examine specific cases dealing with judicial review, the scope of powers granted to the federal government, and the division of American governmental authority through federalism. Prerequisite: POLS 101 and 57 credits.

POLS 320 CONSTITUTIONAL RIGHTS & LIBERTIES (3 S.H.)

A study of the development of constitutional law relating to the rights of individuals and limitations on the power of government. The course will examine the way in which precedents develop, focusing on the Bill of Rights and other relevant portions of the Constitution. Prerequisite: POLS 101 and 57 credits.

PROFESSIONAL WRITING

PRWR 215 EFFECTIVE COMMUNICATION (3 S.H.) (W)

The theory and application of oral, written, and interactive (computer) communication techniques. Using topics relating to their own disciplines, students prepare appropriate forms of communication, including oral presentations, short reports, letters, memos, proposals, and a research paper. This course does not satisfy the general education distribution requirement in humanities. Prerequisite: ENGL 101.

PRWR 380 WRITING FOR HEALTH AND MEDICINE (3 S.H.)

This writing-enriched course examines the types of writing particular to the fields of health and medicine. Students review and critique example documents from fields such as medicine, pharmacy, physical therapy, and nursing; as needed, background on particular specialties, such as writing for the pharmaceutical industry, is provided. This course is especially relevant to students interested in careers in any health care or medical field.

PSYCHOLOGY (PSY)

PSY 105 INTRODUCTION TO PSYCHOLOGY (3 S.H.)

A general introduction to scientific psychology, including biological psychology, development, learning, memory, psychological disorders, and social psychology.

PSY 200 INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY (3 S.H.)

The relation of general psychology to aspects of business and industry, including personnel selection, training, placement, supervision, and evaluation. A discussion of organizational influences on behavior, job motivation and satisfaction, leadership, communication, problem solving, and research methods in industrial and organizational psychology. Prerequisite: PSY 105.

PSY 203 CONSUMER BEHAVIOR AND ADVERTISING (3 S.H.)

An investigation of how psychological processes influence the marketing and consumption of products as well as the marketing and acceptance of ideas. Topics include how advertising attempts to change attitudes and behavior, the influence of motivation theory on advertising content, how persuasion influences the adoption of products and political beliefs, and how cultural differences impact

consumption patterns. Students cannot receive credit for both PSY 203 and MKT 400. Prerequisite: PSY 105.

PSY 204 SOCIAL PSYCHOLOGY (3 S.H.)

This course focuses on human behavior in a social setting, emphasizing types of research that may be used to study social behavior. Topics include attitude formation and change; aggression and its opposite, helping behavior; factors that influence compatibility with other people; and group processes, conformity to a group, and leadership. Students cannot receive credit for both PSY 204 and PSY 210. Prerequisite: PSY 105 or SOC 105.

PSY 205 PERSONALITY (3 S.H.)

Examples of four major types of contemporary personality theories are examined, contrasted, and compared. The role of theory and the relationship of research and evaluation strategies to theory are considered, with examples from each of the theories studied. Theories examined include psychoanalytic, trait, phenomenological, and behavioral approaches to the study of personality. Required for psychology majors. Prerequisite: PSY 105.

PSY 206 PSYCHOLOGY OF WOMEN (3 S.H.)

The social construction of gender and its impact on the lives of women are examined in this course. This survey course covers a wide array of psychological topics as they relate to the female experience in American culture. The influence of historical, developmental, and social contexts on psychological experiences are also examined. Prerequisite: PSY 105.

PSY 210 CROSS-CULTURAL SOCIAL PSYCHOLOGY (3 S.H.)

Cross-cultural social psychology, a new area of study in psychology, deals with research done outside of the United States and looks both for the universals of social behavior and for differences that might be brought about by culture. Differences between subcultures (e.g., groups defined by race, ethnicity, or social class) are also considered. Prerequisite: PSY 105. Students may not take both PSY 204 and PSY 210.

PSY 211 HUMAN GROWTH & DEVELOPMENT I (3 S.H.)

This course studies human development from birth to adolescence. The course addresses the interplay of biological, intellectual, social, and emotional development. Students cannot receive credit for both PSY 211 (Human Growth and Development I) and PSY 332 (Human Growth and Development I with Lab). Prerequisite: PSY 105.

PSY 212 HUMAN GROWTH & DEVELOPMENT II (3 S.H.)

Human development from adolescence through adulthood and old age. The course explores changing capacities and stresses throughout the human life span. Prerequisite: PSY 105.

PSY 215 MULTICULTURAL PSYCHOLOGY (3 S.H.) (S.L.)

This course is an introduction to the principles, theories, and applications of multiculturalism. Students are required to examine their own sense of self and others' identity, beliefs and assumptions, and behaviors. Theories, research, and skills are explored so that students can acquire the necessary multicultural competencies for effective work with children and adolescents from diverse backgrounds (i.e., culture, race, ethnicity, class, and gender) in multicultural environments (i.e., public schools, community organizations). This is a service-learning course. Prerequisite: PSY 105.

PSY 216 COMMUNITY PSYCHOLOGY (3 S.H.) (S.L.)

This course provides an introduction to the field of community psychology. Students learn about social issues, social institutions,

and other settings that influence individuals, groups, and organizations. Principles, theories, and methods, and their application to community issues and settings are also explored. This is a service-learning course. Prerequisite: PSY 105.

PSY 220 LEARNING AND MEMORY (3 S.H.)

This class provides an in-depth look at how animals—including humans—learn about their environment. Students explore topics such as animal behavior, associative learning, classical and operant conditioning, the effects of reward and punishment, and spatial navigation. Students also learn about how the fundamental principles of conditioning and learning are applied in current psychology and research. Prerequisites: PSY 105.

PSY 225 ABNORMAL PSYCHOLOGY (3 S.H.)

This course focuses on similarities and differences between normal and abnormal behavior, individual and environmental genesis and treatment of neurosis and psychosis, and relation of abnormality to social, religious, educational, and other aspects of living. Prerequisite: PSY 105.

PSY 230 COGNITION (3 S.H.)

This course involves an in-depth analysis of human information processing. Topics include perception, attention, memory, and higher cognitive functions. Practical applications of cognitive principles are also discussed. Students cannot receive credit for both PSY 230 and PSY 331. Prerequisite: PSY 105.

PSY 235 FORENSIC PSYCHOLOGY (3 S.H.)

Psychological research has much to offer to the fields of law and law enforcement. In this course, the potential impact and relevance of empirical psychological research to the criminal justice system is discussed in detail. Topics include basic methodological issues, lie detection, repressed memories, jury selection, line-up construction, eyewitness identification and testimony, courtroom persuasion, and group decision-making. Prerequisites: PSY 105 and 3 additional credits in either psychology or criminal justice.

PSY 240 HEALTH PSYCHOLOGY (3 S.H.)

This course studies the contributions of psychology to the promotion and maintenance of health, and to the prevention and treatment of illness. The course is concerned with understanding how behavior affects health, how health affects behavior, and how this knowledge is applied to diagnosis, prevention, treatment, and rehabilitation. Prerequisites: PSY 105.

PSY 245 GROUP DYNAMICS (3 S.H.)

An advanced course in social psychology dealing with the dynamics of group interaction. Among topics to be discussed are one-to-one relationships in personal and work situations; group formation, structure, and leadership; group functioning and conformity; and the effective work group. Prerequisite: PSY 105 or SOC 105.

PSY 260 PARANORMAL PSYCHOLOGY (3 S.H.)

This course involves a critical examination of beliefs in paranormal phenomena. Students read and discuss reports of ESP, human spontaneous combustion, near death experiences, and other parapsychological experiences. In addition, the psychological processes that underlie beliefs in other paranormal phenomena, such as aliens, ghosts, and "hidden" animals, will be discussed. An emphasis is placed on understanding the errors in cognitive processes that can lead to erroneous beliefs. This course counts as an experimental advanced elective for psychology majors. Prerequisite: PSY 105.

PSY 265 EVOLUTIONARY PSYCHOLOGY (3 S.H.)

This course examines a range of psychological phenomena within the framework of evolutionary psychology. The basic principles of evolution through natural selection are introduced followed by their application to animal and human behavior. Topics include ethnology, food preferences, short-term mating strategies, long-term mating strategies, parental investment, kinship, alliances, aggression, and dominance. An introduction to behavior genetics is also covered. Prerequisite: PSY 105.

PSY 331 COGNITION WITH LABORATORY (4 S.H.)

This course involves an in-depth analysis of human information processing through lecture and structured lab activities. Topics include perception, attention, memory, and higher cognitive functions. Practical applications of cognitive principles are also discussed. Students design and conduct experiments in cognitive psychology and write laboratory reports. Psychology majors only. Students take either PSY 230 or PSY 331; they may not take both. Prerequisite: PSY 105 and PSY 385 (grade C or better).

PSY 332 HUMAN GROWTH AND DEVELOPMENT I WITH LABORATORY (4 S.H.)

Through both lecture and structured lab activities, this course focuses on biosocial, cognitive, and psychosocial changes that occur from birth to adolescence. Topics introduced in lecture are further explored using a variety of qualitative and quantitative research methods used in the field. Psychology majors only. Students take either PSY 211 or PSY 332; they may not take both. Prerequisite: PSY 105 and PSY 385 (grade C or better).

PSY 333 FORENSIC PSYCHOLOGY WITH LABORATORY (4 S.H.)

The purpose of this course is to give students an understanding of the role of psychological research as it pertains to the fields of law and law enforcement. Through lecture and lab activities, students learn about basic methodological issues, lie detection, repressed memories, jury selection, line-up construction, eyewitness identification and testimony, courtroom persuasion, and group decision making. Students use experimental design, existing measures of legal attitudes, and computer technology to design studies to investigate some of the lecture topics. Students prepare laboratory reports using the APA style. Psychology majors only. Students take either PSY 235 or PSY 333; they may not take both. Prerequisites: PSY 105 and PSY 385 (grade C or better).

PSY 335 COMMUNITY-BASED YOUTH DEVELOPMENT INTERVENTION STRATEGIES AND PRACTICES: INTEGRATING CRIMINAL JUSTICE AND PSYCHOLOGICAL APPROACHES (SAME AS CJ 335) (6 S.H.)

This is an interdisciplinary criminal justice and psychology year-long course on community intervention strategies and practices for at risk youth. Theories and research that explain problem behaviors (i.e., mental health, substance abuse, delinquency) are reviewed, focusing on both the macro structural factors emphasized in criminology and the micro level perspective emphasized in psychology. Current intervention and prevention programs are examined and combined with field experience to train students in the principles of civic engagement, as well as in the mentoring and treatment of at risk youth. Open to criminal justice or psychology majors with junior standing or above, or with instructor's permission.

PSY 355 BIOLOGICAL PSYCHOLOGY (3 S.H.)

An introduction to the anatomy, physiology, and pharmacology of the nervous system and its role in experience and behavior. Topics include the biological basis of perception, memory, motivation, emotion, and mental illness. This course satisfies either the science/mathematics or social science distribution requirements. Prerequisite: PSY 105.

PSY 360 SENSATION AND PERCEPTION (3 S.H.)

This course deals with the physiological and psychological systems that allow us to see, hear, feel, smell, and taste the incredible range of stimuli we can perceive. Although intimately related, sensation and perception play two complimentary but different roles in how we interpret our world. Sensation is the process of sensing our environment through touch, taste, sight, sound, and smell. Perception is the way we interpret these sensations and therefore make sense of everything around us. The study of sensation and perception also involves an exploration of the constraints on our perceptual systems, since what we can't perceive is often just as important (and often even more interesting) as what we can. Prerequisite: Psychology 105.

PSY 368 HUMAN NEUROPSYCHOLOGY (3 S.H.)

Human neuropsychology is the branch of psychology that seeks to understand the relationship between neural structure and function. In this course, students learn about neural anatomy and physiology and the role these play in determining normal and disordered behaviors. Topics of discussion include the neuropsychology of perception, attention, memory, language, emotion, and action. Prerequisite: PSY 105.

PSY 375 COUNSELING AND PSYCHOTHERAPY (3 S.H.)

Theories and methods used in therapeutic interventions with individuals are emphasized. In addition to readings and lectures, the course includes practice at introductory-level skills and class presentations. Prerequisites: PSY 105 and 325.

PSY 376 PSYCHOLOGY/EDUCATIONAL TESTING (SAME AS ED 376) (3 S.H.)

A critical examination of the potentials and limitations of the presently used tests of intelligence, achievement, aptitude, interests, attitudes, and personality. The use of tests in educational and psychological research, counseling, guidance, and industry is examined. The development, use, and standardization of tests for evaluation and research are also included. Students cannot receive credit for both ED 376 and PSY 376. Prerequisite: PSY 105.

PSY 377 HISTORY & SYSTEMS OF PSYCHOLOGY (3 S.H.)

The historical and philosophical roots of contemporary systems of psychology. The systems discussed include structuralism, functionalism, behaviorism, Gestalt psychology, and psychoanalytic theory. These systems are examined historically, in terms of the individuals whose ideas contributed to their formulation, and philosophically, in terms of how each system resolves the problem of knowledge, the mind-body problem, and the issues of scientific verification and theory construction. Prerequisite: PSY 105 and one psychology course at the 200 level or above.

PSY 385 STATISTICAL METHODS WITH LABORATORY FOR SOCIAL SCIENCES (FORMERLY PSY 381/383) (4 S.H.)

Elementary statistics applied to psychology and other social sciences. Topics include methods for graphing data, descriptive statistics such as measures of central tendency dispersion and correlation, simple probability theory, and inferential statistics including

t-tests, ANOVA, and nonparametric statistics such as chi-square. The SPSS statistical computer package is covered in the laboratory. This course is required of majors in criminal justice, communication studies, psychology, and social work. Other majors are welcome. Students may not receive credit for both PSY 385 and another statistical methods course such as PSY 381, QA 251, ENGR 111, ENGR 315, MATH 114, or MATH 373. This course may not be used to satisfy the social science general education requirement. Prerequisites: MATH 101 or equivalent or a satisfactory performance on the Mathematics Placement Test; basic computing skills; proficiency with the Windows computing environment; and the math requirement with a minimum grade of C.

PSY 387 RESEARCH DESIGN AND LABORATORY FOR PSYCHOLOGY (FORMERLY PSY 382/384) (4 S.H.)

This course teaches the application of scientific method to the study of human behavior. Topics include the relationship between theory, hypotheses and empirical research, ethical considerations of research with humans, laboratory and field experimental methods, survey research, participant observation, and the use of documents and available data. The laboratory reinforces the theoretical issues covered in the lecture portion of the course. Students complete structured, hands-on exercises with experimental and non-experimental research methods in psychology. Students use the computer to analyze data, conduct literature reviews, and write research reports. Required of psychology majors. Prerequisite: Minimum grade of C in PSY 385 for psychology majors.

PSY 430 CURRENT ISSUES IN PSYCHOLOGY (3 S.H.)

This course involves a survey of a wide range of current issues in psychology. Students will read and discuss recent journal articles with two goals in mind. The first is to gain proficiency in reading journal articles and the second is to become knowledgeable about the cutting edge of psychology. In addition to articles provided by the course instructor, the students will find additional sources and use them to supplement class discussions. Psychology majors only. Prerequisites: PSY 105 and junior standing.

SCIENCE (SCI)

SCI 101 FUNDAMENTALS OF PHYSICAL SCIENCE (3 S.H.)

A course in the physical sciences, designed for nonscience majors, that explores the history and development of the fundamental physical laws affecting matter in the universe. It explores the kinds of changes that occur when different types of matter interact. Emphasis is on the application of these physical and chemical laws of nature, as they are significantly observable on the planet earth. The impact of the development of the physical sciences on contemporary life is emphasized.

SOCIAL WORK (SW)

SW 107 INTRODUCTION TO SOCIAL WORK AND SOCIAL WELFARE (3 S.H.)

This introductory course provides students with a general understanding of the field of social work, its value base, and unique contribution to individuals, families, groups, and the community. It also provides students with an understanding of the history, purpose, and function of the social welfare system. A major focus of the course is to examine the broad application of social work practice in a variety of settings. Social work theory and methods,

contemporary trends in the field, social policy, and the relationship between social work and other human service professions is explored. Special attention is given to the areas of diversity, oppression, and social justice. Students are also involved in a service learning project as one of the key assignments.

SOCIOLOGY (SOC)

SOC 105 INTRODUCTION TO SOCIOLOGY (3 S.H.)

A general introduction to sociology covering empirically based theoretical insights on social groups, cultures, institutions, social organization, stratification, deviance, social movements, and social change. The development of a sociological perspective through the application of core concepts, such as the sociological imagination and the social construction of reality, formulates the basic framework for this course.

SOC 201 CRIMINOLOGY (3 S.H.)

The study of crime in society—its origins and relationships to other institutions. These topics are discussed both historically and in the context of contemporary American society. The following theoretical perspectives are explored: biological, psychological, social disorganization, differential association, anomie, cultural and subcultural, functional, social conflict, labeling, and social control. Special topics include organized crime, white collar and corporate crime, victimless crime, and violence in society. Prerequisite: SOC 105.

SOC 202 SOCIAL ACTIVISM (3 S.H.) (S.L.)

This course is a service learning course that includes some form of civic/political engagement in the form of social activism. Students learn about social activism by doing it, reflecting on their experiences and doing research related to the activism they engage in. Experiential learning sites can be found in multiple settings that provide service or take action on behalf of groups or issues where action committees are organized. Social activism offers opportunities to develop leadership skills and work within political/activist organizations. No prerequisites.

SOC 203 SOCIOLOGY OF YOUTH (SAME AS GWS 203) (3 S.H.)

Youth, adolescence, young adulthood—different terms, but all imply a period in life when individuals face various new issues, physically and emotionally. In this course, students explore such issues in the context of social and cultural frameworks. Students consider how sociologists view a category termed “youth” and explore how social systems determine who is a part of this category. Students also look at the personal and social implications of “youth” and the intersections and impact of race, class, and gender on the experiences of youth. Students are introduced to the social constructionist approach to study the issues of youth in the United States, as well as comparative perspectives. Prerequisite: SOC 105.

SOC 215 THE FAMILY (SAME AS GWS 215) (3 S.H.) (W)

An examination of the family as a social institution, with multicultural and cross-cultural differences. Areas of study include the organization of kinship systems, historical antecedents of family structure in the United States, gendered family roles, domestic violence, and the theoretical implications of societal change on intimacy patterns and family relations. Prerequisite: SOC 105.

SOC 235 MINORITIES IN AMERICAN SOCIETY (3 S.H.)

The course investigates the roles of race, ethnicity, and gender as the foundation of group relations and minority status in U.S. society. The sociohistorical process of creating subordinate

groups and the nature of prejudice and discrimination are examined. The social, economic, and political consequences of the process for both minorities and the majority population are explored and related to issues of current interest. Prerequisite: SOC 105.

SOC 240 GENDER AND INTERNATIONAL DEVELOPMENT (3 S.H.)

This course focuses on how gender inequality is structured globally and how economic and political changes in the last half of the 20th century have impacted these inequalities. To understand the impact of economic and political changes, students examine regions such as Latin America, Asia (Southeast, South Asia, China), Africa, and the Middle East and make comparisons with the United States. Students look at the social, economic, and political structures in different countries of these areas and see how gender inequality is socially constructed and impacted by changes. Students end the course by looking at some of the ways women have made changes in the structure of their countries and ultimately their own lives.

SOC 245 RAP, HIP HOP, AND SOCIETY (3 S.H.)

This course explores the contemporary emergence of rap and hip hop culture. The course engages students in listening to music, viewing DVDs, and reading books and articles related to rap, hip hop, and cultural values. Societal issues of social control and freedom of speech are examined. Students explore these issues with the intent to broaden their sociological imaginations. Prerequisite: SOC 105.

SOC 304 FILM AND SOCIETY (3 S.H.)

Films allow us to understand a little of what it would be like to be someone else—a different race, gender, sexual orientation, class, ethnic group—and to imagine living in another place or time. This class is intended to engage students in social issues through the lens of an art form most of us enjoy but often do not analyze. The goal is to sharpen observations and develop perceptive viewing through the difficult task of total immersion in the film while, at the same time, maintaining objectivity and critical detachment. No prerequisites.

SOC 307 SOCIAL DEVIANCE (3 S.H.)

A study of various forms of norm-violating behavior, including individual and group acts, using the societal reaction or interactionist perspective. Types of deviant behavior examined include sexual deviation, mental illness, juvenile gangs, alcoholism, and drug use. Prerequisite: SOC 105.

SOC 310 MEDICAL SOCIOLOGY (3 S.H.)

The institution of medicine from a sociological and cultural perspective. Topics include the relationship of medicine to the value system of the society, the sociology of the profession, and the socialization of the professional. Prerequisite: SOC 105.

SOC 315 POVERTY AND SOCIETY (3 S.H.)

When compared to most other advanced industrial capitalist nations, poverty rates in the United States are high, particularly in many of the nation’s urban centers. This course examines the causes and consequences of poverty. It explores the ways that social scientists define and measure poverty, examines the characteristics of poor Americans today, and considers a broad range of issues relating to poverty such as education, family structure, culture, economic restructuring, segregation, social movements, and public policy. To facilitate better comprehension and understanding of course content, there is a service learning component to the class that requires students to participate weekly in an

organized activity with a community partner in Chester. Prerequisite: SOC 105.

SOC 325 UNIONS, LABOR, AND SOCIETY (3 S.H.)

Upon graduation, many Widener students will be employed in sectors of the economy in which unions play a significant role in determining wages, hours, and working conditions. This is especially true of the many students who will enter occupations in criminal justice, education, health care, and government services. This course examines the history, role, and function of labor unions in American society. It provides an overview of the development and growth of the labor movement, examines the process of collective bargaining and contract administration, and explores the current state of the labor movement. By the conclusion of the course, students are better prepared to enter into a unionized profession. Prerequisite: SOC 105.

SOC 330 MODERN ORGANIZATIONS AND WORK (3 S.H.)

This course discusses the development of modern organizations and the nature of work roles within them. Topics include the impact of industrialization, Weber's theory of bureaucracy, 19th-century industrial ideologies, the emergence of Taylorism and Human Relations, alienation and work, the development of participatory organizational models, leadership, power, informal group processes, the law regarding hiring and promotion, and organizations in the larger political economy. Prerequisite: SOC 105.

SOC 335 DYNAMICS OF ORGANIZATIONS (3 S.H.)

Study concentrates on the structural and psychosocial processes in public and private sector organizations. It includes an examination of the following topics: authority and power, communication, decision making, leadership, and conflict and change. Prerequisite: SOC 105.

SOC 355 SOCIAL THEORY (3 S.H.)

Major theoretical concepts in sociology are examined with emphasis on classical theorists Marx, Weber, and Durkheim. Other theorists, including more contemporary theorists, and specific theories such as Symbolic Interactionism, are covered. Looks at post-modern critiques are also discussed. Required for the sociology minor. Prerequisite: SOC 105, junior or senior standing, or permission of the instructor.

UNDERGRADUATE EXTENDED LEARNING

**UCS 101 INTRODUCTION TO UNDERGRADUATE
EXTENDED LEARNING (3 S.H.)**

This course introduces students to the world of the adult student in undergraduate higher education through readings, research, and essays. Translating experiential learning to the academic world is emphasized with students, starting the process of creating an academic and professional portfolio. The course is open to all Extended Learning students and may be used as a free elective.

**UCS 102 INTRODUCTION TO UNDERGRADUATE
EXTENDED LEARNING CIVIC
ENGAGEMENT (1 S.H.)**

This course introduces transfer and reentry students with more than 75 credits to the world of adult education and the Widener mission of civic engagement. Students build on volunteer knowledge by reading and discussing essays about serving, giving, and leading. Students are also introduced to the student e-portfolio

system, which is a requirement for Extended Learning students. Students may not take this course if they have taken UCS 101. The course is in an online format only, and students should take this course their first semester. It is designed so that additional courses may be taken at the same time.

**UCS 200 BECOMING A CIVICALLY ENGAGED
PROFESSIONAL (W) (3 S.H.)**

This elective course for all Extended Learning students focuses on promoting learning through active participation in service experiences. Students build on their volunteer knowledge by reading and discussing essays about serving, giving, and leading. The historical context of service learning is reviewed. Structured reflection time is provided during which students link their beliefs about civic engagement to their individual experiences. Several opportunities are provided to the students to work in the surrounding community.

**UCS 390 DEVELOPING EFFECTIVE DECISION
MAKING AND PROBLEM SOLVING
COMPETENCIES (4 S.H.)**

This course enhances students' knowledge of the decision-making process in organizations, the core of an organization's operation, and the foundation for managers and supervisors at any level. It provides students with decision-making tools including descriptive statistics, probability theory, hypothesis testing, and decision analysis/tree. Throughout this course, students learn different perspectives in the study of individual, group, and organizational decision making and investigate the pros and cons of various theories and approaches under these perspectives. Students are required to consider the role of rationality and non-rationality in decision making and examine how uncertainty and ambiguity may impact their perceptions of choices and risks.

UCS 400 CAPSTONE SEMINAR (3 S.H.)

This course is the culminating academic experience for students in the professional studies major. Students integrate the significant learning achieved from courses, programs, and life/work experiences and make plans for their future. This seminar helps adult learners cope with their particular ending-beginning situations, identify their strengths to reinforce a positive sense of self, obtain support as they move into the next transition, and develop strategies to deal with change. During the seminar, students review the challenges that adults face in developing new life and work roles, such as developmental issues faced by "aging" students, including life-span concepts, age discrimination in the workplace, or the loss of structure that "going to school" gives adult learners. Students conduct a reappraisal of their goals and are encouraged to consider how the different parts of life fit together (intellectual, social, emotional, physical, vocational, spiritual). Prerequisite: Senior status (completion of at least 90 semester hours of credit toward the degree) and UCS 101 or 102.
